PLL Performance, Simulation and Design

Dog Ear Publishing **This book is intended for the reader who wishes to gain a solid understanding of Phase Locked Loop architectures and their applications. It provides a unique balance between both theoretical perspectives and practical design trade-offs. Engineers faced with real world design problems will find this book to be a valuable reference providing example implementations, the underlying equations that describe synthesizer behavior, and measured results that will improve confidence that the equations are a reliable predictor of system behavior. New material in the Fourth Edition includes partially integrated loop filter implementations, voltage controlled oscillators, and modulation using the PLL.**

IELTS Speaking Test Practice - IELTS Speaking Exam Preparation and Language Practice

For the Academic Purposes and General Training Modules

Createspace Independent Publishing Platform **IELTS Speaking Test Practice - IELTS Speaking Exam Preparation & Language Practice for the Academic Purposes and General Training Modules** by IELTS Success Associates contains 16 IELTS practice speaking tests. This book will help you improve your grammar, language skills, vocabulary and fluency for the IELTS speaking test. IELTS Speaking Test Practice is designed for upper-intermediate to advanced learners of English. This study guide is conveniently organised into 8 parts: **PART 1: How to improve your speaking test score** The study guide begins with an overview of the IELTS speaking test format. It also provides you with tips and techniques to improve your speaking test score. **PART 2: Grammar and sentence construction on the speaking exam** You will learn what aspects of grammar and what types of sentence construction examiners are looking for in each part of your interview. **PART 3: Using conditional sentences on the IELTS speaking tasks** There are exercises teaching you how to use conditional sentences in order to get a higher score. **PART 4: Sample speaking exam 1** Complete speaking exam with the following sections for each of the three IELTS speaking tasks: Overview of each of the tasks, explaining the format and pointing out what is expected of you Tips for preparing for each of the tasks, with in-depth explanations Sample responses for each task with exercises and explanations **PART 5: Useful conversational phrases** In the next section of the study guide, we provide useful conversational phrases for you to practise for your speaking test. **PART 6: Vocabulary improvement** There is also a special section on how to improve your vocabulary for the IELTS speaking text. Concepts, Strategies and Models to Enhance Physics Teaching and Learning

Springer This book discusses novel research on and practices in the field of physics teaching and learning. It gathers selected high-quality studies that were presented at the GIREP-ICPE-EPEC 2017 conference, which was jointly organised by the International Research Group on Physics Teaching (GIREP); European Physical Society - Physics Education Division, and the Physics Education Commission of the International Union of Pure and Applied Physics (IUPAP). The respective chapters address a wide variety of topics and approaches, pursued in various contexts and settings, all of which represent valuable contributions to the field of physics education research. Examples include the design of curricula and strategies to develop student competencies—including knowledge, skills, attitudes and values; workshop approaches to teacher education; and pedagogical strategies used to engage and motivate students. This book shares essential insights into current research on physics education and will be of interest to physics teachers, teacher educators and physics education researchers around the world who are working to combine research and practice in physics teaching and learning.

Master the GMAT

Peterson's **Peterson's Master the GMAT** offers complete prep for the GMAT, including tips on essay writing and a thorough analysis of the types of verbal and quantitative questions you can expect on the exam. This no-nonsense guide to the GMAT includes essay-writing analysis and 6 practice tests, including a diagnostic tests to pinpoint strengths and weaknesses--all with detailed answer explanations. Readers will gain top test-prep tips, a helpful review of all subject areas--reading comprehension, sentence correction, critical reasoning, problem solving, data sufficiency, and analytical writing. The Appendix provides additional valuable information: insightful articles on the value of a graduate-level business degree and choosing the right program for your career needs, resources for GMAT preparation, and a Word List to help boost your vocabulary for the GMAT.

Impractical Python Projects

Playful Programming Activities to Make You Smarter

Digital Papyrology I

Methods, Tools and Trends

Walter de Gruyter GmbH & Co KG Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

Cellular Automata

8th International Conference on Cellular Automata for Research and Industry, ACRI 2008, Yokohama, Japan, September 23-26, 2008, Proceedings

Springer This book constitutes the refereed proceedings of the 8th International Conference on Cellular Automata for Research and Industry, ACRI 2008, held in Yokohama, Japan, in September 2008. The 43 revised full papers and 22 revised poster papers presented together with 4 invited lectures were carefully reviewed and selected from 78 submissions. The papers focus on challenging problems and new research not only in theoretical but application aspects of cellular automata, including cellular automata tools and computational sciences. The volume also contains 11 extended abstracts dealing with crowds and cellular automata, which were presented during the workshop C&CA 2008. The papers are organized in topical sections on CA theory and implementation, computational theory, physical modeling, urban, environmental and social modeling, pedestrian and traffic flow modeling, crypto and security, system biology, CA-based hardware, as well as crowds and cellular automata.

Recent Advances in Earthquake Engineering in Europe

16th European Conference on Earthquake Engineering-Thessaloniki 2018

Springer This book is a collection of invited lectures including the 5th Nicholas Ambraseys distinguished lecture, four keynote lectures and twenty-two thematic lectures presented at the 16th European Conference on Earthquake Engineering, held in Thessaloniki, Greece, in June 2018. The lectures are put into chapters written by the most prominent internationally recognized academics, scientists, engineers and researchers in Europe. They address a comprehensive collection of state-of-the-art and cutting-edge topics in earthquake engineering, engineering seismology and seismic risk assessment and management. The book is of interest to civil engineers, engineering seismologists, seismic risk managers, policymakers and consulting companies covering a wide spectrum of fields from geotechnical and structural earthquake engineering, to engineering seismology and seismic risk assessment and management. Scientists, professional engineers, researchers, civil protection policymakers and students interested in the seismic design of civil engineering structures and infrastructures, hazard and risk assessment, seismic mitigation policies and strategies, will find in this book not only the most recent advances in the state-of-the-art, but also new ideas on future earthquake engineering and resilient design of structures. Chapter 1 of this book is available open access under a CC BY 4.0 license.

Principles of Petroleum Reservoir Engineering

Volume 1

Springer Science & Business Media Six years ago, at the end of my professional career in the oil industry, I left my management position within Agip S.p.A., a major multinational oil company whose headquarters are in Italy, to take up the chair in reservoir engineering at the University of Bologna, Italy. There, I decided to prepare what was initially intended to be a set of lecture notes for the students attending the course. However, while preparing these notes, I became so absorbed in the subject matter that I soon found myself creating a substantial volume of text which could not only serve as a university course material, but also as a reference for wider professional applications. Thanks to the interest shown by the then president of Agip, Ing. Giuseppe Muscarella, this did indeed culminate in the publication of the first Italian edition of this book in 1989. The translation into English and publication of these volumes owes much to the encouragement of the current president of Agip, Ing. Guglielmo Moscato. My grateful thanks are due to both gentlemen. And now - the English version, translated from the second Italian edition, and containing a number of revisions and much additional material. As well as providing a solid theoretical basis for the various topics, this work draws extensively on my 36 years of worldwide experience in the development and exploitation of oil and gas fields.

ECG Interpretation

Lippincott Williams & Wilkins Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

SYNER-G: Typology Definition and Fragility Functions for Physical Elements at Seismic

Risk

Buildings, Lifelines, Transportation Networks and Critical Facilities

Springer Science & Business Media **Fragility functions constitute an emerging tool for the probabilistic seismic risk assessment of buildings, infrastructures and lifeline systems. The work presented in this book is a partial product of a European Union funded research project SYNER-G (FP7 Theme 6: Environment) where existing knowledge has been reviewed in order to extract the most appropriate fragility functions for the vulnerability analysis and loss estimation of the majority of structures and civil works exposed to earthquake hazard. Results of other relevant European projects and international initiatives are also incorporated in the book. In several cases new fragility and vulnerability functions have been developed in order to better represent the specific characteristics of European elements at risk. Several European and non-European institutes and Universities collaborated efficiently to capitalize upon existing knowledge. State-of-the-art methods are described, existing fragility curves are reviewed and, where necessary, new ones are proposed for buildings, lifelines, transportation infrastructures as well as for utilities and critical facilities. Taxonomy and typology definitions are synthesized and the treatment of related uncertainties is discussed. A fragility function manager tool and fragility functions in electronic form are provided on extras.springer.com. Audience The book aims to be a standard reference on the fragility functions to be used for the seismic vulnerability and probabilistic risk assessment of the most important elements at risk. It is of particular interest to earthquake engineers, scientists and researchers working in the field of earthquake risk assessment, as well as the insurance industry, civil protection and emergency management agencies.**

Membrane Biological Reactors

Theory, Modeling, Design, Management and Applications to Wastewater Reuse

IWA Publishing **In recent years the MBR market has experienced unprecedented growth. The best practice in the field is constantly changing and unique quality requirements and management issues are regularly emerging. Membrane Biological Reactors: Theory, Modeling, Design, Management and Applications to Wastewater Reuse comprehensively covers the salient features and emerging issues associated with the MBR technology. The book provides thorough coverage starting from biological aspects and fundamentals of membranes, via modeling and design concepts, to practitioners' perspective and good application examples. Membrane Biological Reactors focuses on all the relevant emerging issues raised by including the latest research from renowned experts in the field. It is a valuable reference to the academic and professional community and suitable for undergraduate and postgraduate teaching in Environmental Engineering, Chemical Engineering and Biotechnology.**

Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning

Volume 2: HVAC&R Component and Energy System

Springer Science & Business Media Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning is based on the 8th International Symposium of the same name (ISHVAC2013), which took place in Xi'an on October 19-21, 2013. The conference series was initiated at Tsinghua University in 1991 and has since become the premier international HVAC conference initiated in China, playing a significant part in the development of HVAC and indoor environmental research and industry around the world. This international conference provided an exclusive opportunity for policy-makers, designers, researchers, engineers and managers to share their experience. Considering the recent attention on building energy consumption and indoor environments, ISHVAC2013 provided a global platform for discussing recent research on and developments in different aspects of HVAC systems and components, with a focus on building energy consumption, energy efficiency and indoor environments. These categories span a broad range of topics, and the proceedings provide readers with a good general overview of recent advances in different aspects of HVAC systems and related research. As such, they offer a unique resource for further research and a valuable source of information for those interested in the subject. The proceedings are intended for researchers, engineers and graduate students in the fields of Heating, Ventilation and Air Conditioning (HVAC), indoor environments, energy systems, and building information and management. Angui Li works at Xi'an University of Architecture and Technology, Yingxin Zhu works at Tsinghua University and Yuguo Li works at The University of Hong Kong.

Trust Management

Third International Conference, ITrust 2005, Paris, France, May 23-26, 2005, Proceedings

Springer Science & Business Media This book constitutes the refereed proceedings of the Third International Conference on Trust Management, iTrust 2005, held in Paris, France in May 2005. The 21 revised full papers and 4 revised short papers presented together with 2 keynote papers and 7 trust management tool and systems demonstration reports were carefully reviewed and selected from 71 papers submitted. Besides technical issues in distributed computing and open systems, topics from law, social sciences, business, and psychology are addressed in order to develop a deeper and more comprehensive understanding of current aspects and challenges in the area of trust management in dynamic open systems.

Forgetting Faith?

Negotiating Confessional Conflict in Early Modern Europe

Walter de Gruyter For the last decade, early modern studies have significantly been reshaped by raising new and different questions on the uses of religion. This 'religious turn' has generated new discussion of the social processes at work in early modern Europe and their cultural effects - from the struggle over religious rites and doctrines to the persecution of secret adherents to forbidden practices. The issue of religious pluralisation has been mostly debated in terms of dissent and escalation. But confessional controversy did not always erupt into hostilities over how to symbolize and perform the sacred nor lead to a paralysis of social agency. The order of the day may often have been to suspend confessional allegiances rather than enforce religious conflict, suggesting a pragmatic rather than polemic handling of religious plurality. This raises the urgent question of how 'normal' transconfessional and even transreligious interaction was produced in a context of highly sharpened and always present reflexivity on religious differences. Our volume takes up this question and explores it from an interdisciplinary and interconfessional perspective. The title "Forgetting Faith?" raises the question whether it was necessary or indeed possible to sidestep religious issues in specific contexts and for specific purposes. This does not mean, however, to describe early modern culture as a process of secularization. Rather, the collection invites discussion of the specific ways available to deal with confessional conflict in an oblivional mode, precisely because faith still mattered more than many other social paradigms emerging at that time, such as nationhood, ethnic origin or class defined through property.

Cyberresearch on the Ancient Near East and Neighboring Regions

Case Studies on Archaeological Data, Objects, Texts, and Digital Archiving

Digital Biblical Studies CyberResearch on the Ancient Near East and Neighboring Regions provides case studies on archaeology, objects, cuneiform texts, and online publishing, digital archiving, and preservation. Eleven chapters present a rich array of material, spanning the fifth through the first millennium BCE, from Anatolia, the Levant, Mesopotamia, and Iran. Customized cyber- and general glossaries support readers who lack either a technical background or familiarity with the ancient cultures. Edited by Vanessa Bigot Juloux, Amy Rebecca Gansell, and Alessandro Di Ludovico, this volume is dedicated to broadening the understanding and accessibility of digital humanities tools, methodologies, and results to Ancient Near Eastern Studies. Ultimately, this book provides a model for introducing cyber-studies to the mainstream of humanities research.

The Way of the Linguist

A Language Learning Odyssey

AuthorHouse **The Way of The Linguist, A language learning odyssey.** It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist, A language learning odyssey*, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

The McKinsey Way

McGraw Hill Professional **"If more business books were as useful, concise, and just plain fun to read as THE MCKINSEY WAY, the business world would be a better place." --Julie Bick, best-selling author of ALL I REALLY NEED TO KNOW IN BUSINESS I LEARNED AT MICROSOFT. "Enlivened by witty anecdotes, THE MCKINSEY WAY contains valuable lessons on widely diverse topics such as marketing, interviewing, team-building, and brainstorming." --Paul H. Zipkin, Vice-Dean, The Fuqua School of Business It's been called "a breeding ground for gurus." McKinsey & Company is the gold-standard consulting firm whose alumni include titans such as "In Search of Excellence" author Tom Peters, Harvey Golub of American Express, and Japan's Kenichi Ohmae. When Fortune 100 corporations are stymied, it's the "McKinsey-ites" whom they call for help. In THE MCKINSEY WAY, former McKinsey associate Ethan Rasiel lifts the veil to show you how the secretive McKinsey works its magic, and helps you emulate the firm's well-honed practices in problem solving, communication, and management. He shows you how McKinsey-ites think about business problems and how they work at solving them, explaining the way McKinsey approaches every aspect of a task: How McKinsey recruits and molds its elite consultants; How to "sell without selling"; How to use facts, not fear them; Techniques to jump-start research and make brainstorming more productive; How to build and keep a team at the top its game; Powerful presentation methods, including the famous waterfall chart, rarely seen outside McKinsey; How to get ultimate "buy-in" to your findings; Survival tips for working in high-pressure organizations. Both a behind-the-scenes look at one of the most admired and secretive companies in the business world and a toolkit of problem-solving techniques without peer, THE MCKINSEY WAY is fascinating reading that empowers every business decision maker to become a better strategic player in any organization.**

Textile-making in Central Tyrrhenian Italy from the Final Bronze Age to the Republican Period

British Archaeological Reports Limited "This is a study on textile production in central Tyrrhenian Italy from the final Bronze Age to the Republican period. Textile production is studied here through its technological, social and economic aspects. Textiles and their making were important parts of all fields of life in ancient Italy. Textiles and textile implements are found from settlement sites, burials, votive deposits and sanctuaries. The differences between the finds from different contexts through time point out the changes in material culture related to textile-making. The changes in the materials also indicate the change from household production of textiles to a workshop mode of production and specialisation, and later the development of slave involvement. Through the scope of this study one learns that textile production went through the introduction of many new technologies. This book presents new insights on the importance of textile-making in the ancient society and economy. The question of the importance of textile-making is approached through different angles concerning age, gender, ethnicity, social status, profession and religion, and in so doing a new insight on the multifaceted identity of textile makers and their social status is built"--Publisher's website.
