### **STUDY GUIDE & DVD TRAINING SYSTEM**

---

*Elsevier MCSE Exam 70-296 Study Guide & DVD Training System: Planning, Implementing and Maintaining a Windows Server 2003 Environment for an MCSE Certified on Windows 2000 is a one-of-a-kind integration of text, DVD-quality instructor led training, and Web-based exam simulation and remediation. This system gives you 100% coverage of the official Microsoft 70-296 exam objectives plus test preparation software for the edge you need to pass the exam on your first try. In June, 2003 Microsoft will launch beta exams*

for the Windows Server 2003 certification line. Exams will likely go live the following August and September. This launch is a comprehensive revamping of the MCSE (Microsoft Certified System Engineer) track with all new core exams and all new electives. In addition, the MCSA (Microsoft Certified System Administrator) certification will expand its program to include an additional upgrade exam for MCSAs wanting to become MCSEs. The launch of this new certification track means that all current MCSEs, representing an installed base of approximately 200,000 (source: MCP Magazine) will need to recertify under Windows Server 2003. In addition, any MCP looking to become an MCSE--estimates are about 1.2 million (source: MCP Magazine)--will also have to continue their certifications under the new program. Many industry experts expect the Windows 2003 certification, and product line as well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. \* DVD Provides a "Virtual Classroom": Get the benefits of instructor led training at a fraction of the cost and hassle. \* Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-296 objectives, it is covered here. \* Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams.

## **NETHERLANDS YEARBOOK OF INTERNATIONAL LAW 2017**

---

---

### **SHIFTING FORMS AND LEVELS OF COOPERATION IN INTERNATIONAL ECONOMIC LAW: STRUCTURAL DEVELOPMENTS IN TRADE, INVESTMENT AND FINANCIAL REGULATION**

---

*Springer This Volume of the Netherlands Yearbook of International Law explores emerging trends and key developments in international economic law. It examines shifts in the levels of cooperation (from multilateral to plurilateral, regional or bilateral—or vice versa), and shifts in the forms of cooperation (new types of actors and instruments). These trends are analysed both from a conceptual and a practical perspective, with contributions addressing drivers for change, historical perspectives, future developments, and evolutions in specific policy fields. While a focus on international economic law may certainly not tell the whole story in relation to shifts in levels and forms of international cooperation, it does allow for a more detailed analysis of some of the important trends we currently witness. The Netherlands Yearbook of International Law was first published in 1970. It offers a forum for the publication of scholarly articles in a varying thematic area of public international law.*

## **PRIVATISATION AND COMMERCIALISATION IN PUBLIC EDUCATION**

---

---

### **HOW THE PUBLIC NATURE OF SCHOOLING IS CHANGING**

---

*Routledge Privatisation and Commercialisation in Public Education asks how publicness is being redefined through the restructuring of nominally public school systems. Over the past few decades, governments have engineered a wave of reforms in their public systems opening them to privatisation and commercialisation. In public education systems competition, choice and autonomy have become entrenched vectors of these reforms. This edited collection carefully examines the difference between privatisation and commercialisation and traces the varying effects privatised and commercialised policy reforms have had in different educational contexts. Many countries have approached the thorny issues of school choice and school autonomy in different ways, and this book investigates the impact of these agendas across the USA, UK, Australia, New Zealand, parts of Europe, sub-Saharan Africa and India. This book brings together contemporary, international perspectives from high-profile policy academics on both privatisation and commercialisation in public education systems under the provocation of how the 'public' nature of schooling is changing. This is essential reading for those interested in the idea that current education policy reforms are reshaping what might be considered core educational practices in public schooling.*

## **SUCCESSFULLY ACHIEVING STRATEGY THROUGH EFFECTIVE PORTFOLIO MANAGEMENT**

---

*Business Expert Press Organizations are successful based on their ability to achieve strategic goals. Why didn't you achieve your strategy? Too many organizations waste time and money on developing strategy but don't achieve their goals. What goes wrong? Poor predictions about the future; internal politics that impact the projects selected; biases in the decision-making process, and other stumbling blocks. This book provides the approach that significantly increases an organization's ability to achieve its strategy. This is not a book about developing strategy. This is a book that will help you actually achieve the strategy the organization's leadership has developed. Strategy is necessary but it is a complete waste of time unless it is effectively turned into real results. If you want to see where an organization will be in 5 years, don't look at its strategic goals. Look at where management spends the money.*

## **ADOPTING A HARMONIZED REGIONAL APPROACH TO CUSTOMS REGULATION FOR THE TRIPARTITE FREE TRADE AGREEMENT**

---

*Anchor Academic Publishing The three regional economic communities (RECs) in Eastern and Southern Africa are the Common Market for Eastern and Southern Africa (COMESA), the East African Community (EAC) and the Southern African Development Community (SADC). Together, they have recognised the need to work towards regional cooperation aimed at the eventual creation of a single regional economic community or Tripartite Free Trade Agreement (TFTA). This will replace the existent RECs in Eastern and Southern Africa to which the member states of these two regions have multiple membership. The TFTA region comprises a total of 27 member states which have a combined population of 527 million people and a combined gross domestic product (GDP) of USD 624 billion. These statistics translate into a potential regional economic powerhouse for Eastern and Southern Africa. One of the major goals of the TFTA is to harmonise trade arrangements among the three RECs, improve the movement of goods and persons within the single*

*integrated region, facilitate the joint implementation of regional infrastructure projects and enhance co-operation of member states. This is a laudable initiative by the member states of the three RECs and it is recognised that regional integration is the first step towards integration into a multilateral trading system. For the TFTA member states, it is crucial that there is an awareness to move towards a review of domestic customs legislation and policy and to develop regional, supranational legislation and regulations in order to gain a stronger competitive edge in the global market. This study shies away from proposing a „quick fix“ or „instant benefit“ to the harmonisation of TFTA member states customs legislative frameworks and policies and the development of a single automated, interoperable electronic customs system. Rather, it places its focus on long-term sustainable benefits which will be realised over time. The harmonisation of TFTA member state customs legislative policies and the resultant Information and Communications Technology (ICT) reforms to the customs processes of the TFTA member states, though not immediate or short-term, will strategically position the region to conduct business in an increasingly volume driven, fast paced, electronic global economy.*
