## Living the 1.5 Degree Lifestyle Why Individual Climate Action Matters More than Ever

New Society Publishers **Stop thinking about efficiency and start thinking about sufficiency Living the 1.5 Degree Lifestyle reveals the carbon cost of everything we do, identifying where we can make big reductions, while not sweating the small stuff. The international scientific consensus is that we have less than a decade to drastically slash our collective carbon emissions to keep global heating to 1.5 degrees and avert catastrophe. This means that many of us have to cut our individual carbon footprints by over 80% to 2.5 tonnes per person per year by 2030. But where to start? Drawing on Lloyd Alter's journey to track his daily carbon emissions and live the 1.5 degree lifestyle, coverage includes: What it looks like to live a rich and truly green life From take-out food, to bikes and cars, to your internet usage - finding the big wins, ignoring the trivial, and spotting marketing ploys The invisible embodied carbon baked into everything we own and why electric cars aren't the answer How to start thinking about sufficiency rather than efficiency The roles of individuals versus governments and corporations. Grounded in meticulous research and yet accessible to all, Living the 1.5 Degree Lifestyle is a journey toward a life of quality over**

quantity, and sufficiency over efficiency, as we race to save our only home from catastrophic heating.

## Declining Grammar and Other Essays on the English Vocabulary

National Council of Teachers **This book contains 25 essays about English words, and how they are defined, valued, and discussed. The book is divided into four sections. The first section, "Language Lore," examines some of the myths and misconceptions that affect attitudes toward language--and towards English in particular. The second section, "Language Usage," examines some specific questions of meaning and usage. Section 3, "Language Trends," examines some controversial trends in English vocabulary, and some developments too new to have received comment before. The fourth section, "Language Politics," treats several aspects of linguistic politics, from special attempts to deal with the ethnic, religious, or sex-specific elements of vocabulary to the broader issues of language both as a reflection of the public consciousness and the U.S. Constitution and as a refuge for the most private forms of expression. ## In the Graveyard of Empires: America's War in Afghanistan

W. W. Norton & Company **The RAND analyst author of *The Rise of European Security Cooperation* traces the American experience in Afghanistan from the rise of the Taliban to present-day insurgency activities, drawing on new research and declassified documents to contend that a misallocation of resources to Iraq left forces in Afghanistan ineffectual. ## The Blind Assassin

Emblem Editions **"Ten days after the war ended, my sister Laura drove a car off a bridge." These words are spoken by Iris Chase Griffen, married at eighteen to a wealthy industrialist but now poor and eighty-two. Iris recalls her far from exemplary life, and the events leading up to her sister's death, gradually revealing the carefully guarded Chase family secrets. Among these is "The Blind Assassin," a novel that earned the dead Laura Chase not only notoriety but also a devoted cult following. Sexually explicit for its time, it was a pulp fantasy improvised by two unnamed lovers who meet secretly in rented rooms and seedy cafés. As this novel-within-a-novel twists and turns through love and jealousy, self-sacrifice and betrayal, so does the real narrative, as both move closer to war and catastrophe. Margaret Atwood's Booker Prize-winning sensation combines**

elements of gothic drama, romantic suspense, and science fiction fantasy in a spellbinding tale.

## The Age of Absurdity

## Why Modern Life Makes it Hard to be Happy

**The good news is that the great thinkers from history have proposed the same strategies for happiness and fulfilment. The bad news is that these turn out to be the very things most discouraged by contemporary culture. This knotty dilemma is the subject of *The Age of Absurdity* - a wry and accessible investigation into how the desirable states of wellbeing and satisfaction are constantly undermined by modern life. Michael Foley examines the elusive condition of happiness common to philosophy, spiritual teachings and contemporary psychology, then shows how these are becoming increasingly difficult to apply in a world of high expectations. The common challenges of earning a living, maintaining a relationship and ageing are becoming battlegrounds of existential angst and self-loathing in a culture that demands conspicuous consumption, high-octane partnerships and perpetual youth. In conclusion, rather than denouncing and rejecting the age, Foley presents an entertaining strategy of not just accepting but embracing today's world - finding happiness in its absurdity.**

# Introduction to Radar Using Python and MATLAB

Artech House This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

## Kasher in the Rye

# The True Tale of a White Boy from Oakland Who Became a Drug Addict, Criminal, Mental Patient, and Then Turned 16

Grand Central Publishing **Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an**

"eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland , California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

of theft, expropriation, oppression, and murder, or is America still the hope of the world? Dinesh D'Souza says these questions are no mere academic exercise. It is the Progressive view that is taught in our schools, that is preached by Hollywood, and that shapes the policies of the Obama administration. If America is a force for inequality and injustice in the world, its power deserves to be diminished; if traditional America is based on oppression and theft, then traditional America must be reformed—and the federal government can do the reforming. In *America: Imagine a World without Her* D'Souza offers a passionate and sharply reasoned defense of America, knocking down every important accusation made by Progressives against our country. Provocative in its analysis, stunning in its conclusions, Dinesh D'Souza's *America* will be the most talked about book of the year.

## Electron-Lattice Interactions in

## Semiconductors

Jenny Stanford Publishing This book presents theoretical treatments on various electronic and atomic processes in non-metallic materials from a unified point of view. It starts with the basic properties of semiconductors, treating the system as a macroscopic association of electrons and ions. In their ground state, fruitful results are derived, such as the band theory for electrons in a periodic lattice and a useful concept of "hole." The electron-lattice interaction is then introduced as a dynamical response of condensed matter when it is electronically excited. With the aid of proper configuration coordinate diagrams, various phenomena are precisely examined, including carrier scattering, polaron formation, lattice

**relaxation, Stokes shift and phonon side band in optical spectrum, intrinsic and extrinsic self-trapping, and structural changes. The book provides readers a deep understanding of the physics underlying these phenomena and excellent insight to develop their further research. Graduate students who have finished the basic study on solid-state physics and quantum mechanics and research scientists and engineers in materials science and engineering will benefit immensely from it.**
