GATEWAY B2+ WORKBOOK**MATHEMATICS FOR MACHINE LEARNING**

Cambridge University Press The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

WILD SWANS

THREE DAUGHTERS OF CHINA

Simon and Schuster The story of three generations in twentieth-century China that blends the intimacy of memoir and the panoramic sweep of eyewitness history—a bestselling classic in thirty languages with more than ten million copies sold around the world, now with a new introduction from the author. An engrossing record of Mao's impact on China, an unusual window on the female experience in the modern world, and an inspiring tale of courage and love, Jung Chang describes the extraordinary lives and experiences of her family members: her grandmother, a warlord's concubine; her mother's struggles as a young idealistic Communist; and her parents' experience as members of the Communist elite and their ordeal during the Cultural Revolution. Chang was a Red Guard briefly at the age of fourteen, then worked as a peasant, a "barefoot doctor," a steelworker, and an electrician. As the story of each generation unfolds, Chang captures in gripping, moving—and ultimately uplifting—detail the cycles of violent drama visited on her own family and millions of others caught in the whirlwind of history.

BAD BUG BOOK

FOODBORNE PATHOGENIC MICROORGANISMS AND NATURAL TOXINS HANDBOOK

Createspace Independent Publishing Platform The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause foodborne illness. Each chapter in this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and technical information about the major pathogens that cause these kinds of illnesses. A separate “consumer box” in each chapter provides non-technical information, in everyday language. The boxes describe plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The Bad Bug Book is published by the Center for Food Safety and Applied Nutrition (CFSAN) of the Food and Drug Administration (FDA), U.S. Department of Health and Human Services.

ARABIC VOICES 1

AUTHENTIC LISTENING AND READING PRACTICE IN MODERN STANDARD ARABIC AND COLLOQUIAL DIALECTS

Lingualism.com Arabic Voices is a two-part series designed to provide students of Arabic with an opportunity to hear and study authentic Arabic as it is spoken by native speakers today. Unlike the scripted materials read by voice actors used in many course books, Arabic Voices offers dozens of audio essays spoken naturally and off-the-cuff by individuals from across the Arab World. Each of the twelve native speakers has contributed audio essays in both Modern Standard Arabic and his or her native dialect, which have then been transcribed for study. In Arabic Voices 1 and 2, you will hear Egyptian Arabic, Levantine Arabic (Lebanese Arabic, Palestinian Arabic, Jordanian Arabic), Yemeni Arabic, Tunisian Arabic, Moroccan Arabic, as well as Modern Standard Arabic. MP3s are available for free download at www.lingualism.com. The segments in Modern Standard Arabic provide valuable insight into native speakers' range of style and proficiency in the language. The segments in colloquial Arabic dialects offer a fascinating look into the many varieties of Arabic, and how similar and different they really are from one another. Fine-tuning your listening to the idiosyncrasies of each dialect will truly help you better understand spoken Arabic. Each “segment” (audio essay chapter) contains: 1) exercises to sharpen your listening skills and increase how much you can understand, whatever your level 2) in-chapter answers to the exercises (no having to flip back and forth to the back of the book) 3) a vowelized transcript of the audio with side-by-side English translations 4) cultural and linguistic notes 5) web links to articles and videos related to the segment 6) select segments feature grammar focuses with additional exercises.

MASTERING ARABIC

This hugely successful beginner's course offers modern, engaging Modern Standard Arabic lessons through lively dialogues, varied exercises and fascinating cultural insights. This is the only user-friendly, accessible beginner level course on the market accompanied by audio CDs with native Arabic speakers. It suits an incredibly diverse learner base - self-study, through community college and school, to university primer/first year course. Students can continue their learning with a workbook "Mastering Arabic 1 Activity Book" and the new second level course "Mastering Arabic 2 with 2 Audio CDs".
