The Cambridge History of English Literature, 1660-1780 Cambridge University Press **The Cambridge History of English Literature, 1660-1780** offers readers discussions of the entire range of literary expression from the Restoration to the end of the eighteenth century. In essays by thirty distinguished scholars, recent historical perspectives and new critical approaches and methods are brought to bear on the classic authors and texts of the period. Forgotten or neglected authors and themes as well as new and emerging genres within the expanding marketplace for printed matter during the eighteenth century receive special attention and emphasis. The volume's guiding purpose is to examine the social and historical circumstances within which literary production and imaginative writing take place in the period and to evaluate the enduring verbal complexity and cultural insights they articulate so powerfully. **Medicine in Virginia in the Eighteenth Century** Ams Press Inc **Teaching Early Modern English Literature from the Archives** Modern Language Association The availability of digital editions of early modern works brings a wealth of exciting archival and primary source materials into the classroom. But electronic archives can be overwhelming and hard to use, for teachers and students alike, and digitization can distort or omit information about texts. **Teaching Early Modern English Literature from the Archives** places traditional and electronic archives in conversation, outlines practical methods for incorporating them into the undergraduate and graduate curriculum, and addresses the theoretical issues involved in studying them. The volume discusses a range of physical and virtual archives from 1473 to 1700 that are useful in the teaching of early modern literature--both major sources and rich collections that are less known (including affordable or free options for those with limited institutional resources). Although the volume focuses on English literature and culture, essays discuss a wide range of comparative approaches involving Latin, French, Spanish, German, and early American texts and explain how to incorporate visual materials, ballads, domestic treatises, atlases, music, and historical documents into the teaching of literature. **How to Be an Intellectual** Essays on Criticism, Culture, and the University Fordham Univ Press Over the past decade, Jeffrey J. Williams has been one of the most perceptive observers of contemporary literary and cultural studies. He has also been a shrewd analyst of the state of American higher education. **How to Be an Intellectual** brings together noted and new essays and exemplifies Williams's effort to bring criticism to a wider public **How to Be an Intellectual** profiles a number of critics, drawing on a unique series of interviews that give an inside look at their work and careers. The book often looks at critical thought from surprising angles, examining, for instance, the history of modern American criticism in terms of its keywords as they morphed from sound to rigorous to smart. It also puts in plain language the political travesty of higher education policies that produce student debt, which, as Williams demonstrates, all too readily follow the model of colonial indenture, not just as a metaphor but in actual point of fact. **How to Be an Intellectual** tells a story of intellectual life since the culture wars. Shedding academic obscurity and calling for a better critical writing, it reflects on what makes the critic and intellectual--the accidents of careers, the trends in thought, the institutions that shape us, and politics. It also includes personal views of living and working with books. **England in the Restoration and Early Eighteenth Century** Essays on Culture and Society Univ of California Press **Literary Research and the British Eighteenth Century** Strategies and Sources Rowman & Littlefield The 18th century in Britain was a transition period for literature. For the literary scholar, these changes mean that different search strategies may be required to conduct research into primary and secondary source material across the era. This book addresses the unique challenges faced by the scholars of the period, and explores a multitude of primary and secondary resources. In addition, each chapter addresses the research methods and tools best used to extract relevant information and compares and evaluates sources, making this book an invaluable guide to any literary scholar and student of the British 18th century. **European Characters in French Drama of the Eighteenth Century** A Work Book by Kellom Tomlinson **Commonplace Book of an Eighteenth-century English Dancing Master : a Facsimile Edition** Original Copy **Plagiarism and Originality in Nineteenth-Century Literature** Oxford University Press A wide-ranging and elegantly written study of how nineteenth-century culture thought about, and thought with, the idea of originality. It reveals how plagiarism was not only a theoretical concern of Victorian commentators on literature, but also provided a creative resource for many important writers including Eliot, Dickens, Pater, and Wilde. **Jonathan Edwards and Transatlantic Print Culture** Oxford University Press On March 20, 1760, a fire broke out in the Cornhill district of Boston, destroying nearly 350 buildings in its wake. One of the ruined shops belonged to the eminent Boston bookseller Daniel Henchman, who had published some of Jonathan Edwards's most important works, including *The Life of Brainerd* in 1749. Less than one year after the Great Fire of 1760, Henchman died. Edwards's chief printer Samuel Kneeland and literary agent and editor, Thomas Foxcroft, had also passed away by the end of the decade, marking the end of an era. Throughout Edwards's lifetime, and in the years after his death in

1758, most of the first editions of his books had been published in Boston. But with the deaths of Henchman, Kneeland, and Foxcroft, the publications of Edwards's writings shifted to Britain, where a new crop of booksellers, printers, and editors took on the task of issuing posthumous editions and reprints of his books. In *Jonathan Edwards and Transatlantic Print Culture*, religious historian Jonathan Yeager tells the story of how Edwards's works were published, including the people who were involved in their publication and their motivations. This book explores what the printing, publishing, and editing of Jonathan Edwards's publications can tell us about religious print culture in the eighteenth century, how the way that his books were put together shaped society's understanding of him as an author, and how details such as the formats, costs, quality of paper, length, bindings, and the number of reprints and abridgements of his works affected their reception. *A Standard Dictionary of the English Language Books in Print The Grammar of Empire in Eighteenth-Century British Writing* Cambridge University Press This study, first published in 2000, examines the role of language as an instrument of empire in eighteenth-century British literature. *The Complexion of Race Categories of Difference in Eighteenth-century British Culture* University of Pennsylvania Press In the 1723 *Journal of a Voyage up the Gambia*, an English narrator describes the native translators vital to the expedition's success as being "Black as Coal." Such a description of dark skin color was not unusual for eighteenth-century Britons--but neither was the statement that followed: "here, thro' Custom, (being Christians) they account themselves White Men." *The Complexion of Race* asks how such categories would have been possible, when and how such statements came to seem illogical, and how our understanding of the eighteenth century has been distorted by the imposition of nineteenth and twentieth century notions of race on an earlier period. Wheeler traces the emergence of skin color as a predominant marker of identity in British thought and juxtaposes the Enlightenment's scientific speculation on the biology of race with accounts in travel literature, fiction, and other documents that remain grounded in different models of human variety. As a consequence of a burgeoning empire in the second half of the eighteenth century, English writers were increasingly preoccupied with differentiating the British nation from its imperial outposts by naming traits that set off the rulers from the ruled; although race was one of these traits, it was by no means the distinguishing one. In the fiction of the time, non-European characters could still be "redeemed" by baptism or conversion and the British nation could embrace its mixed-race progeny. In Wheeler's eighteenth century we see the coexistence of two systems of racialization and to detect a moment when an older order, based on the division between Christian and heathen, gives way to a new one based on the assertion of difference between black and white. *Cultural Studies and Political Economy Toward a New Integration* Lexington Books This book addresses the notorious split between the two fields of cultural studies and political economy. Drawing on the works of Harold Innis, Theodor Adorno, Raymond Williams, Richard Hoggart, E.P. Thompson, and other major theorists in the two fields, Robert E. Babe shows that political economy can be reconciled to certain aspects of cultural studies, particularly with regards to cultural materialism. Uniting the two fields has proven to be a complex undertaking though it makes practical sense, given the close interaction between political economy and cultural studies. Babe examines the evolution of cultural studies over time and its changing relationship with political economy. The intersections between the two fields center around three subjects: the cultural biases of money, the time/space dialectic, and the dialectic of information. *The Victorian Period in Twenty-First Century Children's and Adolescent Literature and Culture* Routledge Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. In turn, this collection argues, contemporary works for young people that draw on Victorian literature and culture ultimately reflect our own disruptions and upheavals, particularly as they relate to child and adolescent readers and our experiences of them. The essays therein suggest that we struggle now, as the Victorians did then, to assert a cohesive understanding of young readers, and that this lack of cohesion is a result of or a parallel to the disruptions taking place on a larger (even global) scale. *Current Issues in Late Modern English* Peter Lang Papers presented at the 3rd International Conference on Late Modern English, held at the University of Leiden in 2007. *Dress in France in the Eighteenth Century* Yale University Press Examines European dress as it evolved in 18th-century France. The text looks at French dress first from an aesthetic point of view, describing in detail fashionable and everyday clothes. It then examines the social and economic factors affecting fashion and compares styles in major European cities. *Role of Transportation in the Industrial Revolution A Comparison of England and France* McGill-Queen's Press - MQUP Addressing the question of why the Industrial Revolution occurred first in England, Rick Szostak demonstrates the crucial role played by the development of a nation-wide network of land and water transport. He rejects revisionist arguments that downplay the significance of transportation to the Industrial Revolution, underrate the amplitude and influence of the English Industrial Revolution, and deny French economic retardation. *The Victorian Era in Twenty-First Century Children's and Adolescent Literature and Culture* Routledge Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. In turn, this collection argues, contemporary works for young people that draw on Victorian literature and culture ultimately reflect our own disruptions and upheavals, particularly as they relate to child and adolescent readers and our experiences of them. The essays therein suggest that we struggle now, as the Victorians did then, to assert a cohesive understanding of young readers, and that this lack of cohesion is a result of or a parallel to the disruptions taking place on a larger (even global) scale. *Victorian Melodrama in the Twenty-First Century* Jane Eyre, Twilight, and the Mode of Excess in Popular Girl Culture Springer This book examines melodramatic impulses in Charlotte Brontë's *Jane Eyre* and Stephenie Meyer's *Twilight Saga*, as well as the series' film adaptations and fan-authored texts. Attention to conventions such as crying, victimization, and happy endings in the context of the *Twilight-Jane Eyre* relationship reveals melodrama as an empowering mode of communication for girls. Although melodrama has saturated popular culture since the nineteenth century, its expression in texts for, about, and by girls has been remarkably under theorized. By defining melodrama, however, through its Victorian lineages, Katie Kapurch recognizes melodrama's aesthetic form and rhetorical function in contemporary girl culture while also demonstrating

its legacy since the nineteenth century. Informed by feminist theories of literature and film, Kapurch shows how melodrama is worthy of serious consideration since the mode critiques limiting social constructions of postfeminist girlhood and, at the same time, enhances intimacy between girls—both characters and readers. *Taking Fame to Market On the Pre-History and Post-History of Hollywood Stardom* Springer This book explores, from a sociological perspective, the relationship between acting as symbolic work and the commercialization of popular culture. Particular attention is paid to the social conditions that gave rise to stardom in the theatre and cinema, and how shifts in the marketing of stars have impacted upon contemporary celebrity culture. *The New Encyclopaedia Britannica: Macropaedia : Knowledge in depth* This encyclopedia includes a two-volume index, a 12-volume *Micropaedia* (Ready reference), a 17-volume *Micropaedia* (Knowledge in depth), and the *Propaedia*. *People of Prowess Sport, Leisure, and Labor in Early Anglo-America* University of Illinois Press Prowess--extraordinary skill and ability, especially in sports--has always been important to Americans, even in the seventeenth and eighteenth centuries. Nancy L. Struna explores the significance, meaning, and structure of competitive matches and displays of physical prowess for both men and women in colonial culture. Engrossingly written for the general reader as well as sport and leisure historians, *People of Prowess* is a pioneering work that explores a rarely examined area of colonial history and society. *Learning English* Routledge *Learning English* focuses on young children's acquisition of spoken and written English in monolingual and bilingual contexts and explores the debates surrounding English in schools and colleges, and the often controversial nature of the English curriculum in different parts of the world. English is learned in most parts of the world, both through use in the home and community, and as a major language of education. *Learning English* represents just some of this diversity. *Hume and the Heroic Portrait Studies in Eighteenth-century Imagery* Oxford University Press, USA This is the second volume of Edgar Wind's selected papers, a companion to *The Elegance of Symbols*. Of all the scholars associated with the early development of the Warbur Institute Edgar Wind was the first to apply different theoretical principles to the study of English Art, above all in his early study of English portraiture, now a classic art history text. As the seminal essay, it gives title to the present volume, and is here translated into English for the first time. In this essay, which marked a change of direction in Wind's own development, he argues that two opposing styles of portraiture, exemplified in the art of Gainsborough and Reynolds, can be related to the different notions of humanity subscribed to by the philosophers David Hume and James Beattie. Other important studies, also reprinted here, make this volume an excellent resource to Wind's tremendous contributions to art history. *The Eighteenth-Century Hymn in England* Cambridge University Press Donald Davie is the foremost literary critics of his generation and one of its leading poets. His career has been marked by a series of challenging critical interventions. The eighteenth century is the great age of the English hymn though these powerful and popular texts have been marginalized in the formation of the conventional literary canon. These are poems which have been put to the text of experience by a wider public than that generally envisaged by literary criticism, and have been kept alive by congregations in every generation. Davie's study of the eighteenth-century hymn and metrical psalm brings to light a body of literature forgotten as poetry: work by Charles Wesley and Christopher Smart, Isaac Watts and William Cowper, together with several poets unjustly neglected, such as the mysterious John Byron. *Law Books in Print: Author Figure and Abstraction in Contemporary Painting* . Drawing on hundreds of eighteenth-century books and pamphlets, David Spadafora here provides the most extensive discussion ever written of this prevailing sense of historical optimism. *Edmond Malone, Shakespearean Scholar A Literary Biography* Cambridge University Press First modern full-length biography of scholar and member of late eighteenth-century intellectual elite. *History of Painting the History Focus* □□□ CHAPTER I. Women Writing Music in Late Eighteenth-century England Social Harmony in Literature and Performance Routledge Combining new musicology trends, formal musical analysis, and literary feminist recovery work, Leslie Ritchie examines rare poetic, didactic, fictional, and musical texts written by women in late eighteenth-century Britain. Whether crafting works consonant with societal ideals of charitable, natural, and national order, re-imagining their participation in these musical aids to social harmony, or writing about music, women contributed significantly to the formation of British cultural identity and theories of music's role in forming female subjectivities.
