### CIVIL SOCIETY: THE ENGINE FOR ECONOMIC AND SOCIAL WELL-BEING

---

### THE 2017 GRIFFITHS SCHOOL OF MANAGEMENT AND IT ANNUAL CONFERENCE ON BUSINESS, ENTREPRENEURSHIP AND ETHICS (GMSAC)

---

**Springer** This proceedings volume explores the concept of civil society as an engine for economic and social well-being. Featuring contributions from the 2017 Griffiths School of Management and IT Annual Conference on Business, Entrepreneurship and Ethics (GMSAC) held in Oradea, Romania, this volume provides different perspectives, emerging studies and trends that are crucial to the further understanding of the interconnection of civil society, economic development and social stability. The enclosed contributions address key topics such as a) the ways in which national, regional and local governments are best equipped to support economic and social development, b) how government, business and non-profit sectors can support economic and social stability and c) the ways in which growing economies' active societies can strengthen civil society. Research and practice have proven that there is a great potential for civil society organizations to support socio-economic well-being, both directly and indirectly. As a result, the interplay between civil society, economics and social well-being is highly relevant to current business and economic research and is a topic of discussion by academics and practitioners in the government, business and non-profit sectors. This volume showcases some of the current research, cases and discussions in this area from an interdisciplinary, global perspective. Featuring contributions exploring timely subjects such as consumer behavior, the hospitality industry, education, corporate social responsibility (CSR), banking, health care, and semiotics, this book is appropriate for researchers, academics and policy makers in economic and social development, business ethics and sustainability.

### AN ESSAY ON THE NATURE AND SIGNIFICANCE OF ECONOMIC SCIENCE

---

**Ludwig von Mises Institute** This book by Lionel Robbins first appeared in 1932 as an outstanding English-language statement of the Misesian view of economic method, namely that economics is a social science and must advance its propositions by means of deductive reasoning and not through the methods used in the natural sciences. The case is argued here with patience and attention to scholarly details. The unfortunate second edition of this book, which is more available today, introduces confusions by departing from Austrian microeconomic theory. Thus does the Mises Institute celebrate the 75th anniversary of the first edition with this reprint. "Reading Robbins," writes Samuel Bostaph of the University of Dallas, "is an excellent way of contrasting his explanation of the basic nature of economics with that of the Austrian School, as found in the work of Mises as an extension of Carl Mengers's foundations. Such a reading wonderfully clarifies one's understanding of the basic conception of economics as a science of human action, rather than one of mere 'economizing.'"

### GLOBAL RESPONSIBLE INTERGENERATIONAL LEADERSHIP

---

### A CONCEPTUAL FRAMEWORK AND IMPLEMENTATION GUIDANCE FOR INTERGENERATIONAL FAIRNESS

---

**Vernon Press** Today's grand policy dilemmas, from climate change, to over-indebtedness, to demographic shifts, have momentous long-term implications. Future generations will be constrained by our present decisions to an extent that is without precedent in advanced capitalist democracies. This book is an extensively researched and reasoned appeal in favor of intergenerational fairness - the ability to provide to future generations an at least as favorable standard of living as that enjoyed today. Intergenerational equity is an essential consideration in finding lasting solutions to the multifaceted crises of our time. As an implicit contract and transfer between living and future generations, intergenerational equity avoids discriminating against future generations. The book aims to theoretically define intergenerational equity and to frame it as a natural behavioral law, capturing human ethicality bounds. It follows a long and distinguished tradition of scholarly discourse in turning to natural law for solutions to major social predicaments. Outlining some of the causes of the current intergenerational imbalances regarding climate change and over-indebtedness it sets the basis for understanding their drivers and implications. A central proposition is that the natural human drive towards intergenerational fairness can be the basis for the necessary behavioral responses: the human-imbued moral compass of natural law can be a useful complement, if not alternative, to public policy. This book fills an important gap. Despite a resurgence of literature, the economic and social dimensions of intergenerational equity remain underexplored. Existing literature misses a holistic ethical framework of decision-making failures that addresses intergenerational concerns. Whilst evolutionary grounded, intergenerational fairness has not been recognized as a natural behavioral law - a human-imbued drive being bound by human fallibility. Practical implications and recommendations in advancing an agenda for the advancement of intergenerational equity are provided. Attention is drawn to the problem of providing the required leadership to promote the idea of intergenerational equity as a guiding principle in corporate, social and policy action. This book contributes both theoretical and practical insights and will be of interest to economists, sociologists, public policy makers and corporate executives tasked with tackling the most pressing contemporary challenges of mankind.

## CAPTURING CHANGE IN SCIENCE, TECHNOLOGY, AND INNOVATION

### IMPROVING INDICATORS TO INFORM POLICY

**National Academies Press** Since the 1950s, under congressional mandate, the U.S. National Science Foundation (NSF) - through its National Center for Science and Engineering Statistics (NCSES) and predecessor agencies - has produced regularly updated measures of research and development expenditures, employment and training in science and engineering, and other indicators of the state of U.S. science and technology. A more recent focus has been on measuring innovation in the corporate sector. NCSES collects its own data on science, technology, and innovation (STI) activities and also incorporates data from other agencies to produce indicators that are used for monitoring purposes - including comparisons among sectors, regions, and with other countries - and for identifying trends that may require policy attention and generate research needs. NCSES also provides extensive tabulations and microdata files for in-depth analysis. Capturing Change in Science, Technology, and Innovation assesses and provides recommendations regarding the need for revised, refocused, and newly developed indicators of STI activities that would enable NCSES to respond to changing policy concerns. This report also identifies and assesses both existing and potential data resources and tools that NCSES could exploit to further develop its indicators program. Finally, the report considers strategic pathways for NCSES to move forward with an improved STI indicators program. The recommendations offered in Capturing Change in Science, Technology, and Innovation are intended to serve as the basis for a strategic program of work that will enhance NCSES's ability to produce indicators that capture change in science, technology, and innovation to inform policy and optimally meet the needs of its user community.

## QUALITATIVE METHODS IN ECONOMICS

**Routledge** Despite numerous books on research methodology, many have failed to present a complete, hands-on, practical book to lead college classes or individuals through the research process. We are seeing more and more scientific papers from all research fields that fail to meet the basic criteria in terms of research methods, as well as the structure, writing style and presentation of results. This book aims to address this gap in the market by providing an authoritative, easy to follow guide to research methods and how to apply them. Qualitative Methods in Economics is focused not only on the research methods/techniques but also the methodology. The main objective of this book is to discuss qualitative methods and their use in economics and social science research. Chapters identify several of the research approaches commonly used in social studies, from the importance of the role of science through to the techniques of data collection. Using an example research paper to examine the methods used to present the research, the second half of this book breaks down how to present and format your results successfully. This book will be of use to students and researchers who want to improve their research methods and read up on the new and cutting edge advances in research methods, as well as those who like to study ways to improve the research process.

## SURVEY OF ECONOMIC AND SOCIAL DEVELOPMENTS IN THE ARAB REGION 2015-2016

**United Nations** The economic and political uncertainty which has characterized the Arab region in the wake of the 2011 transitions and upheaval continues to restrain the region's prospects for growth, job creation and stability. Economic expansion remains stalled, with persistently low global oil prices adding a further burden to the regional economy and constraining the growth and fiscal balances of those countries that had been top-performers due to energy exports. While some progress on social indicators such as gender representativeness can be noted, countries in and affected by political transition and conflict have regressed on a plethora of socioeconomic indicators. These trends can be noted for the past five years, and with this in mind, the 2015-16 Survey will utilize recent data in order to take stock of the impact of instability and conflict, and address the foregone growth and output and destructive effects of this period. It also draws on recent research of ESCWA regarding migration, social developments, the impact of conflict, women's empowerment, and specific country-level analysis.

## THE ECONOMICS OF SOCIAL DETERMINANTS OF HEALTH AND HEALTH INEQUALITIES

### A RESOURCE BOOK

**World Health Organization** "This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

## KNOWLEDGE MOBILISATION AND SOCIAL SCIENCES

### RESEARCH IMPACT AND ENGAGEMENT

**Routledge** The essays presented in this volume examine knowledge mobilisation and its relation to research impact and engagement. The social sciences matter because they can help us to understand and address the complex challenges confronting society. This is particularly true in an era of significant downward pressure on public expenditure, a consequence of the global fiscal crisis, when there is a striking need to ensure that policies are demonstrably effective and efficient. The impact agenda in the UK, reflected in parallel global debates, actively encourages the social sciences to make and demonstrate a difference; to justify and protect social science funding. This volume shows how knowledge mobilisation can be thought of systematically as a process, encompassing engagement, leading to the co-production and channelling of knowledge to make a difference in the economy and society. This book was originally published as a special issue of Contemporary Social Science.

## WHAT WE OWE EACH OTHER

### A NEW SOCIAL CONTRACT FOR A BETTER SOCIETY

**Princeton University Press** From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience--raising children, getting educated, falling ill, working, growing old--and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society--together.

## TOWARDS A NEW SOCIAL ORDER? REAL DEMOCRACY, SUSTAINABILITY & PEACE

---

**Vernon Press** This contribution argues that a long-established social order has been in place since the first stratified societies in the Near Middle East which unavoidably comes with substantial economic, political and environmental repercussions. Part I of the book dissects the various facets of this order, which is termed the social dominance paradigm, while in Part II a fundamentally different order, the peace paradigm, is introduced. The latter rests on real democracy (in the Athenian sense), sustainability and peace. As such, both paradigms function as vehicles for further analysis and research while the peace paradigm also provides a rough plan for the implementation of transformational change. Typically, political, economic, social, and environmental research seeks to increase specialized knowledge. Here, however, the overall intent is to utilize interdisciplinary evidence and connect the dots between a number defining features within seemingly modern societies. The argument is that these are, in fact, not modern at all but follow an ancient template of power, control, and coordination concentrated in the hands of the few. Potentially, this contribution can function as a trans-disciplinary methodological framework as well as an information hub for researchers in the fields of political and social sciences, history, anthropology, evolutionary biology, organization and peace studies. Practitioners who are interested in fundamental social change may also find the issues raised to be of interest. As such, this book provides a generalist, evidence-based discussion of a multi-disciplinary nature that may pique the interest of both experts and amateurs alike.

## NEW OPPORTUNITIES AND CHALLENGES IN OCCUPATIONAL SAFETY AND HEALTH MANAGEMENT

---

**CRC Press** Global economy and its business environment, and thus the world of work, have recently been influenced by demographic and social changes, globalisation, as well as rapid development and introduction of novel, sophisticated and previously unknown technologies and new business models, especially in the context of the so-called fourth industrial revolution. These changes pose a number of challenges in terms of maintaining and improving occupational safety and health (OSH) management performance, as traditional approaches to OSH management in new working environments may no longer be effective. In view of the above, the overall goal of this book is to present new approaches and methods for improving the effectiveness of OSH management. They are based on state-of-the-art research and are in line with the latest trends and concepts in the field. The book focuses on five thematic areas, which are discussed in respective chapters: 1) Implementing the process approach to OSH management; 2) Improving OSH management systems with fuzzy cognitive maps; 3) Implementing strategic thinking approaches in relation to OSH management; 4) Integrating OSH management within the framework of the CSR concept; 5) Enhancing OSH management processes through the use of smart digital technologies. The methods and solutions discussed may be considered as specific "opportunities" for the improvement to be taken into account in the processes of implementing and maintaining an OSH management system in light of the requirements of the new ISO 45001 standard.

## EMERGING ECONOMIC MODELS FOR GLOBAL SUSTAINABILITY AND SOCIAL DEVELOPMENT

---

### ENHANCING THE WHOLE CURRICULUM

---

**Bloomsbury Publishing** Personal, social, health and economic education (PSHE) and relationships, (sex) and health education (R(S)HE) are often undervalued in school and are frequently seen as add-ons. But when taught well, PSHE and R(S)HE can enhance not only other subjects but strengthen school safeguarding, develop pupil well-being and improve pupils' progress and resilience in learning. Underpinned by a range of contemporary research and illustrated through examples of classroom practice, the expert team of teacher educators look at a range of curriculum areas and contemporary issues to explore how PSHE and R(S)HE education can enhance other curriculum areas. As well as showing how pupils' life skills can be developed, they also explore how teachers' understanding of how PSHE and R(S)HE can be implemented without additional planning or expensive resources. The book takes an inclusive understanding of both diverse families and relationships throughout. Topics covered include: -social media, online presence and critical literacy skills -mental health coping strategies -plastic reducing -topical, sensitive, controversial issues (TSCIs) Covering the whole primary spectrum from Early Years to Key Stage 2, case studies from each phase are included within each chapter to help practitioners to relate the material to their own classroom. ## CREATING ECONOMIC SPACE FOR SOCIAL INNOVATION

---

**Oxford University Press** This book draws upon economic and sociological theory to provide a comprehensive discussion of economic space for social innovation, addressing especially marginalized groups and the long-term projects, programmes, and policies that have emerged and evolved within and across European states. It approaches the explanatory and normative questions raised by this topic via a novel approach: the Extended Social Grid Model (ESGM). Taking inspiration from the fields of economic sociology and ethics, this model shows that social innovation processes must be structural, and require change in power relations, if marginalization is to be effectively dealt with via social innovation. Part I of the book sets out the ESGM, including an exposition on the model along with background chapters on innovation, power and marginalization, ethics and social innovation, and empirical methods. Part II explores the model with a focus on social innovation trajectories of social housing, drinking water provision, employment, education, and food provision. It also explores the operationalization of the model with a view to agency and empowerment, as well as social innovation policy in Europe and the use of social impact bonds as a tool for financing social innovation. Part III revisits the ESGM and considers the explanatory adequacy and fruitfulness of the model for innovation research and for theorizing social innovation, addressing questions on the role and limitations of participation in social innovation for the marginalized, the role of capital for creating economic space for capabilities, and how we can approach the social impact of social innovation. This collection of essays presents a diverse range of perspectives on understanding and addressing the key issue of marginalization, and offers key recommendations for policy makers engaging with social innovation across the European Union and beyond.

### METHODOLOGY OF ISLAMIC ECONOMICS

---

#### PROBLEMS AND SOLUTIONS

---

**Routledge** In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and appraises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.

### INNOVATION ECONOMICS

---

**Yale University Press** This important book delivers a critical wake-up call: a fierce global race for innovation advantage is under way, and while other nations are making support for technology and innovation a central tenet of their economic strategies and policies, America lacks a robust innovation policy. What does this portend? Robert Atkinson and Stephen Ezell, widely respected economic thinkers, report on profound new forces that are shaping the global economy—forces that favor nations with innovation-based economies and innovation policies. Unless the United States enacts public policies to reflect this reality, Americans face the relatively lower standards of living associated with a noncompetitive national economy. The authors explore how a weak innovation economy not only contributed to the Great Recession but is delaying America's recovery from it and how innovation in the United States compares with that in other developed and developing nations. Atkinson and Ezell then lay out a detailed, pragmatic road map for America to regain its global innovation advantage by 2020, as well as maximize the global supply of innovation and promote sustainable globalization.

### ADOPTION OF CORPORATE SOCIAL RESPONSIBILITY BY JAPANESE COMPANIES

---

**IUDICIUM Verlag** Corporate social responsibility (CSR) is a topical issue in many countries. What are the drivers for the global spread of explicit CSR – practices that are demonstrated to the outside – even in countries where companies had addressed CSR implicitly? What catalyzes organizations to adopt CSR and how does their adoption influence other companies' likelihood to adopt CSR? This book approaches the recent world-wide adoption of CSR practices as part of the global spread of management concepts. The trend to adopt CSR is examined among Japanese companies, because they have rapidly adopted CSR practices in the last two decades. Existing empirical research on CSR in Japan that has focused mainly on anecdotal evidence on a small number of outstanding companies is extended by employing both qualitative and quantitative empirical research methods. Analyzing drivers for the adoption of CSR practices, organizational characteristics of adopting companies, and how increasing adoption influences the likelihood to adopt provides insights into how Japanese institutions and stakeholders facilitated rapid CSR adoption and the process of CSR diffusion.

### NEUTROSOPHIC SETS AND SYSTEMS, VOL. 26, 2019. SPECIAL ISSUE: SOCIAL NEUTROSOPHY IN LATIN AMERICA

---

**Infinite Study** The Latin American Neutrosophic Science Association was created in 2018 as a result of the initiative of a group of university professors from Mexico and Ecuador. The Association has developed an intense work in the investigative context, expression of the capacity that neutrosophy has as a tool for understanding and transformation of reality in social benefit. Neutrosophic sets as a generalization fuzzy set (especially intuitionistic fuzzy sets), allows handling a greater number of situations that occur in reality and becomes a facilitator of the approach to the studied object without undermining its complex and multivariate essence. In this special edition, researchers from six Ecuadorian universities show the results of research projects addressing a wide range of topics related to the social environment of these Higher Education Institutions. The contents include law, criminology, public and administrative management, evaluation of pedagogical scenarios, prospective analysis, artificial intelligence, among other topics. They are many different texts with a common denominator, the social sciences, and their relationship with neutrosophy. The progress of these investigations originates a significant change in the ways of validating and reasoning the proposals, the appreciation of neutrality increases the interpretability and the inferential efficacy from the analysis of the results, which enunciates a methodological, perceptive and objective enrichment in the humanistic sciences in Latin American geographical region.
