# The Concise APA Handbook

# APA 7th Edition

IAP Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information

that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

# Reporting Qualitative Research in Psychology

# How to Meet APA Style Journal Article Reporting Standards

American Psychological Association (APA) "Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper7the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).
