THE KLEINIAN DEVELOPMENT - PART II

RICHARD WEEK-BY-WEEK: MELANIE KLEIN'S NARRATIVE OF A CHILD ANALYSIS

ISD LLC The Kleinian Development derives from lectures delivered at the Institute of Psychoanalysis, London, and the Tavistock Clinic (1965-78). It is divided into three volumes that examine, in turn, the writings of Sigmund Freud, Melanie Klein, and Wilfred Bion.

THE KLEINIAN DEVELOPMENT - PART I

FREUD'S CLINICAL DEVELOPMENT

Harris Meltzer Trust The Kleinian Development derives from lectures delivered at the Institute of Psychoanalysis, London, and the Tavistock Clinic (1965-78). It is divided into three volumes that examine, in turn, the writings of Sigmund Freud, Melanie Klein, and Wilfred Bion.

SEXUAL STATES OF MIND

ISD LLC A ground-breaking psychoanalytic study on sexuality which maintains its originality today, forty-five years after its first publication. The book is a revision of psychoanalytic theory, starting with the work of Freud himself and including Melanie Klein's contributions on the early Oedipus Complex and the Depressive Position. But more than that, it is a metapsychological study of sexuality which provides a different perspective from more well-known ones that relate simply to a descriptive or behavioural point of view. In differentiating adult sexuality from infantile sexuality and polymorphism and perversion, taking unconscious phantasy and the notion of the primal scene as the pivotal point, Meltzer proposes a unified theoretical and clinical model which has proved of particular help in the field of the psychopathology of addictions and perversions.

A MELTZER READER

SELECTIONS FROM THE WRITINGS OF DONALD MELTZER

ISD LLC Donald Meltzer was a distinguished psychoanalyst and one of Klein's most productive and prominent analysands. He was a very influential teacher internationally and an extraordinary practitioner and theorist as well. He codified Kleinian technique, was innovative in the treatment of autistic children, and was the foremost metapsychologist for Klein's and Bion's works. Of his many outstanding contributions, *The Apprehension of Beauty*, which he co-authored with Meg Harris Williams, heralded a new age in psychoanalysis by providing its aesthetic perspective in relation to that of infant development.

MELTZER IN PARIS

ISD LLC This book focuses on work with children undertaken by the GERPEN (Groupe d'Etudes et de Recherches Psychoanalytiques pour le developpement de l'Enfant et du Nourisson) of Caen and Paris. It is one of a series that record Donald Meltzer's clinical seminars and supervisions, which were conducted in various countries on a regular basis over many years. Despite his interest in the theoretical advances of psychoanalysis made during what he termed *The Kleinian Development*, Meltzer believed that clinical supervision was the only way to teach psychoanalytic practice. In effect, he treated supervision as an art form, just as he regarded psychoanalysis as an art form. The library of his supervision work, almost all recorded outside the UK, thus forms a valuable teaching model for future

practitioners, as well as demonstrating Meltzer's wealth of insight into both character development and analytic technique. With contributions by Catherine Druon, Didier Houzel, Bianca Lechevalier, Ann Levy, Antoine Meyer, Jeanne Pourrinet, and Rosella Sandri.

THE KLEINIAN DEVELOPMENT - PART III

THE CLINICAL SIGNIFICANCE OF THE WORK OF BION

ISD LLC The Kleinian Development derives from lectures delivered at the Institute of Psychoanalysis, London, and the Tavistock Clinic (1965-78). It is divided into three volumes that examine, in turn, the writings of Sigmund Freud, Melanie Klein, and Wilfred Bion.

EXPLORATIONS IN AUTISM

A PSYCHOANALYTICAL STUDY

Harris Meltzer Trust Explorations in Autism is a turning-point in both the understanding of and the clinical approach to autism. The clinical material gradually unveils the geography of the internal mother (which proved crucial for the development of Meltzer's 'claustrum' theory) and allowed him to draft, for the first time in psychoanalysis, a theory of the dimensionality of mental life.

THE CLAUSTRUM

AN INVESTIGATION OF CLAUSTROPHOBIC PHENOMENA

Harris Meltzer Trust Using the Kleinian concept of projective-identification, with special reference to intrusive identification with internal objects, this work examines claustrophobic phenomena and its relations to the treatment of borderline and adolescent patients.

THE KLEINIAN DEVELOPMENT

DREAM LIFE

A RE-EXAMINATION OF THE PSYCHOANALYTIC THEORY AND TECHNIQUE

Phoenix Publishing House "Dreams are my landscape", said Meltzer. In this book he re-establishes psychoanalysis as the art of reading dreams, and dream-life as the core of mental processes. Dreams are not just puzzles to be decoded, the effluence of past trauma or future wish-fulfilment; they are the psyche's attempt - with a varying level of aesthetic achievement - to symbolise its present emotional conflicts in order to re-orient itself toward "the real world - meaning external and internal reality".

THE PSYCHOANALYTICAL PROCESS

ISD LLC Sets forth an integrated concept of the 'natural history' of the psychoanalytical process, viewed in the light of experience gained in the child-analytical playroom, and applied to the more complicated phenomena of adult patients.

MELTZER IN SAO PAULO

ISD LLC This book is one of a series that record Donald Meltzer's clinical seminars and supervisions, which were conducted in various countries on a regular basis over many years. Despite his interest in the theoretical advances of psychoanalysis made during what he termed The Kleinian Development, Meltzer believed that clinical supervision was the only way to teach psychoanalytic practice. In effect he treated supervision as an art form just as he regarded psychoanalysis as an art form. The library of his supervision work, almost all recorded outside the UK, thus forms a valuable teaching model for future practitioners, as well as demonstrating Meltzer's wealth of insight into both character development and analytic technique. Edited by Marisa Pelella Melega, with contributions by Alfredo Colucci, Celia Fix Korbivcher, Alicia Beatriz Dorado de Lisondo, Martha Maria de Moraes Ribeiro, and Paulo Cesar Sandler.

STUDIES IN EXTENDED METAPSYCHOLOGY

CLINICAL APPLICATIONS OF BION'S IDEAS

Harris Meltzer Trust The work of Wilfred Bion, by its very nature being a major step forward in the psychoanalytical model making of the mental apparatus, will undoubtedly require many years for its full assimilation into the thought

and practice of workers in the field. To assist this process of assimilation two types of exposition are required: to help students read Bion's work in a comprehending way; and to show the way to the clinical application of this revolutionary modification of the working model of the mind.

THE APPREHENSION OF BEAUTY

THE ROLE OF AESTHETIC CONFLICT IN DEVELOPMENT, ART AND VIOLENCE

Harris Meltzer Trust This volume has grown over the years as a family project of Martha Harris, her two daughters Meg and Morag and her husband, Donald Meltzer. It therefore has its roots in English literature and its branches waving wildly about in psychoanalysis. It is earnestly hoped that it will reveal more problems than it will solve.

ADOLESCENCE

TALKS AND PAPERS BY DONALD MELTZER AND MARTHA HARRIS

Harris Meltzer Trust This volume contains a representative selection of talks and writings by Martha Harris and Donald Meltzer on the key developmental phase of adolescence, from their teachings both separately and together over many

years. Similar books on this topic by these authors have existed for some time in Italian and in Spanish but not until now in English.

MELTZER IN VENICE

SEMINARS WITH THE RACKER GROUP OF VENICE

ISD LLC This book focuses on adolescence and adolescent states of mind. It is one of a series that record Donald Meltzer's clinical seminars and supervisions, which were conducted in various countries on a regular basis over many years. Despite his interest in the theoretical advances of psychoanalysis made during what he termed The Kleinian Development, Meltzer believed that clinical supervision was the only way to teach psychoanalytic practice. In effect he treated supervision as an art form just as he regarded psychoanalysis as an art form. The library of his supervision work, almost all recorded outside the UK, thus forms a valuable teaching model for future practitioners, as well as demonstrating Meltzer's wealth of insight into both character development and analytic technique.'My conviction that psychoanalysis is a form of art and does not prosper in institutions has increasingly been consolidated in recent years, and Bion's idea of the work group has shown us the way forward.This book, which should interest all those in the field of psychoanalysis and its applications, is the product of the Racker Group of Venice, with whom I met regularly over the course of nearly two decades. The discussions are all descriptive and phenomenological and do not aspire to theory or a thorough list of current literature. The audience is urged to participate with questions and ideas. The result seems always to be interesting, often fun, and the atmosphere devoid of competition. The person who presents a case, often after a nervous start, is quite satisfied and, I believe I can say, finishes without ever feeling humiliated. The Racker Group is one of thirty similar work groups which came into being spontaneously in twenty different countries and which have attained complete autonomy. I like to consider these as, taken together, a flexible counter-institution whose atelier style is faithful to its founding inspiration, Socrates and the School of Athens.' - Donald Meltzer

MAN'S PICTURE OF HIS WORLD AND THREE PAPERS

ISD LLC This new edition of Roger Money-Kyrle's classic work is published together with three of his late papers,

'Cognitive development', 'The aim of psychoanalysis', and 'On being a psychoanalyst'. Its intention is to introduce new readers to this key Kleinian thinker, whose influence has been quiet and uncontroversial but deep and formative. The book also includes Donald Meltzer's discussion of the paper on 'Cognitive development'.

AESTHETIC CONFLICT AND ITS CLINICAL RELEVANCE

Harris Meltzer Trust Donald Meltzer coined the term 'aesthetic conflict' to describe the emotional complexities of the 'apprehension of beauty'. It had its roots in art, literature, infant observation, and above all, in clinical experience. This concept affirmed and illustrated Bion's formula of L, H, K (Love, Hate, and Knowledge), together with its negative (minus L, H, K) as a revision of Klein's fundamental emotional dynamics of Envy and Gratitude. As such, any emotional situation may be read in terms of either struggling with or retreating from the aesthetic conflict that occurs naturally at all key points of psychic development. Meltzer could be said to have encapsulated the essence of Bion's post-Kleinian trajectory when he wrote that 'If we follow Bion's thought closely, we see that the new idea presents itself as an emotional experience of the beauty of the world and its wondrous organisation.' The contributions in this book are by analysts and therapists from a wide variety of countries working with both children and adults. They have all, in individual ways, found 'aesthetic conflict' a useful frame of reference in terms of illuminating the significance of clinical observation, understanding countertransference responses, or practising the psychoanalytic method itself.

SELECTED PAPERS OF DONALD MELTZER VOL 2

This new selection from the papers of Donald Meltzer spans his working life and serves as an introduction to all his key concepts, such as: aesthetic conflict, the claustrum, adhesive identification, thought disorder, the nature of symbol formation, and his revised theories of sexuality and dream life.

BION IN NEW YORK AND SAO PAULO

AND THREE TAVISTOCK SEMINARS

Harris Meltzer Trust A new 2019 edition, edited and introduced by Meg Harris Williams. These two talks given in 1977 and 1978 in New York and Sao Paulo respectively are an edited version of discussions and spontaneous contributions made by Bion, in the main without notes. 'Leaving room for growth, promoting development, becoming a mental midwife: these are functions which Bion attributes to the analyst, the parent, the educator, who is concerned with enabling the patient, the child, the pupil, to develop through having a genuine experience of himself: an experience of feeling, of thinking based upon that feeling, and of attempting to formulate or take action upon these thoughts.' 'Thinking he regarded as a human activity still in its absolute infancy. The development of a capacity to think creatively, which might harness human passions in the service of development and wisdom, appeared to him as something of a race against time.' 'By "Yourself" he means the total person, body and mind, with its whole history, pre- and post-natal. His perception of the modes of expression of the Self became increasingly sharpened by observations which led him to his imaginative conjectures about the relationship between these two selves pre- and post-natal, within the same body.' 'If we stay, do not run away, go on observing the patient, after a time "a pattern will emerge". Discernment of that pattern, the wresting of some order from chaos, may result in mutually beneficial growth for both analyst and patient.' 'This is the Bion who sees analysis in the consulting room not as a refuge, but as a preparation for the real thing: for a richer and wiser mode of living in the world.' Martha Harris

DONALD MELTZER

A CONTEMPORARY INTRODUCTION

Routledge In this intelligent and insightful work, Meg Harris Williams presents a clear and readable introduction to the works of influential psychoanalyst Donald Meltzer. The book covers Meltzer's ideas on key themes including sexuality, dreams, psychosis, perversion and aesthetics, and his work with both children and adults. This book focuses especially on Meltzer's views on the nature of psychoanalysis itself, as an investigative method conducted by the cooperation between two people. His intuitive understanding of dreams is underscored by a scholarly interest in philosophy and linguistics. The book will give readers a window into Meltzer's clinical seminars and supervisions, as well as a comprehensive overview of his published work, all thoughtfully brought together by someone who worked with Meltzer for many years. Bringing Meltzer's ideas into contemporary context, this fresh approach to his work makes his rich and complex theories about our inner world accessible to all. Part of the Routledge Introductions to Contemporary Psychoanalysis series, this book will be of great importance to psychoanalysts, clinicians and scholars familiar with Meltzer's ideas, as well as those seeking an introduction to his work.

Harris Meltzer Trust This book is one of a series that record Donald Meltzer's clinical seminars and supervisions, which were conducted in various countries on a regular basis over many years. Despite his interest in the theoretical advances of psychoanalysis made during what he termed The Kleinian Development, Meltzer believed that clinical supervision was the only way to teach psychoanalytic practice. In effect, he treated supervision as an art form, just as he regarded psychoanalysis as an art form. The library of his supervision work, almost all recorded outside the UK,

DREAM SEQUENCES IN SHAKESPEARE

A PSYCHOANALYTIC PERSPECTIVE

Routledge This book takes a new approach to Shakespeare's plays, exploring them as dream-thought in the modern psychoanalytic sense of unconscious thinking. Through his commitment to poetic language, Shakespeare offers images and dramatic sequences that illustrate fundamental developmental conflicts, the solutions for which are not preconceived but evolve through the process of dramatisation. In this volume, Meg Harris Williams explores the fundamental distinction between the surface meanings of plot or argument and the deep grammar of dreamlife, applied not only to those plays known as 'dream-plays' but also to critical sequences throughout Shakespeare's oeuvre. Through a post-Kleinian model based on the thinking of Bion, Meltzer, and Money-Kyrle, this book sheds new light on both Shakespeare's own relation to the play and on the identificatory processes of the playwright, reader, or

audience. *Dream Sequences in Shakespeare* is important reading for psychoanalysts, playwrights, and students.

TEACHING MELTZER

MODES AND APPROACHES

ISD LLC This book is one of a short series on the teaching of post-Kleinian analysis, with a companion volume on *Teaching Bion*. The trials and tribulations of teaching are intimately connected with those of learning, and indeed have parallels with psychoanalysis in so far as this may in itself be considered a specialised mode of education. The variety of approaches recounted in this volume have been devised and refined over time and demonstrate the imaginative commitment and struggles of practitioners. Donald Meltzer's hopes for the survival of psychoanalysis rested not on schools and didacticism but on the capacity of the next generation to learn from their own experience with the aid of their internal teachers. His writings are often said to be 'difficult' by students without personal experience of his teaching. Yet Meltzer himself said his motto was 'simplicity' and he never tried to be obscurantist, but concentrated increasingly on how to make complex matters 'simple', relevant and digestible. This book shows how this aspiration to a complex simplicity can be conveyed by those who have absorbed it. Its relevance therefore goes beyond the conceptual framework of an individual analyst, and sheds new light on the task of enabling the psychoanalytic attitude in both students and teachers.
