**LEARNING TOOLS AND TEACHING APPROACHES THROUGH ICT
ADVANCEMENTS**

IGI Global *Technology stimulates minds in ways that make a profound and lasting difference, especially in the classroom. It can be used to adapt curriculum to diverse learners or to express material in ways not possible prior to the creation of new technologies. Learning Tools and Teaching Applications through ICT Advancements provides research regarding introducing, collaborating, analyzing, synthesizing, and evaluating innovative contributions to the theory, practice, and research of technology education applicable to K-12 education, higher education, and corporate and proprietary education. It grows this body of research, proposing new applications of technology for teaching and learning, and documenting those practices that contribute irrefutable verification of information technology education as a discipline.*

EDUCATION DIRECTORY: COLLEGES AND UNIVERSITIES

INVESTIGATING CHINESE HE EFL CLASSROOMS

USING COLLABORATIVE LEARNING TO ENHANCE LEARNING

Springer *This book presents a study on corpus-driven distribution as the main method of prediction, concentrating on individual semantic features to predict the senses of non-defined words by using corpora and tools, such as the Chinese Gigaword Corpus, HowNet, Chinese Wordnet, and XianDai HanYu CiDian (Xian Han). With the help of these corpora, the study determines the collocation clusters of four target words: chi1 "eat," wan2 "play," huan4 "change" and shao1 "burn" through character and concept similarities. The results of this sense prediction study demonstrate that it was able to use off-line tasks to test some participants' intuition, which supports the theory that different clusters can represent different senses when pursuing a corpus-based, computational approach.*
