#### PRIVACY AND DATA PROTECTION IN SOFTWARE SERVICES

---

**Springer Nature** *The aim of the book is to create a bridge between two 'lands' that are usually kept separate: technical tools and legal rules should be bound together for moulding a special 'toolbox' to solve present and future issues. The volume is intended to contribute to this 'toolbox' in the area of software services, while addressing how to make legal studies work closely with engineers' and computer scientists' fields of expertise, who are increasingly involved in tangled choices on daily programming and software development. In this respect, law has not lost its importance and its own categories in the digital world, but as well as any social science needs to experience a new realistic approach amid technological development and individuals' fundamental rights and freedoms.*

#### LIQUID LEGAL - HUMANIZATION AND THE LAW

---

**Springer** *"Humanization and the Law" combines two current and complementary trends in the business-to-business (B2B) market of the legal industry: digitalization and humanization. On the one hand, digital transformation in corporate legal departments and law firms continues to advance. Contract management, e-discovery, due diligence, legal operations, and forensic data analysis are just a few examples of task areas where the use of intelligent software solutions minimizes legal risks and increases compliance, enables efficiency gains and cost reductions through automation, and allows faster and more agile responses to changing market demands and client expectations. On the other hand, the increasing number of failed digitalization projects shows that technology alone is not enough to successfully transform legal departments and law firms. Software solutions must be integrated into existing work processes, be easy to use, and provide real benefits in order to be accepted by employees. People and their ability to make decisions and lead others remain the focus in an increasingly digitalized legal industry. More than 20 authors provide insights into why human aspects matter for business, what organizations can do to increase the mental well-being and motivation of their employees, and how to prevail in the upcoming war for talent in the legal industry. "The legal industry has been largely dismissive of "soft skills" and "humanizing law." One of the paradoxes of our time is that the ascendancy of automation, artificial intelligence, blockchain, Big Data, and other technological platforms has elevated, not diminished, the importance of humanity. It is not only what distinguishes us from machines but it also enables us to apply our humanity to machines. The legal function will play an important role in this process but must first take a hard look at itself." (Mark A. Cohen, in "Foreword")*

#### APPETITE FOR DISRUPTION IN THE LEGAL WORLD (US VERSION)

---

**Stämpfli Verlag** *"Time to get out of Law Land and back into the Jungle" Fuelled by advancing technology, new business models, and altered client expectations, the legal industry faces unprecedented change across its entire value chain. Unfortunately, many legal professionals fear the technology train and the convergence of other fields with law. They see legaltech, AI, and bots like "lions and tigers and bears oh my." We (the editors and authors of this book) see opportunity. Although the future may require us to put on "new suits"—it represents an enormous opportunity for lawyers to reinvent ourselves for our own and our clients' benefit. Filled with chapters written by experts in the intersection of law, innovation, and technology, this book provides a global perspective on the diverse legal service delivery ecosystem that will be our future. It provides chapter upon chapter (reason upon reason) explaining why lawyers can and should increase their appetite for disruption in the legal world. So welcome to the jungle and enjoy the ride as we attempt to systematically map the uncharted waters of the future legal realm and simultaneously inspire you to build a new future in law.*

#### LEGAL EDUCATION AND LEGAL TRADITIONS: SELECTED ESSAYS

---

**Springer Nature** *This book deals with aspects of legal education and legal traditions. Part I includes chapters on teaching Law of the Sea, legal ethics and educating lawyers as 'transaction cost engineers' as well as comparison of teaching law in a refugee camp and in a Malaysian University. Part II concludes with two essays regarding the applicability of the Hart-Devlin debate on the 'enforcement of morals' vis-à-vis the International Criminal Court and an essay on what the historian Arnold Toynbee would have commented on the 'contingency' v 'teleology' debate between two palaeontologists the late Stephen Jay Gould and Simon Conway Morris.*

#### TRANSFORMING LEGAL INTO A BUSINESS SAVVY, INFORMATION ENABLED AND PERFORMANCE DRIVEN INDUSTRY

---

**Springer** *This book compels the legal profession to question its current identity and to aspire to become a strategic partner for corporate executives, clients and stakeholders, transforming legal into a function that creates incremental value. It provides a uniquely broad range of forward-looking perspectives from several different key-players in the legal industry: in-house legal, law firms, LPO's, legal tech, HR, associations and academia. This publication is a platform for leading legal professionals that offers a new perspective on the accelerating transformation in legal. Combining expert contributions with editorial insights, it argues that the new legal function will shift from a paradigm of security to one of opportunity; that future corporate lawyers will no longer primarily be negotiators, litigators and administrators, but that instead they will be coaches, arbiters and intrapreneurs; that legal knowledge and data-based services will become a commodity; and that analytics and measurement will be key drivers of the future of the profession. A must-read for all legal professionals, this book sets the course for revitalizing the profession.*

## DRAFTING CONTRACTS IN LEGAL ENGLISH

---

---

---

### CROSS-BORDER AGREEMENTS GOVERNED BY U.S. LAW

---

*Aspen Publishers* Written in a deliberate and concise manner, devoid of United States colloquialisms, *Drafting Contracts in Legal English: Cross-border Agreements Governed by U.S. Law* is designed for classroom use as well as self-study. Teaching a strategic approach and sequential steps to drafting contracts, the text includes examples and exercises based on cross-border agreements such as distribution agreements, licensing, franchises and equipment leases. Special drafting issues in cross-border agreements are also considered: choice of language clauses, choice of forum clauses, indemnification provisions, force majeure clauses, counterpart clauses, international alternative dispute resolution clauses, and the choice to opt in or out of the CISG. By providing appropriate explanations of United States law, the text increases student comprehension as suggested drafting approaches are placed in legal context. This unique guide discusses the purpose of and provides drafting tips for contract parts, contract organization and formatting, basic contract provisions, letters of intent, and the craft of reviewing and revising contracts. End-of-chapter exercises test overall comprehension and apply drafting concepts presented in the chapter. To increase the non-native speakers lexical range, vocabulary is derived from a statistical analysis of thousands of authentic contracts. To help with contract sentence structures that are challenging for non-native speakers, syntax structures are based on comparison to databases with authentic contracts. A glossary of contract terms is based on frequency counts from thousands of authentic contracts and usage in text, contextualized and cross-referenced with most common collocations.

### SMART LEGAL CONTRACTS

---

---

---

### COMPUTABLE LAW IN THEORY AND PRACTICE

---

*Oxford University Press* Smart Legal Contracts: *Computable Law in Theory and Practice* is a landmark investigation into one of the most important trends at the interface of law and technology: the effort to harness emerging digital technologies to change the way that parties form and perform contracts. While developments in distributed ledger technology have brought the topic of 'smart contracts' into the mainstream of legal attention, this volume takes a broader approach to ask how computers can be used in the contracting process. This book assesses how contractual promises are expressed in software and how code-based artefacts can be incorporated within more conventional legal structures. With incisive contributions from members of the judiciary, legal scholars, practitioners, and computer scientists, this book sets out to frame the borders of an emerging area of law and start a more productive dialogue between the various disciplines involved in the evolution of contracts as software. It provides the first step towards a more disciplined approach to computational contracts that avoids the techno-legal ambiguities of 'smart contracts' and reveals an emerging taxonomy of approaches to encoding contracts in whole or in part. Conceived and written during a time when major legal systems began to engage with the advent of contracts in computable form, and aimed at a fundamental level of enquiry, this collection will provide essential insight into future trends and will provide a point of orientation for future scholarship and innovation.

Wolters Kluwer The Complete Guide to Human Resources and the Law will help you navigate complex and potentially costly Human Resources issues. You'll know what to do (and what not to do) to avoid costly mistakes or oversights, confront HR problems - legally and effectively - and understand the rules. It brings you the most up-to-date information as well as practical tips and checklists in a well-organized, easy-to-use resource. The 2010 Edition provides new and expanded coverage of issues such as: Discussion of the economic recovery measures under the Emergency Economic Stabilization Act of 2008, the Worker, Retiree and Employer Recovery Act of 2008, and the American Recovery and Reinvestment Act of 2009. The PBGC flat-rate premium for single employer plans for 2009 is \$34/participant. The requirement of distributing Summary Annual Reports to participants and beneficiaries has been replaced by the requirement of issuing annual funding notices for most benefit plans; DOL issued a model notice and FAQs for implementing the requirement. Courts continued to develop standards under *Metropolitan Life Insurance v. Glenn*, 128 S. Ct. 2343 (2008), for reviewing claims decisions made by decision-makers (such as plan sponsors and insurers) that have a conflict of interest because they are responsible for paying whatever claims are allowed. The Children's Health Insurance Program Reauthorization Act of 2009, Pub. L. 111-3 (CHIPRA), intended to improve coordination between EGHPs and state Medicaid and SCHIP (coverage for uninsured children) plans, caused EGHP and cafeteria plans to be amended. "Michell's Law," Pub. L. 110-381, requires EGHPs to extend coverage to employees' dependent children who are covered as post-secondary students if they have to interrupt their studies for health-related reasons. More states allowed same-sex couples to marry or have legally related domestic partnerships or civil unions - with implications for work-related benefit plans that cover "spouses." The requirement of benefit parity between mental and physical illnesses was made permanent by EESA. The HITECH Act (Health Information Technology for Economic and Clinical Health; part of ARRA) was enacted to strengthen the privacy and security rules under HIPAA, and to promote broader usage of electronic medical records. State Attorneys General now have the power to enforce HIPAA through suits in federal court. The Lilly Ledbetter Fair Pay Act (Pub. L. 111-2) was enacted. It increases the number of employment discrimination suits that can be brought by reversing the Supreme Court's decision that the timing rules for lawsuits begin when an allegedly discriminatory practice is adopted. The Supreme Court extended its string of pro-arbitration cases by ruling in *14 Penn Plaza LLC v. Pyett*, 129 S. Ct. 1456 (4/1/09), that a collective bargaining agreement clause that clearly obligates union members to arbitrate ADEA claims is enforceable. The Supreme Court held that federal labor law preempts a California law that forbade employers that receive state contracts or other funding to discuss union matters with employees. As long as employers avoid coercion, federal law seeks to promote wide-open debate on labor issues: *Chamber of Commerce v. Brown*, 128 S. Ct. 2408 (2008). Another Supreme Court ruling discussed allows unions to charge non-members who pay agency fees in lieu of joining the union amounts representing certain expenses of national litigation: *Locke*.
