REORGANIZATION OF GOVERNMENT SERVICES

CONSOLIDATION OR VOLUNTARY COUNCILS

NONPROFITS AS POLICY SOLUTIONS TO THE BURDEN OF GOVERNMENT

Walter de Gruyter GmbH & Co KG This book addresses a specific subset of nonprofits that are chartered with a single mission: decrease the burden of government. Designing and engaging nonprofits to lessen the burden of government requires a specific description and acknowledgement of the burden to be lessened, and these may include the provision of infrastructure, the relief of debt, or the provision of general public services that are not motivated by charity. It also requires the assignment of specific operating powers to the nonprofit including the power of eminent domain. This book explores these and other related topics including the avoidance of resource dependence on government when attempting to reduce its burden. The book is addressed to the policy makers and rule makers who design policies that affect the ability of the nonprofit to effectively lessen the burden of government. It is also addressed to public administrators in search of innovative ways of implementing these policies consistent with the laws, and to the creative nonprofit managers who are charged with carrying out the mission often in collaboration with the government or other entities. To the advanced student in all related fields, the author offers not only material for discussion, but enables discovery of what is possible by giving key examples of organizations meeting the terms and objective of lessening a significant burden of government.

THE FUTURE OF THE PUBLIC'S HEALTH IN THE 21ST CENTURY

National Academies Press The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

DIGITAL SOLUTIONS FOR CONTEMPORARY DEMOCRACY AND GOVERNMENT

IGI Global The dot-com revolution has brought many advances before unimagined. Of them all, it may be said that none have surpassed e-government in attracting a significant number of researchers and practitioners from around the world. However, the question remains whether everyone is ready to join the e-government movement, or if some are just blindly following the latest trend. Digital Solutions for Contemporary Democracy and Government touches on several key issues and challenges surrounding the recent e-government boom and offers practical solutions from those who have been a part of implementing e-government programs internationally. Due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics, democracy, and government, this authoritative book is a valuable reference source for professionals, researchers, and students in the field of e-government, information management, or knowledge management.

CONTRACTING FOR GOVERNMENT SERVICES

THEORY AND EVIDENCE FROM U.S. CITIES

Local governments can provide services with their own employees or by contracting with private or public sector providers. We develop a model of this "make-or-buy" choice that highlights the trade-off between productive efficiency and the costs of contract administration. We construct a dataset of service provision choices by U.S. cities and identify a range of service and city characteristics as significant determinants of contracting decisions. Our analysis suggests an important role for economic efficiency concerns, as well as politics, in contracting for government services.

SEARCH FOR GOOD GOVERNMENT

UNDERSTANDING THE PARADOX OF ITALIAN DEMOCRACY

McGill-Queen's Press - MQUP Observers have frequently noted that Italians seem skilled at many things - but not at good government. As a people Italians are said to have flair, panache, and tenacity, while as a polity Italy is in shambles. This paradoxical view of politics can be found in Italian history as far back as Guicciardini and Machiavelli. Nor is it unique to Italy, for the social dilemma of "rational individuals and irrational society" has, since Hobbes, produced a large literature on social theory and comparative politics, as well as numerous questionable suggestions for policy. In *The Search for Good Government* Filippo Sabetti examines Italian politics to reassess habitual presumptions in comparative politics, opening new territory in the art and science of institutional analysis.

PERMANENT SUPPORTIVE HOUSING

EVALUATING THE EVIDENCE FOR IMPROVING HEALTH OUTCOMES AMONG PEOPLE EXPERIENCING CHRONIC HOMELESSNESS

National Academies Press Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

CIRCULAR NO. A-11

PREPARATION, SUBMISSION, AND EXECUTION OF THE BUDGET

The June 2019 OMB Circular No. A-11 provides guidance on preparing the FY 2021 Budget and instructions on budget execution. Released in June 2019, it's printed in two volumes. This is Volume I. Your budget submission to OMB should build on the President's commitment to advance the vision of a Federal Government that spends taxpayer dollars more efficiently and effectively and to provide necessary services in support of key National priorities while reducing deficits. OMB looks forward to working closely with you in the coming months to develop a budget request that supports the President's vision. Most of the changes in this update are technical revisions and clarifications, and the policy requirements are largely unchanged. The summary of changes to the Circular highlights the changes made since last year. This Circular supersedes all previous versions. VOLUME I Part 1-General Information Part 2-Preparation and Submission of Budget Estimates Part 3-Selected Actions Following Transmittal of The Budget Part 4-Instructions on Budget Execution VOLUME II Part 5-Federal Credit Part 6-The Federal Performance Framework for Improving Program and Service Delivery Part 7-Appendices Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

HEARING BEFORE THE COMMITTEE ON EDUCATION AND THE WORKFORCE, U.S. HOUSE OF REPRESENTATIVES, ONE HUNDRED NINTH CONGRESS, FIRST SESSION (APRIL 19, 2005) SERIAL NO. 109-8

In this Hearing, two academic witnesses debate the effect of federal student aid on college costs. One witness argues that increased federal grant and loan aid to students has led universities to raise tuition. The other witness counters by pointing to decreases in state funding as a primary culprit in public college tuition increases. Contents include: (1) Hearing Held on April 19, 2005; (2) Statement of Members; and (3) Statement of Witnesses.

When the government refuses, ICER destroys most of the downed aircraft in airports all over the country. When ICER sends a pulse that will kill millions on the East Coast, only security expert Dan Riker can stop them, but ICER has kidnapped Dan's family.Will Dan save his family or will millions die?

LEADERSHIP BY EXAMPLE

COORDINATING GOVERNMENT ROLES IN IMPROVING HEALTH CARE QUALITY

National Academies Press The federal government operates six major health care programs that serve nearly 100 million Americans. Collectively, these programs significantly influence how health care is provided by the private sector. Leadership by Example explores how the federal government can leverage its unique position as regulator, purchaser, provider, and research sponsor to improve care - not only in these six programs but also throughout the nation's health care system. The book describes the federal programs and the populations they serve: Medicare (elderly), Medicaid (low income), SCHIP (children), VHA (veterans), TRICARE (individuals in the military and their dependents), and IHS (native Americans). It then examines the steps each program takes to assure and improve safety and quality of care. The Institute of Medicine proposes a national quality enhancement strategy focused on performance measurement of clinical quality and patient perceptions of care. The discussion on which this book focuses includes recommendations for developing and pilot-testing performance measures, creating an information infrastructure for comparing performance and disseminating results, and more. Leadership by Example also includes a proposed research agenda to support quality enhancement. The third in the series of books from the Quality of Health Care in America project, this well-targeted volume will be important to all readers of To Err Is Human and Crossing the Quality Chasm - as well as new readers interested in the federal government's role in health care.

CONTRACTING OUT GOVERNMENT FUNCTIONS AND SERVICES IN POST-CONFLICT AND FRAGILE SITUATIONS

HANDBOOK

"The contracting out of government functions and services to external providers is an established practice in many developed and developing countries. On the one hand, it can offer essential support to states that have to deliver basic services urgently; on the other, it risks bypassing governments and undermining their long-term recovery. The OECD's Partnership for Democratic Governance was formed in 2007 to gather evidence on this issue. This handbook does not take a view for or against contracting out; nor is it a technical manual. The handbook is for field practitioners and government policy makers in countries that are either emerging from conflict or are otherwise considered to be fragile. Its aim is to help them make more informed choices about the types of contracting that are best suited to their country. It is a tool to assess whether contracting out might be a possible way forward (either temporarily or over a longer period of time) for delivering a core service (such as basic education, healthcare, water and sanitation) or a government function (such as managing public finances and human resources). The handbook illustrates these points with the aid of case studies ranging from Afghanistan to Haiti and Liberia"--Back cover.

"INTELLIGENCE" VS. COMMON SENSE

US AND ISRAELI INTELLIGENCE SERVICES AND THE "NOT-SO-DEEP" STATE

The book "Intelligence vs Common Sense: US and Israeli Intelligence Services, and the Not-So-Deep State" compares the success, weaknesses, and failures of the Intelligence organizations in Israel and the US. It is based on an analysis of books written by the former directors of various intelligence organizations in both countries (CIA, NSA and FBI in the US, and Mossad, GSS, and Military Intelligence in Israel). Although some of the recent books by former US intelligence directors were published with the objective of opposing the new president, instead they expose the way the US Intelligence Community (IC) does its job. They also list the ways that the IC mismanages the information, along with all their failures, and the causes for these failures. Avinoam Sapir, the author of "Intelligence vs Common Sense", served in Israeli Military Intelligence and the Israeli Police polygraph. He holds a B.A. in both Psychology and Criminology, and an M.A. in Criminology. During the past few decades, Mr Sapir has conducted training in interviewing for various government agencies in Israel, the US, Canada, and several other countries around the world.He developed the SCAN technique, i.e. analysis of statements, by conducting extensive research into verbal communication, looking into the linguistic behavior used by people in communication. SCAN (Scientific Content Analysis) analyzes a text or statement strictly according to the words used. The SCAN technique is currently being used in many police departments and other government agencies in many countries.

EVALUATING CITIZEN ADOPTION AND SATISFACTION OF E-GOVERNMENT IN MISSISSIPPI

Governments at all levels are faced with the challenge of transformation and the need to reinvent government systems in order to deliver efficient and cost effective services, information, and knowledge through information and communication technologies. Electronic government, or e-government, is defined as a way for governments to use the most innovative information and communication technologies, particularly web-based Internet applications, to provide citizens and businesses with more convenient access to government information and services, to improve the quality of the services, and to provide greater opportunities to participate in democratic institutions and processes. E-government presents a tremendous impetus to move forward in the 21st century with higher quality, cost-effective, government services, and a better relationship between citizens and government. Notwithstanding the tremendous potential of e-government applications to deliver public sector services more efficiently and effectively, the citizenry must adopt and continually leverage these virtual offerings, such as renewing a driver's license, for measurable value to be gained. In the process of designing and developing Web-based services which offer citizens both appropriate information and worthwhile services that are more convenient than traditional government transactions, public sector agencies must thoroughly recognize the elements that impact citizen adoption of and satisfaction with e-government. This research considers theoretical foundations from the Technology Acceptance Model (TAM), the Web Trust Model (WTM), and SERVQUAL to form a parsimonious model of citizen adoption and satisfaction for e-government services. This theory-oriented framework unites three research areas by asserting that an amalgamation of factors - technology adoption, trust, and service quality - influence an individual's adoption propensity and service quality perception. Significant findings suggest usefulness, or end-user convenience, to be the principal determinant of e-government adoption and satisfaction, unaffected even when controlling demographic variables such as race, income, and education are introduced. Additionally, future implications of this research are discussed.

LEADERSHIP AND CHANGE IN PUBLIC SECTOR ORGANIZATIONS

BEYOND REFORM

Routledge Successful change in the public sector can be supported or hindered by political and administrative leadership, individual and group motivation, and the public's perception of the effectiveness of public officials and government structures. But do the very characteristics of public sector organizations present obstacles to successful transformative change? This book assesses the current state of the literature on leadership and change in government and public policy, and introduces the reader to innovative new ways to demonstrate leadership in times of change. Contributions from accomplished scholars in the field cover the traditional public administration areas of performance and management, as well as the diversity of issues that surround public leadership and change, both domestic and global. Chapters on public sector innovation, performance leadership, governance networks, complexity in disaster management, change initiatives in educational systems and local government, citizen advisory bodies, and gender and race equality, to name but a few, provide important case studies throughout the volume. Leadership and Change in Public Sector Organizations will be required reading for upper level undergraduate and graduate courses in public administration/management, leadership, and public policy analysis.

CONTRACTED LOGISTICS SUPPORT AND TECHNOLOGY DURING INFORMATION AGE TRANSFORMATION - THE SOLUTION! OR THE NATIONAL STRATEGIC TRAP?

One of the many solutions available for transformation and reducing the cost of operations and ownership, has been the movement to contracted logistics support (CLS). In several ways this supports and is supported by Joint Vision (JV) 2010, JV 2020, and the 2001 Quadrennial Defense Review (QDR). While offering assistance, CLS also has some included risks which may have been weighed at some levels of decision making, and still possibly not fully addressed through discourse with and by those that are represented by the decision makers the public. The events of September 11th, 2001 highlight and

emphasize several of these. Additionally, during the international war on terrorism there is the realization that all institution entities (government and non-government) become targets of an opposition group. Questions addressed in this paper that might need resolution are: Does long term world demographics pose a problem with current International Law interpretations regarding conflict and war? Does the use of public key infrastructure, public key encryption (PKI/PKE) potentially cause a shift in protected status of units and facilities with respect to standing in International Law? Does the shift to contracted support for military logistics functions place individuals and organizations in positions of additional unacceptable risk with respect to conflict and war? Does the implementation of new information technology ideas necessarily augur improved solution? Will there be unintended consequences that result from the new applications of technology?
