Judge Cordell, the first African American woman to sit on the Superior Court of Northern California, knows firsthand how prejudice has permeated our legal system. And yet, she believes in the system. From ending school segregation to legalizing same-sex marriage, its progress relies on legal professionals and jurors who strive to make the imperfect system as fair as possible. Her Honor is an entertaining and provocative look into the hearts and minds of judges. Cordell takes you into her chambers where she haggles with prosecutors and defense attorneys and into the courtroom during jury selection and sentencing hearings. She uses real cases to highlight how judges make difficult decisions, all the while facing outside pressures from the media, law enforcement, lobbyists, and the friends and families of the people involved. Cordell's candid account of her years on the bench shines light on all areas of the legal system, from juvenile delinquency and the shift from rehabilitation to punishment, along with the racial biases therein, to the thousands of plea bargains that allow our overburdened courts to stay afloat—as long as innocent people are willing to plead guilty. There are tales of marriages and divorces, adoptions, and contested wills—some humorous, others heartwarming, still others deeply troubling. Her Honor is for anyone who's had the good or bad fortune to stand before a judge or sit on a jury. It is for true-crime junkies and people who vote in judicial elections. Most importantly, this is a book for anyone who wants to know what our legal system, for better or worse, means to the everyday lives of all Americans. **Final Judgment The Last Law Lords and the Supreme Court Bloomsbury Publishing** Winner of the Inner Temple book prize 2015 and the Socio-Legal Studies Association Book prize 2014/15 The House of Lords, for over 300 years the UK's highest court, was transformed in 2009 into the UK Supreme Court. This book provides a compelling and unrivalled view into the workings of the Court during its final decade, and into the formative years of the Supreme Court. Drawing on over 100 interviews, including more than 40 with Law Lords and Justices, and uniquely, some of their judicial notebooks, this is a landmark study of appellate judging 'from the inside' by an author whose earlier work on the House of Lords has provided a scholarly benchmark for over 30 years. The book demonstrates that appellate decision-making in the UK's final court remains a social and collective process, primarily because of the dialogues which take place between the judges and the key groups with which they interact when reaching their decisions. As the book shows, the forms of dialogue are now more varied, yet the most significant dialogues continue to be with their fellow Law Lords and Justices, and with counsel. To these, new dialogues have been added, namely those with foreign courts (especially Strasbourg) and with judicial assistants, which have subtly altered the tenor and import of their other dialogues. The research reveals that, unlike the English Court of Appeal, the House of Lords in its last decade was only intermittently collegial since Lord Bingham's philosophy of appellate judging left opinion writing, concurrences and dissents largely to individual preference. In the Supreme Court, however, there has been a marked shift to team working and collective decision-making bringing with it challenges and occasional tensions not seen in the final years of the House of Lords. The work shows that effectiveness in group-decision making in the final court turns in part on the stages when dialogues occur, in part on the geography of the court and in part on the task leadership and social leadership skills of the judges involved in particular cases. The passing of the Human Rights Act and the expansion in judicial review over the last 30 years have dramatically altered the two remaining dialogues - those with Parliament and with the Executive. With the former, the dialogue has grown more distant, with the latter, more problematic, than was the case 40 years ago. The last chapter rehearses where the changing dialogues have left the UK's final court. Ironically, despite the oft applauded commitment of the new Court to public visibility, the book concludes that even greater transparency in the dialogue with the public may be required. 'The way appellate judges at the highest level behave to each other, to counsel, with other branches of government and with other courts is brought under closer scrutiny in this book than ever before...The remarkable width and depth of his examination...has resulted in a work of real scholarship, which all those who are interested in how appellate courts work all over the common law world will find especially valuable.' From the foreword by Lord Hope of Craighead **KT 'Alan Paterson's knowledge and interest in the Supreme Court, coupled with his expertise as a lawyer who understands the legal system and the judicial process, make him a perfect chronicler and assessor of what the Court's role is and what it should be, and how it functions and how it might improve.'** Lord Neuberger, President of the Supreme Court **Strengthening Forensic Science in the United States A Path Forward National Academies Press** Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. **Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **The Constitution of Belgium A Contextual Analysis Bloomsbury Publishing** The Belgian Constitution, once described as a model of consensus democracy, has now become an enigma in comparative federalism. On the one hand, it demonstrates features which suggest institutional instability as well as elements that enhance the probability of secession. On the other hand, Belgium continues to exist as a federal system, based upon linguistic bipolarity. This linguistic bipolarity dominates Belgian politics and has shaped the design of Belgium's institutions as well as the Constitution's fundamental organising principles: concepts of federalism, democracy, separation of powers, constitutionalism and the rule of law. In this book, the institutional structure and the principles governing the Belgian constitutional system are explained in the light of its historical, demographic and political context. Linguistic bipolarity and its historical evolution explain the establishment of the Belgian State structure as a dual federalism, with exclusive powers, instruments for consensus making and obstruction, and elements of confederal decision making. It also explains the evolution in the concept of principles of democracy and the rule of law. Besides describing the devolutionary process, the book also incorporates two other elements that have shaped the Belgian constitutional landscape: fundamental rights and Europeanisation. **Loss of Homes and Evictions across Europe A Comparative Legal and Policy Examination Edward Elgar Publishing** The loss of a home can lead to major violations of a person's dignity and human rights. Yet, evictions take place everyday in all countries across Europe. This book provides a comparative assessment of human rights, administrative, procedural and public policy norms, in the context of eviction, across a number of European jurisdictions. Through this comparison the book exposes the emergence of consistent, Europe-wide standards and norms. **Managing Information Risks Threats, Vulnerabilities, and Responses Rowman & Littlefield Publishers** Written by one of the foremost records and information management leaders in the world, this book provides a clear explanation and analysis of the fundamental principles associated with information risk, which is broadly defined as a combination of threats, vulnerabilities, and consequences related to use of an organization's information assets.--Patricia C. Routledge This book addresses the phenomenon of mergers that may result in non-coordinated effects in oligopolistic markets. Such cases are sometimes referred to as "non-collusive oligopolies", or "gap cases" and there is a concern that they might not be covered by the substantive test that some Member States use for merger assessment. Ioannis Kokkoris examines the argument that the European Community Merger Regulation (Regulation 4064/89) did not capture gap cases and considers the extent to which the revised substantive test in Regulation 139/2004 deals with the problem of non-collusive oligopolies. The author identifies actual examples of mergers that gave rise to a problem of non-coordinated effects in oligopolistic markets, both in the EU and in other jurisdictions, and analyses the way in which these cases were dealt with in practice. The book considers legal systems such as United Kingdom, United States, Australia and New Zealand. The book investigates whether there is any difference in the assessment of non-collusive oligopolies between the various substantive tests which have been adopted for merger assessment in various jurisdictions. The book also looks at the various methodological tools available to assist competition authorities and the professional advisers of merging firms to identify whether a particular merger might give rise to anticompetitive effects and explores the type of market structure in which a merger is likely to lead to non-coordinated effects in oligopolistic markets. Nigeria Since Independence Forever Fragile? Springer This book analyses the political and ethnical tensions that characterize Nigeria, which derive both from colonial and contemporary conflicts. It points out three major factors why Nigeria has not yet collapsed like many other African states: ethnic power sharing amongst the political elite, the military with its national outlook, and oil wealth. Champions Way: Football, Florida, and the Lost Soul of College Sports W. W. Norton & Company A searing exposé of how the multibillion dollar college sports empire fails universities, students, and athletes. With little public debate or introspection, our institutions of higher learning have become hostages to the rapacious, smash-mouth entertainment conglomerate known, quaintly, as intercollegiate athletics. In Champions Way, New York Times investigative reporter Mike McIntire chronicles the rise of this growing scandal through the experience of the Florida State Seminoles, one of the most successful teams in NCAA history. A finalist for the Pulitzer Prize for his Times investigation of college sports, McIntire breaks new ground here, uncovering the workings of a system that enables athletes to violate academic standards and avoid criminal prosecution for actions ranging from shoplifting to drunk driving. At the heart of Champions Way is the untold story of a whistle-blower, Christie Suggs, and her wrenching struggle to hold a corrupt system to account. Together with shocking new details about prominent sports figures, including NFL quarterback Jameis Winston and former FSU coach Bobby Bowden, Champions Way shines a light on the ethical, moral, and legal compromises inherent in the making of a championship sports program. Beyond the story of Florida State, McIntire takes readers on a journey through the history of college football, from its origins as a roughneck pastime coached by nineteenth-century professors to its current incarnation as a gold-plated behemoth that long ago outgrew its scholastic environs. Illuminated in rich and disturbing detail is the hidden financial ecosystem that nourishes hundred-million-dollar teams, from the hustlers who recruit players for schools and the athletic departments controlled by rich boosters to the universities whose academic mission and moral authority have been undermined. More than pointing out flaws, McIntire examines their causes and offers hope to those who would reform college sports. The Missing American Jury Restoring the Fundamental Constitutional Role of the Criminal, Civil, and Grand Juries Cambridge University Press Criminal, civil, and grand juries have disappeared from the American legal system. Over time, despite their significant presence in the Constitution, juries have been robbed of their power by the federal government and the states. For example, leveraging harsher criminal penalties, executive officials have forced criminal defendants into plea bargains, eliminating juries. Capping money awards, legislatures have stripped juries of their power to fix damages. Ordering summary judgment, judges dispose of civil cases without sending them to a jury. This is not what the founders intended. Examining the Constitution's text and historical sources, the book explores how the jury's authority has been taken and how it can be restored to its rightful, co-equal position as a 'branch' of government. Discussing the value of juries beyond the Constitution's requirements, the book also discusses the significance of juries world-wide and argues jury decision-making should be preferred over determinations by other governmental bodies. Comparative Climate Change Litigation: Beyond the Usual Suspects Springer Nature This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders, including civil society, and the notion that climate change is at a tipping point with urgent measures needed in the next decade. Against this background, civil society is turning its attention to the courts as a means to directly influence climate action, partly because of the global scepticism towards the progress of global climate action, despite the ongoing implementation of the Paris Agreement. Focusing on the individual, broadly representing civil society, the book offers fresh perspectives on climate change litigation. While most of the literature on climate change litigation examines the same specific jurisdictions, mostly common law countries (US and Australia in particular), this book also considers specific countries in Asia, Africa and Latin America with little or no climate change litigation. It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action. Unlike other literature on the subject, this book analyses climate change litigation using a scenario-based methodology. Combining rigorous academic analysis with a practical policy-oriented focus, the book provides valuable insights for a wide range of stakeholders interested in climate change litigation. It appeals to civil society organisations around the world, international organisations and law firms interested in climate change litigation. Civil Liability for Bunker Oil Pollution Damage Peter Lang This book deals with the liability conventions brought into existence by the International Maritime Organization and concentrates on the newly adopted instrument dealing with bunker oil pollution as an area of great concern for every stakeholder involved in shipping business. The work covers a wide spectrum ranging from the Convention itself to its scope of application, liable and aggrieved parties, jurisdiction, requirements of liability and admissibility of claims, defences and exoneration from liability. It addresses many areas of interest and of importance to international and national legal advisors, lawyers, law students and anyone interested in the relevant field such as shipowners, charterers, shipbrokers, ship personnel and associated contractors and sub-contractors. Rigged How the Media, Big Tech, and the Democrats Seized Our Elections Simon and Schuster FROM THE AUTHOR OF THE #1 NATIONAL BESTSELLER JUSTICE ON TRIAL Stunned by the turbulence of the 2020 election, millions of Americans are asking the forbidden question: what really happened? It was a devastating triple punch. Capping their four-year campaign to destroy the Trump presidency, the media portrayed a Democratic victory as necessary and inevitable. Big Tech, wielding unprecedented powers, vaporized dissent and erased damning reports about the Biden family's corruption. And Democratic operatives, exploiting a public health crisis, shamelessly manipulated the voting process itself. Silenced and subjected, the American people lost their faith in the system. RIGGED is the definitive account of the 2020 election. Based on Mollie Hemingway's exclusive interviews with campaign officials, reporters, Supreme Court justices, and President Trump himself, it exposes the fraud and cynicism behind the Democrats' historic power-grab. Rewriting history is a specialty of the radical left, now in control of America's political and cultural heights. But they will have to contend with the determination, insight, and eloquence of Mollie Hemingway. RIGGED is a reminder for weary patriots that truth is still the most powerful weapon. The stakes for our democracy have never been higher. Comparing Tort and Crime Learning from across and within Legal Systems Cambridge University Press The fields of tort and crime have much in common in practice, particularly in how they both try to respond to wrongs and regulate future behaviour. Despite this commonality in fact, fascinating difficulties have hitherto not been resolved about how legal systems co-ordinate (or leave wild) the border between tort and crime. What is the purpose of tort law and criminal law, and how do you tell the difference between them? Do criminal lawyers and civil lawyers reason and argue in the same way? Are the rules on capacity, consent, fault, causation, secondary liability or defences the same in tort as in crime? How do the rules of procedure operate for each area? Are there points of overlap? When, how and why do tort and crime interact? This volume systematically answers these and other questions for eight legal systems: England, France, Germany, Sweden, Spain, Scotland, the Netherlands and Australia. Women Soldiers and Citizenship in Israel Gendered Encounters with the State Routledge Women's military service in Israel presents a compelling case study to explore the meaning of gendered citizenship. Lomsky-Feder and Sasson-Levy compellingly argue that women's mandatory military service during an active ongoing violent conflict, occurring at a formative age, becomes an initiation process into gendered citizenship, where the women learn their marginal place in relation to the state. By analyzing the life stories and testimonies of young women from varied social backgrounds, the authors ask: How do young women soldiers manage their expectations vis-à-vis the hyper-masculine military institution? How do women experience their gendered citizenship as daily embodied and emotional practices in different military roles? How do women soldiers understand and cope with daily sexual harassment? And finally, how do women cope with the gendered silencing mechanisms of the violence of war and occupation, and what can women soldiers know about this violence when they choose to speak out? The book offers a new conceptualization of citizenship as gendered encounters with the state. These encounters can be analyzed through three interrelated concepts: Multi-level contracts; Contrasting gendered experiences; Dis/acknowledging the military's (external and internal) violence. Applying these three thought-provoking concepts, the authors depict the intricate, non-deterministic relationships between citizenship, military service and multiple gendered experiences.
