[Walter de Gruyter](#) The Atlas of North American English provides the first overall view of the pronunciation and vowel systems of the dialects of the U.S. and Canada. The Atlas re-defines the regional dialects of American English on the basis of sound changes active in the 1990s and draws new boundaries reflecting those changes. ### Relativization in Ojibwe

[U of Nebraska Press](#) In *Relativization in Ojibwe*, Michael D. Sullivan Sr. compares varieties of the Ojibwe language and establishes subdialect groupings for Southwestern Ojibwe, often referred to as Chippewa, of the Algonquian family. Drawing from a vast corpus of both primary and archived sources, he presents an overview of two strategies of relative clause formation and shows that relativization appears to be an exemplary parameter for grouping Ojibwe dialect and subdialect relationships. Specifically, Sullivan targets the morphological composition of participial verbs in Algonquian parlance and categorizes the variation of their form across a number of communities. In addition to the discussion of participles and their role in relative clauses, he presents original research linking geographical distribution of participles, most likely a result of historic movements of the Ojibwe people to their present location in the northern midwestern region of North America. Following previous dialect studies concerned primarily with varieties of Ojibwe spoken in Canada, *Relativization in Ojibwe* presents the first study of dialect variation for varieties spoken in the United States and along the border region of Ontario and Minnesota. Starting with a classic Algonquian linguistic tradition, Sullivan then recasts the data in a modern theoretical framework, using previous theories for Algonquian languages and familiar approaches such as feature checking and the split-CP hypothesis.

## The Ramapo Mountain People

[Rutgers University Press](#) Northwest of Manhattan where the New York-New Jersey boundary crosses the tree-covered ridges and hollows ridges and hollows of the Ramapo Mountains there is a group of about 1,500 racially mixed people who have long been referred to by journalists and historians as the "Jackson Whites." In a study combining the disciplines of anthropology, sociology, folklore, and history, David Cohen found that the old stories about these people were legends, not history. He found no reliable evidence that their ancestors were Tuscarora Indians, Hessian deserters from the British army, escaped slaves, and British and West Indian prostitutes imported by a sea captain named Jackson for the pleasure of British soldiers occupying Manhattan during the War for Independence. David Cohen lived among the Ramapo Mountain People for a year, conducting genealogical research into church records, deeds, wills, and inventories in county courthouses and libraries. He established that their ancestors included free black landowners in New York City and mulattoes with some Dutch ancestry who were among the first pioneers to settle in the Hackensack River Valley of New Jersey. In describing his findings and his experiences, Professor Cohen shows how their racially mixed ancestry, their special family and kinship system, and their intergroup attitudes and folkways distinguish and socially isolate these people as a separate racial group today, despite modern communications and transportation and their proximity to New York City.

They introduce characters as varied as a highly literate Canadian frontiersman and a devoutly Mormon river guide and address issues ranging from the esoteric art of tying flies to the enduring philosophy of a seventeenth-century angler to the trials of the aging fisherman. ## Flatheads and Spoonneys

### Fishing for a Living in the Ohio River Valley

[University Press of Kentucky](#) Since the early 1800s, people have made a living fishing and harvesting mussels in the lower Ohio Valley. These river folk are conscious of an occupational and social identity separate from those who earn their living from the land. Sustained by a shared love of the river, deriving joy from the beauty of their chosen environment, and feeling great pride in their ability to subsist on its wild resources and to master the skills required to make a living from it, many still identify with the nomadic houseboat-dwelling subculture that flourished on the river from the early nineteenth century to the 1950s. Today's community of fisherfolk is small and economically marginal, but their activities sustain a complex set of traditional skills and a body of verbal folklore associated with river life. In *Flatheads and Spoonies*, Jens Lund describes the activities, boats, gear, verbal lore, and sense of identity of the fisher folk of the lower Ohio River Valley and provides historical and ethnobiological background for their way of life. Lund connects the importance of river fish in the diet of inhabitants of the valley to local fishing activities and explores the relationship between river people and those whose culture is primarily land-based, painting a colorful portrait of river fishing and river life. This book offers a look—historical and ethnographic—at a little-known aspect of traditional life in the American Midwest, still surviving today despite immense changes in environment, resources, and economic base.
