1-2-3 MAGIC FOR KIDS

HELPING YOUR CHILDREN UNDERSTAND THE NEW RULES

ParentMagic, Inc. By presenting the popular 1-2-3 Magic parenting program from a child's point of view, this innovative guide provides kids with a thorough understanding of the disciplinary system—from the counting and time-out methods parents will be using to how better behavior benefits the entire family and leaves more time for play. Storytelling portions are coupled with copious illustrations to help describe the basic tenets of 1-2-3 Magic—such as positive reinforcement, charting, and the docking system—while a question-and-answer section outlines common situations, including What if I don't go to my room? Will I still be counted if I have a friend over? and What kinds of things can we do for one-on-one fun? Crossword puzzles, word searches, and journal suggestions further encourage children to apply what they've learned about the methods.

PARENTING MATTERS

SUPPORTING PARENTS OF CHILDREN AGES 0-8

National Academies Press Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Therefore, learning the skills of effective parenting will be one of the most worthwhile ventures you ever pursue. We know that good communication is at the heart of a healthy family. This book will teach you parenting skills to establish loving authority in your home, put an end to conflict and power struggles, and communicate with your children (from toddlers to teens) in ways that solve problems, build trust, enhance self-worth, and help your children learn personal responsibility. Are you ready to start the journey?

UNDERSTANDING YOUR CHILD'S TEMPERAMENT

Xlibris Corporation UNDERSTANDING YOUR CHILD'S TEMPERAMENT From their earliest days some children are shy and others are bold. A brother may be flexible, while his sister is rigid. One child is highly active, another far less so. One may stick with a challenge for hours, while another gives up easily. All children display distinct profiles of nine largely inborn temperament traits that determine how they experience their environments and respond to them. These interactions have a major impact on children's physical health, development, social behavior, and school performance, and on the caregivers themselves. If adults learn to recognize and tolerate temperament traits, they will be able to manage them more harmoniously and care for each child's individual needs. "What an important book for parents to consider. Treating each child as an individual shows them the respect that will engender self-esteem in them later. This book about differences in temperament by Dr. William Carey, an esteemed pediatrician, will give parents the backup they need to treat each child individually." T. Berry Brazelton, M.D Emeritus Professor of Pediatrics, Harvard Medical School Author of numerous books on child development and care. "America's favorite pediatrician" "This classic work is now more useful than ever. The too often neglected role of temperamental patterns is explained brilliantly, so that all adults who live or work with kids can understand and manage these all-important differences between them." Mel Levine, M.D. Professor of Pediatrics, University of North Carolina Medical School. Author of national bestseller, A Mind at a Time, and 10 other books about children's learning issues.

UNDERSTANDING CHILDREN'S LEARNING

A TEXT FOR TEACHING ASSISTANTS

Routledge In Joseph Conrad's tales, representations of women and of "feminine" generic forms like the romance are often present in fugitive ways. Conrad's use of allegorical feminine imagery, fleet or deferred introductions of female characters, and hybrid generic structures that combine features of "masculine" tales of adventure and intrigue and "feminine" dramas of love or domesticity are among the subjects of this literary study. Many of Conrad's critics have argued that Conrad's fictions are aesthetically flawed by the inclusion of women and love plots; thus Thomas Moser has questioned why Conrad did not "cut them out altogether." Yet a thematic of gender suffuses Conrad's narrative strategies. Even in tales that contain no significant female characters or obvious love plots, Conrad introduces elusive feminine presences, in relationships between men, as well as in men's relationships to their ship, the sea, a shore breeze, or even in the gendered embrace of death. This book investigates an identifiably feminine "point of view" which is present in fugitive ways throughout Conrad's canon. Conrad's narrative strategies are articulated through a language of sexual difference that provides the vocabulary and grammar for tales examining European class, racial, and gender paradigms to provide acute and, at times, equivocal investigations of femininity and difference."

UNDERSTANDING HOW YOUNG CHILDREN LEARN

BRINGING THE SCIENCE OF CHILD DEVELOPMENT TO THE CLASSROOM

ASCD Human beings are born to learn. During the last few decades, developmental science has exploded with discoveries of how, specifically, learning happens. This provides us with an unprecedented window into children's minds: how and when they begin to think, perceive, understand, and apply knowledge. Wendy Ostroff builds on this research and shows you how to harness the power of the brain, the most powerful learning machine in the universe. She highlights the processes that inspire or propel learning--play, confidence, self-regulation, movement, mnemonic strategies, metacognition, articulation, and collaboration--and distills the research into a synthesis of the most important takeaway ideas that teachers will need as they design their curriculum and pedagogy. Each chapter has suggested activities for exactly how teachers can put theory into practice in the classroom. When you understand how your students learn, you will know how to teach them in ways that harness the brain's natural learning systems. Dr. Wendy L. Ostroff is Associate Professor in the Program for the Advancement of Learning at Curry College.
