The Financial Crisis Inquiry Report

The Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States Including Dissenting Views

Cosimo, Inc. The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." Financial Accountability in the European Union

Institutions, Policy and Practice

Routledge This book offers comprehensive coverage of various aspects of financial accountability around the EU budget - how it is spent via policies, how institutions engage in checking policy performance (what taxpayers' money actually delivers), and therein, the issues of monitoring, controlling, auditing, scrutinising and communicating budgetary expenditure. Presenting conceptual and theoretical approaches including financial accountability, learning, multi-level governance, implementation and throughput legitimacy, it looks at EU institutions (European Parliament, European Court of Auditors, European Ombudsman, European Public Prosecutor's Office) and national bodies (supreme audit institutions at the national level), examining their contact with the EU budget. It details the historical development of accountability mechanisms (the 'statement of assurance', financial corrections, and parliamentary oversight by the Budgetary Control Committee (CONT)), and examines policy areas such as those of agriculture, social policy and cohesion (including Structural Funds and the Common Agricultural Policy), exploring the challenges of financial accountability in practice. Given the recent introduction of non-budgetary financial instruments and tools only partly financed by the EU budget, it sheds light on new burgeoning areas such as the European Stability Mechanism (ESM) and the European Fund for Strategic Investment (EFSI) and the challenges they bring for ensuring the accountability of public money. This book will be of key interest to scholars and students of audit and evaluation, budgetary spending and financial control and, more broadly, public administration, public policy and EU institutions and politics.
