A GUIDE TO THE BIRDS OF EAST AFRICA

Penguin UK For lovers of Alexander McCall Smith, Nicholas Drayson introduces the charming Mr Malik and the East African Ornithological Society in *A Guide to the Birds of East Africa*. Reserved, honourable Mr Malik. You wouldn't notice him in a Nairobi street - except, perhaps, to comment on his carefully sculpted comb-over - but beneath his unprepossessing exterior lie a warm heart and a secret passion. Not even his closest friends know it, but Mr Malik is head-over-heels in love with the leader of the local Tuesday-morning bird walk, Rose Mbikwa. Little can he imagine the hurdles that lie before him. Even as he plucks up the courage to ask for Rose's hand, thieves, potential kidnappers and corrupt officials, not to mention one particularly determined love rival, seem destined to thwart Mr Malik's chances. Will an Indian gentleman in the heart of Africa be defeated by the many obstacles that stand between him and his heart's desire? Or will honour and decency prevail? 'A funny, ingenious and touching love story' Joanne Harris, *The Times* 'A delightful comedy... It invites comparison to *The No.1 Ladies' Detective Agency* books, but it's original and, if anything, has more depth' *Daily Mail* 'Sweet, charming and utterly wonderful on the subject of birds' *Metro* Nicholas Drayson was born in England and has lived in Australia since 1982, where he studied zoology and a PhD in 19th century Australian natural history writing. He has worked as a journalist in the UK, Kenya and Australia, writing for publications such as the *Daily Telegraph* and *Australian Geographic*. He is the author of three other novels, *Confessing a Murder*, *Love and the Platypus* and *A Guide to the Beasts of East Africa*.

MATLAB FOR BRAIN AND COGNITIVE SCIENTISTS

MIT Press An introduction to a popular programming language for neuroscience research, taking the reader from beginning to intermediate and advanced levels of MATLAB programming. MATLAB is one of the most popular programming languages for neuroscience and psychology research. Its balance of usability, visualization, and widespread use makes it one of the most powerful tools in a scientist's toolbox. In this book, Mike Cohen teaches brain scientists how to program in MATLAB, with a focus on applications most commonly used in neuroscience and psychology. Although most MATLAB tutorials will abandon users at the beginner's level, leaving them to sink or swim, *MATLAB for Brain and Cognitive Scientists* takes readers from beginning to intermediate and advanced levels of MATLAB programming, helping them gain real expertise in applications that they will use in their work. The book offers a mix of instructive text and rigorous explanations of MATLAB code along with programming tips and tricks. The goal is to teach the reader how to program data analyses in neuroscience and psychology. Readers will learn not only how to but also how not to program, with examples of bad code that they are invited to correct or improve. Chapters end with exercises that test and develop the skills taught in each chapter. Interviews with neuroscientists and cognitive scientists who have made significant contributions their field using MATLAB appear throughout the book. *MATLAB for Brain and Cognitive Scientists* is an essential resource for both students and instructors, in the classroom or for independent study.

A BRIEF HISTORY OF LIFE IN THE MIDDLE AGES

Robinson Using wide-ranging evidence, Martyn Whittock shines a light on Britain in the Middle Ages, bringing it vividly to life. Thus we glimpse 11th century rural society through a conversation between a ploughman and his master. The life of Dick Whittington illuminates the rise of the urban elite. The stories of Roger 'the Raker' who drowned in his own sewage, a 'merman' imprisoned in Orford Castle and the sufferings of the Jews of Bristol reveal the extraordinary diversity of medieval society. Through these characters and events - and using the latest discoveries and research - the dynamic and engaging panorama of medieval England is revealed. Interesting facts include: When the life expectancy for women dropped to 26 years in Sierra Leone in 2002, following a catastrophic civil war, it was one year longer than the estimate for early medieval women. So great was the extent of church construction in the thirteenth century that it has been calculated it was the equivalent, in modern terms, of every family in England paying £500 every year, for the whole century! Murder rates for East Anglia, in the fourteenth century, were comparable with those of modern New York. For England generally the homicide rate was far higher than that of the urban USA today.

HOW CIVILIZATIONS DIE

(AND WHY ISLAM IS DYING TOO)

Regnery Publishing You've heard about the Death of the West. But the Muslim world is on the brink of an even greater collapse. WILL WE GO DOWN IN THE IMPLOSION? Thanks to collapsing birthrates, much of Europe is on a path of willed self-extinction. The untold story is that birthrates in Muslim nations are declining faster than anywhere else—at a rate never before documented. Europe, even in its decline, may have the resources to support an aging population, if at a terrible economic and cultural cost. But in the impoverished Islamic world, an aging population means a civilization on the brink of total collapse— something Islamic terrorists know and fear. Muslim decline poses new threats to America, challenges we cannot even understand, much less face effectively, without a wholly new kind of political analysis that explains how desperate peoples and nations behave. In How Civilizations Die, David P. Goldman—author of the celebrated “Spengler” column read by intelligence organizations worldwide—reveals how, almost unnoticed, massive shifts in global power are remaking our future. Goldman reveals: How extinctions of peoples, cultures, and civilizations are not unthinkable—but certain How for the first time in world history, the birthrate in the West has fallen below replacement level Why birthrates in the Muslim world are falling even faster Why the “Arab Spring” is the precursor of much more violent change in the Islamic world Why looming demographic collapse may encourage Islamic terrorists to “go for broke” How the United States can survive the coming world turmoil In How Civilizations Die, David P. Goldman has written an essential book for understanding what lies in the future for America and the world.
