Global Turning Points

Understanding the Challenges for Business in the 21st Century

Cambridge University Press **The twenty-first century is replete with uncertainty and complexity: game-changing events and trends are transforming the world beyond recognition. For the first time in human history more people live in cities than in the countryside and greater numbers suffer from obesity than from hunger. Emerging economies now represent half of the global economy and during the next few decades India will be the biggest country in terms of population, China the largest in output and the United States the richest among the major economies on a per capita income basis. Food and water shortages will likely become humankind's most important challenge. In this accessible introduction, Mauro Guillén and Emilio Ontiveros deploy the tools of economics, sociology and political science to provide an analytical perspective on both the problems and opportunities facing business in the modern world.**

Global Turning Points

Understanding the Challenges for Business in the 21st Century

Cambridge University Press **Offers an accessible, yet sophisticated analysis of major global turning points and future scenarios with an emphasis on actionable issues.**

Global Turning Points

Understanding the Challenges for Business in the 21st Century

"The twenty-first century is replete with uncertainty and complexity: game-changing events and trends are transforming the world beyond recognition. For the first time in human history more people live in cities than in the countryside and greater numbers suffer from obesity than from hunger. Emerging economies now represent half of the global economy and during the next few decades India will be the biggest country in terms of population, China the largest in output and the United States the richest among the major economies on a per capita income basis. Winning at the Turning Point

The Great Trend of China's Economic Transformation

Springer Nature This book by influential policymaker Chi Fulin lays out in issue-oriented and detailed chapters, at a time when China is at a crossroads, exactly how the government plans to deal with the social, political and economic issues the world's second-largest economy faces. From managing the decline of industry, to urbanization, to managing consumption, to social security and education, Chi offers a roadmap for the years ahead. This book will be particularly fascinating to Western scholars of China who speculate on the inner workings of the Chinese policymaking elite, with the ambition of China's central planners here laid out for the world to see.

A Turning Point for Chinese Higher

Education

Developing Hybrid Education at Tsinghua University

Routledge This book explores how a major Chinese university pivoted to hybrid online and campus education as a result of the COVID-19 pandemic, and the implications of this ‘turning point’ for Chinese higher education, and also for higher education globally. It looks at how the prolonged disruption has impacted the design of future hybrid arrangements for university teaching. Presented in four parts, the book unpacks Tsinghua’s thoughtful yet swift strides into the new era of ‘global hybrid higher education.’ The book examines influential technology, education, policy, and global forces. It studies transformative leadership which guided change and construction of extensive and enabling technological infrastructure. Insights from evaluations of student and faculty experiences, interactions, and activities are accompanied by projections about emerging designs of global hybrid higher education. The research describes future steps for Tsinghua and global universities. Articulating Tsinghua’s standing in China and the world, and its contribution to technology and education, this unique research will be of profound interest to students and academics in higher education and education policy and practice, as well as policy experts and higher education leaders around the world.

Great Turning Point

New Leaf Publishing Group Many people in the Church today have the idea that “young-earth” creationism is a fairly recent invention, popularized by fundamentalist Christians in the mid-20th century. Is this view correct? In fact, scholar Terry Mortenson has done fascinating original research on this subject in England, and documents that several leading, pre-Darwin scholars and scientists, known as “scriptural geologists” did not believe in long ages for the earth. Mortenson sheds light on the following: Before Darwin, what did the Church believe about the age of the earth? Why did it believe this way? What was the controversy that rocked the Church in 19th-century England? Who were the “scriptural geologists”? What influences did the Church contend with even before Darwin’s book? What is the stance of the Church today? This book is a thoroughly researched work of reference for every library - certainly every creationist library. Terry Mortenson spent much time and work on this project in both the United States and Great Britain. The history of the Church and evolution is fascinating, and it is interesting to see not only the tremendous influence

that evolution has had on the Church, but on society as well.

The Turning Point in China's Economic Development

ANU E Press Focuses on China's long-term pattern of growth and employment, demographic shifts, and rural-urban migration, its agricultural trade and local elections, China's banking sector reform and its fiscal sustainability, its environmental concerns, and much more.

Turning Point

The Story of a Law Teacher : Memoirs of Padmashree Prof. N.R. Madhava Menon

Universal Law Publishing

Addressing Global Environmental Challenges from a Peace Ecology Perspective

Springer Addressing global environmental challenges from a peace ecology perspective, the present book offers peer-reviewed texts that build on the expanding field of peace ecology and applies this concept to global environmental challenges in the Anthropocene. Hans Günter Brauch (Germany) offers a typology of time and turning points in the 20th century; Juliet Bennett (Australia) discusses the global ecological crisis resulting from a “tyranny of small decisions”; Katharina Bitzker (Canada) debates “the emotional dimensions of ecological peacebuilding” through love of nature; Henri Myrntinen (UK) analyses “preliminary findings on gender, peacebuilding and climate change in Honduras” while Úrsula Oswald Spring (Mexico) offers a critical review of the policy and scientific nexus debate on “the water, energy, food and biodiversity nexus”, reflecting on security in Mexico. In closing, Brauch discusses whether strategies of sustainability transition may enhance the prospects for achieving sustainable peace in the Anthropocene.

Turning Points in Baptist History

A Festschrift in Honor of Harry Leon McBeth

Mercer University Press **Arranged in chronological order so that the Baptist saga can be understood as a continuous narrative, the book has the added advantage of permitting the reader to cherry-pick chapters that are of particular interest. The Baptist struggles for freedom of conscience, for a believer's church, for including both genders and all races, for fulfilling the Great Commission, and for the separation of church and state--these are only a few of the denominational-shaping turning points one discovers in this book.**

Turning Points in the History of American Evangelicalism

Wm. B. Eerdmans Publishing **Lucid, authoritative overview of a major movement in American history The history of American evangelicalism is perhaps best understood by examining its turning points--those moments when it took on a new scope, challenge, or influence. The Great Awakening, the rise of fundamentalism and Pentecostalism, the emergence of Billy Graham--all these developments and many more have given shape to one of the most dynamic movements in American religious history. Taken together, these turning points serve as a clear and helpful roadmap for understanding how evangelicalism has become what it is today. Each chapter in this book has been written by one of the world's top experts in American religious history, and together they form a single narrative of evangelicalism's remarkable development. Here is an engaging, balanced, coherent history of American evangelicalism from its origins as a small movement to its status as a central player in the American religious story. Contributors & Topics Harry S. Stout on the Great Awakening Catherine A. Brekus on the evangelical encounter with the Enlightenment Jon Butler on disestablishment Richard Carwardine on antebellum reform Marguerite Van Die on the rise of the domestic ideal Luke E. Harlow on the Civil War and conservative American evangelicalism George M. Marsden on the rise of fundamentalism Edith Blumhofer on urban Pentecostalism Dennis C. Dickerson on the Great Migration Mark Hutchinson on the global turn in American evangelicalism Grant Wacker on Billy Graham's 1949 Los Angeles revival Darren Dochuk on American evangelicalism's Latin turn**

Turning Point

Hay House, Inc **We solve our problems based upon the way we think of ourselves and the world. From peak energy and peak debt to failing economies and the realities of climate change, everyday life is showing us where we've outgrown the thinking of the past. It's also showing us where big changes in the world mean big changes in our lives. Through dramatic shifts in our jobs, our relationship to money, our health, and even our homes, it's clear that our lives are changing in ways we've never seen, to a degree that we're not prepared for, and at speeds that we've never experienced. It's also clear that the thinking of the past is no longer enough to meet our needs today. A new, healthy, and sustainable world is emerging, and our ability to accept what it offers begins with our willingness to:**

- **Honestly acknowledge the facts of what we're up against.**
- **Embrace the new discoveries that reveal the role of cooperation in nature and human communities.**
- **Create resilience in our lives, families, and communities based upon five proven and sustainable principles.**
- **Through easy-to-understand science and the wisdom traditions of the past, The Turning Point identifies the extremes in the world that are reshaping our lives, the keys to thrive in the midst of the transformation, and the strategies to get us there.**

Turning Points

Global Agenda 2012

Asia's Turning Point

An Introduction to Asia's Dynamic Economies at the Dawn of the New Century

John Wiley & Sons **Asia was probably the biggest economic sensation of the post-war decades. The breathtaking success of Japan was followed by a remarkable rise of "four tigers", then ASEAN founder states and then China. The Asian miracle became a commonly accepted definition of this success. In the late 1970s and especially 80s it became clear that the balance of power in the world had changed. Politicians, businessmen, scholars began to talk about "the new Asia Pacific age" and Asian economic model, different from and, maybe, even superior to Western capitalism.**

However, in 1997-98 the Asian economic crisis came and made the region a sick man. Six years before that Japan, the regional powerhouse entered more than a decade-long period of stagnation. The miracle was over. However, the crisis was overcome within a surprisingly short period of time. Naturally, the question arises: What now? What is going on in the region after the miracle and after the crisis? What is today's face of Asian capitalism and how should we view its performance? Readers interested in regional developments will find a lot of literature about miracle decades and crisis years. However, few analysts have addressed the challenging questions addressed in this book. The authors vividly show that Asian capitalism is undergoing a radical structural transformation. These changes are directly affecting its key institutions: governments, companies, labor relations, etc. As a result Asian economic systems are becoming much closer to the Western-style, especially Anglo-Saxon capitalism, though the region retains some important specific features, especially regarding business culture. This book is a must for business people worldwide, for all those who study the region in colleges and business schools, for people engaged in various international activities and, finally, for all those who want to learn more about our world at the dawn of the new century.

South China Sea Disputes, The: Flashpoints, Turning Points And Trajectories

World Scientific **The South China Sea Disputes: Flashpoints, Turning Points and Trajectories** focuses on the currently much-debated theme of the South China Sea disputes – one of the hottest international disputes of the 21st century which can easily turn from a brewing flashpoint into a regional conflict with global repercussions. Through a compilation of commentaries published by the S. Rajaratnam School of International Studies from 2012 to much of 2016, the book attempts to reflect the evolution of the disputes in recent years through what can be seen as turning points and trajectories in the diplomatic tensions. The book is divided into four sections, taking off from a key diplomatic or related incident/development which can be seen as a turning point for each, with the concluding section looking at what lies ahead for Southeast Asia and the larger Asia-Pacific region, amidst the uncertainties triggered by the South China Sea imbroglio. Among the contributors: Arif Havas Oegroseno, BA Hamzah, Barry Desker, Bill Hayton, David Rosenberg, Donald K. Emmerson, Ellen Frost, Hasjim Djalal, Ian Townsend-Gault, Joseph CY Liow, Kwa Chong Guan, Li Mingjiang, Li Jian Wei, Li Dexia, Marvin Ott, Mushahid Ali, Muthiah Alagappa, Nguyen Hung Son, Nguyen Thi Lan Anh, Phoak

Kung, Ralf Emmers, Rene L. Pattiradjawane, Raul (Pete) Pedrozo, Richard Javad Heydarian, Robert C. Beckman, Shashi Jayakumar, Victor Savage, Yang Razali Kassim, Zha Daojiong.

The Turning Point in Private Law

Edward Elgar Publishing **Can private law assume an ecological meaning? Can property and contract defend nature? Is tort law an adequate tool for paying environmental damages to future generations? This book explores potential resolutions to these questions, analyzing the evolution of legal thinking in relation to the topics of legal personality, property, contract and tort. In this forward thinking book, Mattei and Quarta suggest a list of basic principles upon which a new, ecological legal system could be based. Taking private law to represent an ally in the defence of our future, they offer a clear characterization of the fundamental legal institutions of common law and civil law, considering the challenges of the Anthropogenic era, technological tools of the Internet era, and the global rise of the commons. Summarizing the fundamental institutions of private law: property rights, legal personality, contract, and tort, the authors reveal the limits of these legal institutions in relation to historical international evolution and their regulation in the contexts of catastrophic ecological issues and technological developments. Engaging and thoughtful, this book will be interesting reading for legal scholars and academics of private law and, in particular, those wishing to understand the role of law when facing technological and ecological challenges.**

Beyond the Coal Rush

A Turning Point for Global Energy and Climate Policy?

Cambridge University Press **Climate change makes fossil fuels unburnable, yet global coal production has almost doubled over the last 20 years. This book explores how the world can stop mining coal - the most prolific source of greenhouse gas emissions. It documents efforts at halting coal production, focusing specifically on how campaigners are trying to stop coal mining in India, Germany, and Australia. Through in-depth comparative ethnography, it shows how local people are fighting to save their homes, livelihoods, and environments, creating new constituencies and alliances for the transition from fossil fuels. The book relates these struggles to conflicts between**

global climate policy and the national coal-industrial complex. With coal's meaning transformed from an important asset to a threat, and the coal industry declining, it charts reasons for continuing coal dependence, and how this can be overcome. It will provide a source of inspiration for energy transition for researchers in environment, sustainability, and politics, as well as policymakers.

Lewisian Turning Point in the Chinese Economy

Comparison with East Asian Countries

Springer This volume is concerned with labor market developments in China from a comparative perspective on selected East and South Asian countries. It closely examines the changing structure of China's labor market in the context of the Lewisian turning point in economic development.

Exporting Global Jihad

Volume Two: Critical Perspectives from Asia and North America

Bloomsbury Publishing This timely 2 volume edited collection looks at the extent and nature of global jihad, focusing on the often-exoticised hinterlands of jihad beyond the traditionally viewed Middle Eastern 'centre'. As ISIS loses its footing in Syria and Iraq and al-Qaeda regroups, this comprehensive account will be a key work in the on-going battle to better understand the dynamics of jihad's global reality. The two volumes critically examine the various claims of connections between jihadist terrorism in the 'periphery', remote Islamist insurgencies of the 'periphery' and the global jihad. Each volume draws on experts in each of the geographies in question.

Turning Point

Policymaking in the Era of Artificial Intelligence

Brookings Institution Press **Artificial Intelligence is here, today. How can society make the best use of it? Until recently, “artificial intelligence” sounded like something out of science fiction. But the technology of artificial intelligence, AI, is becoming increasingly common, from self-driving cars to e-commerce algorithms that seem to know what you want to buy before you do. Throughout the economy and many aspects of daily life, artificial intelligence has become the transformative technology of our time. Despite its current and potential benefits, AI is little understood by the larger public and widely feared. The rapid growth of artificial intelligence has given rise to concerns that hidden technology will create a dystopian world of increased income inequality, a total lack of privacy, and perhaps a broad threat to humanity itself. In their compelling and readable book, two experts at Brookings discuss both the opportunities and risks posed by artificial intelligence—and how near-term policy decisions could determine whether the technology leads to utopia or dystopia. Drawing on in-depth studies of major uses of AI, the authors detail how the technology actually works. They outline a policy and governance blueprint for gaining the benefits of artificial intelligence while minimizing its potential downsides. The book offers major recommendations for actions that governments, businesses, and individuals can take to promote trustworthy and responsible artificial intelligence. Their recommendations include: creation of ethical principles, strengthening government oversight, defining corporate culpability, establishment of advisory boards at federal agencies, using third-party audits to reduce biases inherent in algorithms, tightening personal privacy requirements, using insurance to mitigate exposure to AI risks, broadening decision-making about AI uses and procedures, penalizing malicious uses of new technologies, and taking proactive steps to address how artificial intelligence affects the workforce. Turning Point is essential reading for anyone concerned about how artificial intelligence works and what can be done to ensure its benefits outweigh its harm.**

Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade

Bloomsbury Publishing **The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by**

the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Global Turning Points

The Challenges for Business and Society in the 21st Century

Cambridge University Press The second edition of this popular book offers an accessible yet sophisticated analysis of the game-changing events and trends that are transforming the world beyond recognition. For the first time in human history, more people live in cities than in the countryside, and greater numbers suffer from obesity than from hunger. During the next few decades, India will become the biggest country in terms of population, China the largest in output, and the United States the richest among the major economies on a per capita income basis. Food and water shortages will likely become humankind's most important challenges. With four new chapters, on the rise of the global middle class, the transformative power of technology, institutions and the entrepreneurial spirit, and the trials and tribulations of the financial system, this book provides a thorough introduction to the challenges facing business and society in the twenty-first century.

An End to the Growth Paradigm

Earthscan First Published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Contesting Islam, Constructing Race and Sexuality

The Inordinate Desire of the West

Bloomsbury Publishing **The current political standoffs of the 'War on Terror' illustrate that the interaction within and between the so-called Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. Contesting Islam, Constructing Race and Sexuality unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.**

A Turning Point in Teacher Education

A Time for Resistance, Reflection, and Change

Rowman & Littlefield **This book suggests that traditional teacher education programs must deeply reflect on solidifying the place, power, and necessity of its purpose.**

The turning point: annual report

2009

CIFOR

The Asian Crisis Turns Global

Institute of Southeast Asian Studies In August 1998, the Asian currency crisis that had started in mid-1997 metastasized into a global financial crisis with the devaluation of the rouble and a declaration of a Russian Government default on its internal debt. Is this the first wave of such crises the world will see in the future? One common feature among the countries that have fallen victim to the crisis is that they were all "darlings of international finance". Before the financial crisis of 1997, international investors poured money into the stock markets of the East Asian economies, Latin America, Russia, and Eastern Europe. That the crisis afflicted the very countries that depended most heavily on the international economy for their economic growth suggests the importance of the international dimension -- this is the focus of this book. Even though, from the outside, the currency collapses looked similar, the analysis also identifies the important differences in domestic causes as it spread through the different economies.

Turning Point

A New Comprehensive Strategy for Countering Violent Extremism

Rowman & Littlefield The CSIS Commission on Countering Violent Extremism, co-chaired by Tony Blair and Leon Panetta, was formed to develop a comprehensive and actionable blueprint to combat the growing appeal of violent extremism in the United States and abroad. This report is the culmination of the Commission's work.

100 Turning Points in Military History

Rowman & Littlefield The typical military history presents a chronicle of battles and wars and the commanders and troops who fought them. This book takes a different approach. It presents battles and wars and people aplenty, but they are not its ultimate subjects. This book is about the turning points that not only make military history dynamic but crucial to the story of humanity and civilization. This book is about the decisions,

acts, innovations, errors, ideas, successes, and failures that shaped the evolution of military art and science—strategy, tactics, and technology—and, in doing so, shaped the course of world history. Here are the 100 points—from the birth of warfare in the Battle of Megiddo, 1457 BC, to the ongoing evolution of military history on its newest battlefield, cyberspace—at which the path of the warrior decisively turned on its long journey to where we find ourselves today.

Linear Turning Point Theory

Springer Science & Business Media My book "Asymptotic Expansions for Ordinary Differential Equations" published in 1965 is out of print. In the almost 20 years since then, the subject has grown so much in breadth and in depth that an account of the present state of knowledge of all the topics discussed there could not be fitted into one volume without resorting to an excessively terse style of writing. Instead of undertaking such a task, I have concentrated, in this exposition, on the aspects of the asymptotic theory with which I have been particularly concerned during those 20 years, which is the nature and structure of turning points. As in Chapter VIII of my previous book, only linear analytic differential equations are considered, but the inclusion of important new ideas and results, as well as the development of the necessary background material have made this an exposition of book length. The formal theory of linear analytic differential equations without a parameter near singularities with respect to the independent variable has, in recent years, been greatly deepened by bringing to it methods of modern algebra and topology. It is very probable that many of these ideas could also be applied to the problems concerning singularities with respect to a parameter, and I hope that this will be done in the near future. It is less likely, however, that the analytic, as opposed to the formal, aspects of turning point theory will greatly benefit from such an algebraization.

Debating the Lewis Turning Point in China

Routledge **HUANG Yiping** is Professor of Economics at the China Center for Economic Research, National School of Development, Peking University, China. He is also an adjunct professor at the Australian National University and a member of the China Finance 40 Forum. His current research focuses on macroeconomic policy, international finance and rural development. **CAI Fang** is Director, Professor and Fellow at the Institute of Population and Labor Economics, Chinese Academy of Social Sciences, China. He serves as Vice Chairman of the China Population Association. His current research focuses on China's labor migration, population and development, economic reform, income distribution and poverty.

Turning Point 9.11

Air Force Reserve in the 21st Century, 2001-2011

Turning Points in Australian History

UNSW Press **This exciting and stimulating book looks back at turning points and crucial moments in Australian history. Rather than arguing that there have been forks on a pre-determined road, the book challenges us to think about other paths or better paths that might have led to different outcomes.**

The Fourth Industrial Revolution

Currency **Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement**

Turning Points in the Expansion of Christianity

From Pentecost to the Present

Baker Academic **This readable survey on the history of missions tells the story of pivotal turning points in the expansion of Christianity, enabling readers to grasp the big picture of missional trends and critical developments. Alice Ott examines twelve key points in the growth of Christianity across the globe from the Jerusalem Council to Lausanne '74, an approach that draws on her many years of classroom teaching. Each chapter begins with a close-up view of a particularly compelling and paradigmatic episode in Christian history before panning out for a broader historical outlook. The book draws deeply on primary sources and covers some topics not addressed in similar volumes, such as the role of British abolitionism on mission to Africa and the relationship between imperialism and mission. It demonstrates that the expansion of Christianity was not just a Western-driven phenomenon; rather, the gospel spread worldwide through the efforts of both Western and non-Western missionaries and through the crucial ministry of indigenous lay Christians, evangelists, and preachers. This fascinating account of worldwide Christianity is suitable not only for the classroom but also for churches, workshops, and other**

seminars.

IEEE International Conference on Data Mining Proceedings

Global Boundaries

World Boundaries Volume 1

Routledge First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Geometry of Single-point Turning Tools and Drills

Fundamentals and Practical Applications

Springer Science & Business Media **Geometry of Single-Point Turning Tools and Drills** outlines clear objectives of cutting tool geometry selection and optimization, using multiple examples to provide a thorough explanation. It addresses several urgent problems that many present-day tool manufacturers, tool application specialists, and tool users, are facing. It is both a practical guide, offering useful, practical suggestions for the solution of common problems, and a useful reference on the most important aspects of cutting tool design, application, and troubleshooting practices. Covering emerging trends in cutting tool design, cutting tool geometry, machining regimes, and optimization of machining operations, **Geometry of Single-Point Turning Tools and Drills** is an indispensable source of information for tool designers, manufacturing engineers, research workers, and students.

Change in Global Environmental

Politics

Cambridge University Press **In a period of planetary crisis, this book shows how large-scale change occurs in global environmental politics.**
