The Total Money Makeover

A Proven Plan for Financial Fitness

Thomas Nelson Inc A strategy for changing attitudes about personal finances covers such topics as getting out of debt, the dangers of cash advances and keeping spending within income limits.

The Use and Meaning of All Solutions (interest Rates) to the Time Value of Money Equation

The time value of money (TVM) equation is a key equation in economics and finance. It takes the form of an nth order polynomial having n roots. It is usual to calculate and use only one root (interest rate). The remaining (n-1) roots are mostly complex or negative, and are usually discarded. In this thesis it is shown that the unorthodox roots (interest rates) should not be ignored because they have utility and meaning. New expressions are developed for existing concepts in economics and finance. The concepts include duration in bond mathematics, net present value (NPV) in capital budgeting, the value of a stock of capital in capital theory, and the total charge for credit in loan analysis. The new expressions for these concepts employ all possible interest rates as components. The new expressions provide solutions to puzzles. In bond mathematics, the new equation for duration delivers what previous formulas for duration fail to provide: an accurate measure of the impact of a change in interest rate on the price of a bond. In capital budgeting, the new equation for NPV offers a resolution to the debate about the relative merits of NPV and internal rate of return (IRR) as investment criteria. In economics, a solution is proposed to the reswitching debate in the Cambridge capital controversies. In credit analysis, a new relationship is developed between the total charge for credit and the orthodox measure of the cost of a loan, the annual percentage rate (APR). The result implies that the complicated APR need no longer be the focus of consumer credit legislation; the total charge for credit and its variants suffice. The new analysis not only employs all interest rates, it also endows them with meaning. The suggested interpretation of a complete cluster of interest rates sheds new light on the meaning of orthodox rates such as IRR and APR.

Guidelines for Public Expenditure Management

International Monetary Fund Traditionally, economics training in public finances has focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. Edited by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

Process Improvement for Effective Budgeting and Financial Reporting

John Wiley & Sons "The budget and financial reporting processes are well known sources of frustration for most CFOs. Seeking a quick fix to the problem, the common solution is to pour more money into new and better software. This leaves the root cause, the inefficient and dysfunctional underlying processes and routines, unaddressed. As this book shows, substantial and sustainable improvements are only achieved through an holistic approach to process improvement, technology, strategy, and people." —Tom Henry Knudsen, Executive Vice President, Telenor Eiendom Fornebu AS, Proven methods for improving efficiency Corporations face a high turnover among financial managers, rapid changes in technology, lack of time and process redesign skills, and ongoing ambiguity about primary objectives behind the budgeting and financial reporting processes. Amid this frenzy, it is the fundamental efficiency of these processes that dramatically impact overall business performance. Process Improvement for Effective Budgeting and Financial Reporting provides financial managers with a compelling blueprint for increasing efficiency and eliminating waste of time and energy. Four operational experts layout an 80/20 plan-improving 80% of processes in 20% of the time it would take to improve 100%-and explain a Business Process Improvement (BPI) plan that incorporates: The emerging trends affecting financial managers today Step-by-step process implementation Interviews with industry leaders, consultants, and managers who have successfully instituted BPI plans Appraisals of the available software that can help or hinder the process There is no substitute for improved efficiency. CFOs, controllers, budget managers, and financial analysts will significantly benefit from adding this authoritative guide to their professional libraries.

A Primer on School Budgeting

R&L Education Does the prospect of preparing your school district's budget seem daunting? Beginning school administrators, often having only one theoretical course on the subject under their belt, see the budget development process as a nightmare. New administrators, teachers, and board members who have little experience with budgeting are justifiably concerned by the prospect of their involvement in budgeting. This book leads the reader through all stages of the process, from the theoretical underpinnings (history, types of budgets, etc.) and practical considerations (revenue planning, budget calendar, etc.) through to the adoption of the budget and its implementation. Includes sample budgets and tips for administration of a budget once it is in place.

Consumer Government

Via the Art of Full Disclosure

Trafford Publishing THE MUNICIPAL BUSINESS SYSTEM VIA THE ART OF FULL DISCLOSURE The above titled Book is intended to change the way local governments do NOT do "business". It is predicated on and dedicated to an achieved fact: There is NO compelling reason why cities, counties and government special districts cannot be run better than private businesses are alleged to operate. Local Government can be superior! Further, there is no reason for municipal services to be gutted as is being done and advocated, and/or outsourced for ideological and unknown undocumented cost-saving reasons. It is time local government defended itself against massive misinformation and lack of supporting data. Cities can, and should be run like a business. This Book details the adaptation of corporate line-of-business profit & loss corporate accounting to municipal services. The MUNICIPAL BUSINESS SYSTEM, explained in detail in this Book, has provided billions of new revenues to 250+ governments. Better yet, those monies were retrieved from those improperly benefitting from tax-supported direct benefit services. Previously, influential persons and organizations were subsidized by taxes paid by everyone. By providing a highly detailed inventory of services, then full costing information for each to the public and their elected representatives, huge amounts of tax monies were repatriated. Those monies were diverted from those who should pay fees, and returned to pay for services provided to the community at large. Thus Police, Fire, EMS, parks, recreation, library, street maintenance, and agreed-to social services were resuscitated. Through the MUNICIPAL BUSINESS SYSTEM process the tax and fee-paying public is provided detailed full disclosure of revenue, cost-of-service, and quality information for the hundreds of local services provided by most cities and counties. And choice if, when, how, and quantity provided. Thus re-inventing the manner in which taxes are used and service levels defined. At last, there is a SYSTEM to utilize computerization capabilities fully to provide a rationale and reasons for not cutting municipal budgets or privatizing local services, and thus destroying local government, its protections and services. Importantly, taxes paid by all can be utilized solely to finance services benefitting ALL, not subsidizing just the few to retain special local service benefits solely for personal, corporate, or business purposes, at the expense of the community at large. The Author utilized his decades of experience and knowledge acquired in-the-trenches to develop, refine, and apply the MUNICIPAL BUSINESS SYSTEM. He now shares with others what was labored over for 40 years of development by a corps of dedicated municipal employees, and ultimately with a brilliant group of financial analysts and CPAs, who designed and implemented the detailed highly sophisticated but simply computerized MUNICIPAL BUSINESS SYSTEM. Then Ayres taught the "how" at three major universities for 15 years. The Book provides sufficient textual overview, explanation, specific illustrations, examples, and details to know and control the cost of all services throughout the entirety of local - and maybe even state - governments. Douglas W. Ayres, MPA, LLD spent eight years with the University of Chicago's National Governmental Center

(PAS) conducting scores of consulting engagements around the U.S., Canada and in Venezuela. He served as Town Clerk/Assistant Town Manager of Salem, Virginia; City Manager of Melbourne, Florida (Cape Canaveral); City Treasurer/Assistant City Manager, then City Manager of Salem, Oregon. As City Manager of Inglewood, California he installed the computerized MUNICIPAL BUSINESS SYSTEM. As a USC Graduate School Professor h

Student Affairs Budgeting and Financial Management in the Midst of Fiscal Crisis

New Directions for Student Services, Number 129

John Wiley & Sons This volume is designed to help senior student affairs officers navigate through uncertain economic times. After a broad review of budget models and the leadership potential of the senior officer, we look at the role of student affairs officers in difficult budgeting decisions from several perspectives--from small, private colleges to the experiences of twelve senior student affairs officers at public universities. One chapter describes general revenue-generating and cost-saving strategies that student affairs divisions may consider during cutbacks; another focuses on key aspects of developing a comprehensive communication strategy; a third presents a case study of a single institution through the eyes of the vice president for student affairs. This volume ends with a summary survey of the authors' observations, conclusions, and advice. This is the 129th volume of the Jossey-Bass higher education quarterly report series New Directions for Student Services. An indispensable resource for vice presidents of student affairs, deans of students, student counselors, and other student services professionals, New Directions for Student Services offers guidelines and programs for aiding students in their total development: emotional, social, physical, and intellectual.

Refinancing and Reorganizing Human Services

Interagency Net Budgeting and Others [sic.] Fiscal Incentives

Budgeting and Decision Making Exercises I

Bookboon

An Introduction to Health Planning for Developing Health Systems

Oxford University Press Health planning is a critical component when responding to the health needs of low and middle income countries, characterised by particularly stringent resource constraints. The major communicable diseases such as AIDS, TB and malaria often appear in parallel with growing non-communicable diseases including heart disease and diabetes, and yet resources are often less than the levels recommended by the World Health Organisation for basic health care. The new edition of this well-respected text explains the importance of health planning in both developing regions such as Africa, and those in transition, such as Central and Eastern Europe. It stresses the importance of understanding the national and international context in which planning occurs, and provides an up to date analysis of the major current policy issues, including health reforms. Separate chapters are dedicated to the distinct issues of finance for health care and human resource planning. The various techniques used at each stage of the planning process are explained, starting with the situational analysis and then looking in turn at priority-setting, option appraisal, programming, implementation, monitoring, and evaluation. The book ends by examining the challenges facing planners in the 21st century, particularly in the light of growing globalisation. A major theme of the book is the need to recognise and reconcile the inevitable tension that lies between value judgements and 'rational' decision-making. As such, in addition to introducing techniques such as costing and economic appraisal, it also outlines techniques such as stakeholder analysis for understanding the relative attitudes and power of different groups in planning decisions. Each chapter includes a comprehensive bibliography (including key websites), a summary, and exercises to help the reader practise techniques and better understand the content. The book argues that all health professionals and community groups should be involved in the planning process for it to be effective, and will therefore appeal to anyone involved in planning.

Retire Inspired

It's Not an Age. It's a Financial Number.

Ramsey Press When you hear the word retirement, you probably don't imagine yourself scrambling to pay your bills in your golden years. But for too many Americans, that's the fate that awaits unless they take steps now to plan for the future. Whether you're twenty five and starting your first job or fifty five and watching the career clock start to wind down, today is the day to get serious about your retirement. In Retire Inspired, Chris Hogan teaches that retirement isn't an age; it's a financial number an amount you need to live the life in retirement that you've always dreamed of. With clear investing concepts and strategies, Chris will educate and empower you to make your own investing decisions, set reasonable expectations for your spouse and family, and build a dream team of experts to get you there. You don't have to retire broke, stressed, and working long after you want to. You can retire inspired!

Local Government Budget Stabilization

Explorations and Evidence

Springer This book is the first comprehensive, full-scale treatment of the politics, law, and economics with regard to the policies and policy instruments for budget stabilization at the local level. It examines budget stabilization in the United States from the 1910s to 2010 (from adoption of public budgeting in this country through the Great Recession). In addition, it provides details on the methods and results of empirical tests of the effects of budget stabilization instruments on government operations, key/basic services provision, and some other aspects of social and economic life at the local level, including full-purpose governments (county, metro city, municipality, township, and village) as well as special (single-) purpose governments (like school districts and transportation districts). This book dissects an important and pressing issue in public financial administration, analyzes a lesson that has been in the learning process, especially in the United States, and identifies theoretical threads for scholarly refinement, which will be put into specific contexts of policy design and implementation. This book will be of interest to scholars in political science, economics, public choice and in public administration, where it will also appeal to policy-makers.

The Mystery in School Finances

Discovering Answers in Community-Based Budgeting

Rowman & Littlefield There are critical roles in the budget process for the Superintendent, Finance Officer, and internal and external stakeholders. The superintendent functions similar to a Chief Executive Officer; they are the main go-between for the board of directors and the district. Providing a vision for the school district as a whole is critical, as well as working to ensure community engagement provides a comprehensive 360-degree perspective - which in turn drives the budget process to ensure it reflects the community served. School budgets, regardless of geography, follow state procedures for both development and final approval. These perfunctory tasks include putting a budget on display for viewing - receipt of public comment and a vote. What this book seeks to provide are ideas for incorporating ongoing community discussion and dialogue on the budget process. This book additionally provides insight and information unto the budget process that drives all school decisions.

Dave Ramsey's Complete Guide to Money

Ramsey Press If you're looking for practical information to answer all your "How?" "What?" and "Why?" questions about money, this book is for you. Dave Ramsey's Complete Guide to Money covers the A to Z of Dave's money teaching, including how to budget, save, dump debt, and invest. You'll also learn all about insurance, mortgage options, marketing, bargain hunting and the most important element of all—giving. This is the handbook of Financial Peace University. If you've already been through Dave's nine-week class, you won't find much new information in this book. This book collects a lot of what he's been teaching in FPU classes for 20 years, so if you've been through class, you've already heard it! It also covers the Baby Steps Dave wrote about in The Total Money Makeover, and trust us—the Baby Steps haven't changed a bit. So if you've already memorized everything Dave's ever said about money, you probably don't need this book. But if you're new to this stuff or just want the all-in-one resource for your bookshelf, this is it!
