KEY=UNDERSTANDING - HARRISON SHAMAR

Understanding Your Young Child with Special Needs

Jessica Kingsley Publishers Understanding Your Young Child with Special Needs explores the developmental impact of disability on normal stages of child development, and examines the complex nature of the emotional bonds between parents and their children with special needs. Placing the child and his or her personality, family life, feelings and behaviours in the foreground, Bartram addresses all the 'ordinary' challenges and tasks of parenting, such as sibling relationships, nursery and school, toilet training, and healthy aggression, as well as those that are of particular relevance to the parents of young children with special needs. This accessible book will provide a wealth of information to help parents of a child with special needs understand his or her development and their own relationship with the child, and will also be of interest to professionals working with babies and pre-school children with special needs.

Parenting Matters

Supporting Parents of Children Ages 0-8

National Academies Press Decades of research have demonstrated that the parent-child dyad and the environment of the family— which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Matthew (Understanding the Bible Commentary Series)

Baker Books The Understanding the Bible Commentary Series helps readers navigate the strange and sometimes intimidating literary terrain of the Bible. These accessible volumes break down the barriers between the ancient and modern worlds so that the power and meaning of the biblical texts become transparent to contemporary readers. The contributors tackle the task of interpretation using the full range of critical methodologies and practices, yet they do so as people of faith who hold the text in the highest regard. Pastors, teachers, and lay people alike will cherish the truth found in this commentary series.

Your Baby & Child

The Classic Childcare Guide, Revised and Updated

Knopf The classic—beloved, trusted, best-selling—guide to baby and child care completely redesigned and revised for a new generation of parents

- From Penelope Leach, "a luminary in the world of child development" (The Boston Globe) Penelope Leach has helped millions of parents raise their children for more than forty years with her thoroughly researched, practical, baby-led advice, her wise, empathic, and sensible perspective, and her comforting voice. This new edition has been completely redesigned for today's parents. Leach has revised the text to reflect the latest research on child development and learning as well as societal changes and the realities of our current world. Your Baby & Child is essential—a bible—for every new parent. In easy to follow stages from birth through age five (newborn, settled baby, older baby, toddler, young child), Your Baby & Child addresses parents' every concern over the physical, emotional, and psychological well-being of their baby. Areas covered: feeding; physical growth and everyday care; sleeping; excreting and toilet mastery; crying and comforting; muscle power; seeing and understanding; hearing and learning to speak; playing and learning and thinking; learning how to behave.

Dr. Spock's Baby and Child Care

8th Edition

Simon and Schuster OVER 50 MILLION COPIES IN PRINT! THE CLASSIC THAT CONTINUES TO GROW WITH THE TIMES! For sixty-five years, parents have relied on the expert advice of renowned pediatrician Dr. Benjamin Spock. But while children never change, issues and concerns do. Dr. Robert Needlman, himself a top-notch pediatrician, has newly updated and expanded this timeless classic to speak to any parent who is raising children in our rapidly changing world. While still providing reassuring advice on age-old topics such as caring for a new baby, as well as accidents, illness, and injuries, this book also contains expanded information in many new areas, including:

- Cutting-edge medical opinion on immunizations
- Obesity and nutrition
- Cultural diversity and nontraditional family structures
- Children's learning and brain development
- The newest thinking on children with special needs
- Environmental health
- Increasingly common disorders such as ADHD, depression, and autism— including medications and behavioral interventions
- Children and the media, including electronic games
- Coping with family stress
- And much, much more

With an updated glossary of common medications and an authoritative list of the most reliable online resources, this invaluable guide is still the next best thing to Dr. Spock's #1 rule of parenting: "Trust yourself. You know more than you think you do."

How to Multiply Your Baby's Intelligence

Square One Publishers, Inc. Time and again, the work performed at The Institutes for the Achievement of Human Potential has demonstrated that children from birth to age six are capable of learning better and faster than older children. How To Teach Your Baby To Read shows just how easy it is to teach a young child to read, while How To Teach Your Baby Math presents the simple steps for teaching mathematics through the development of thinking and reasoning skills. Both books explain how to begin and expand each program, how to make and organize necessary materials, and how to more fully develop your child's reading and math potential. How to Give Your Baby Encyclopedic Knowledge shows how simple it is to develop a program that cultivates a young child's awareness and understanding of the arts, science, and nature—to recognize the insects in the garden, to learn about the countries of the world, to discover the beauty of a Van Gogh painting, and much more. How To Multiply Your Baby's Intelligence provides a comprehensive program for teaching your young child how to read, to understand mathematics, and to literally multiply his or her overall learning potential in preparation for a lifetime of success. The Gentle Revolution Series: The Institutes for the Achievement of Human Potential has been successfully serving children and teaching parents for five decades. Its goal has been to significantly improve the intellectual, physical, and social development of all children. The groundbreaking methods and techniques of The Institutes have set the standards in early childhood education. As a result, the books written by Glenn Doman, founder of this organization, have become the all-time best-selling parenting series in the United States and the world.

Your Baby and Child

Knopf Penelope Leach's Your Baby & Child is the most loved, trusted and comprehensive book in its field--with almost two million copies sold in America alone. Our Baby is Going to Die

The road of grief before the death of a sibling. Accepting the loss and understanding what will happen.

Katrina Villegas A book for children of all ages experiencing the loss of a sibling- specifically for families going through termination for medical reasons. When Caroline was 2.5 years old, she learned that her baby sister wasn't going to live. Her parents, Joe and Katrina Villegas (author), had to find a way to tell her that the baby was going to die and wouldn't be coming home. They made the agonizing choice to induce the pregnancy early (terminate for medical reasons) when they found out that their unborn baby had a fatal condition. They learned quickly how to talk to their daughter, Caroline, about death and what was happening, but it was uncharted territory for them and was a learning curve. They talked with child life specialists and read books. They learned the correct language to use around children when talking about death. This children's book series "Loss of a Sibling Due to Termination For Medical Reasons" is written specifically for families going through a loss due to termination for medical reasons. Katrina felt that the termination community deserved a set of books written just for them, as it is a unique grief journey for adults and children. This series uses the correct language and walks children through what to expect during specific moments in their journey. Books in this series

Everything You Need to Know for the First 4 Years

Penguin Authoritative but easily accessible, Complete Baby and Childcare is an invaluable source of information for all parents of infants, toddlers, and preschool kids. Dr. Miriam Stoppard takes the mystery out of child-rearing in this guide to the first five years of a child's life. The book provides information on topics as diverse as potty training and sleeping patterns to childhood phobias and developmental issues. This new edition has not only been given a completely new look with stunning new photography, but it has also been updated and rewritten with 20-25 percent new material. New information will cover the latest developments in baby and childcare, such as using sign language to communicate with your baby and progressive child-centered parenting tactics.

Screen Time

How Electronic Media—From Baby Videos to Educational Software—Affects Your Young Child

Basic Books As a mother, Lisa Guernsey wondered about the influence of television on her two young daughters. As a reporter, she resolved to find out. What she first encountered was tired advice, sensationalized research claims, and a rather draconian mandate from the American Academy of Pediatrics: no TV at all before the age of two. But like many parents, she wanted straight answers and realistic advice, so she kept digging: she visited infant-perception labs and child development centers around the country. She interviewed scores of parents, psychologists, cognitive scientists, and media researchers, as well as programming executives at Noggin, Disney, Nickelodeon, Sesame Workshop, and PBS. Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on "the three C's": content, context, and the individual child. Advocating a new approach to television and DVDs, Guernsey focuses on infants to five-year-olds and goes beyond the headlines to explore what exactly is "educational" about educational media. She examines how play and language development are affected by background and foreground television and how to choose videos that are age-appropriate. She explains how to avoid the hype of "brain stimulation" and focus instead on social relationships and the building blocks of language and literacy. Along the way, Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales, and distills some surprising new findings in the field of child development. Into the Minds of Babes is a fascinating book that points out how little credible research exists to support the AAP's dire recommendation. Parents, teachers, and psychologists will be relieved to learn positive approaches to using videos with young children and will be empowered to make their own informed choices.

Care of the Child

Bloomsbury Publishing This new edition has been updated throughout to reflect recent changes in how the family and society care for children. The book follows a health to ill health continuum in the care of the child and his family. Current trends in treatment of children's disease and related policies are clearly explained and there is more information included dealing with child abuse. The book also reinforces the importance of appropriate application of nursing models in structuring care plans and the nursing process. Two specific models of nursing care, Roper et al and Orem, are included in this new edition. Each of the numerous care plans in the text now also include a complete section on evaluation and its importance in the nursing process.

7 Keys to Comprehension

How to Help Your Kids Read It and Get It!

Harmony It's simple: If children don't understand what they read, they will never embrace reading. And that limits what they can learn while in school. This fact frightens parents, worries teachers, and ultimately hurts children. 7 Keys to Comprehension is the result of cutting-edge research. It gives parents and teachers—those who aren't already using this valuable program—practical, thoughtful advice about the seven simple thinking strategies that proficient readers use: • Connecting reading to their background knowledge • Creating sensory images • Asking questions • Drawing inferences • Determining what's important • Synthesizing ideas • Solving problems Easily understood, easily applied, and proven successful, this essential educational tool helps parents and teachers to turn reading into a fun and rewarding adventure.

You and Your Toddler

Routledge A central theme of this book is the gradual process of separation between parents and toddlers and the growth of autonomy in them all. The author has written with clarity, sympathy and warmth about the multiple problems children face in their toddler years and she has addressed the parents with immense empathy. The author manages to convey complex concepts and arguments in a lucid and simple style that all readers will find most helpful. Each of the authors featured has published papers and books for the academic and clinical communities; the present volumes, however, are specifically aimed at parents. The intent is not to convince but to inform the reader. Rather than offering solutions, we are describing, explaining and discussing the problems that parents meet while bringing up their children, from infancy through to adulthood. We try to provide portraits of the various stages in the child's cognitive, intellectual, and emotional development and how these unfolding stages affect not only the child's experience of himself, but also how he perceives and relates to the world in which he lives.

Feeding with Love and Good Sense: The First Two Years

Kelcy Press "Your help with understanding my baby has made all the difference with feeding," says a parent. "Your booklet saved us from some real struggles with feeding," says another. Following your advice made feeding my baby and toddler easy and so much fun," says a third. "My friends and their children get into such hassles with feeding!" Ellyn Satter has helped millions of parents through the infant and toddler phases in feeding with her best-selling books, videos, presentations, media events, and website publications. Feeding the First Two Years is the first of the Feeding with Love and Good Sense booklet series written by Ellyn Satter, Registered Dietitian, Family Therapist, and internationally recognized authority on child nutrition and feeding. In Feeding the First Two Years, Satter show parents how to work out the kinks with breastfeeding or formula feeding, when and how to start solid foods and progress to table foods, how to navigate the sudden and bewildering almost-toddler and toddler changes, and how to solve feeding problems. For decades, parents have found that feeding is simple when they follow Satter's Division of Responsibility in Feeding. In this remarkable book, Satter shows parents in words, pictures, and feeding stories how to do their jobs with feeding, then let their children do their jobs with eating. Satter is a Registered Dietitian, Family Therapist, and internationally recognized expert on child feeding. She is the author of four best-selling, full-length books about feeding and eating and the producer of the Feeding with Love

and Good Sense DVD series that shows what to do—and not do—with feeding.
