CELEBRITY MAD

WHY OTHERWISE INTELLIGENT PEOPLE WORSHIP FAME

Routledge This short book by Professor Brett Kahr provides a psychoanalytic understanding of fame and celebrity in the early twenty-first century, building upon the bedrock foundations of the Freudian corpus. The book is divided into six chapters. Chapter One explores the psychology of the celebrity, questioning narcissistic and exhibitionist psychopathology, while Chapter Two examines the psychological state of those of who revel in the fame of others and in celebrity culture more broadly, and offers a discussion of the "Celebrity Worship Syndrome". Chapter Three provides a very brief history of the concept of celebrity itself, arguing that, contrary to popular opinion, the culture of celebrification cannot be blamed on twenty-first-century media moguls, but, rather, that such a preoccupation with famous personalities can be traced back to ancient times and demonstrates the need to broaden our analysis to include the role of deep, unconscious psychological forces. In Chapter Four, Kahr reviews some important theoretical concepts advanced by Freud and Winnicott, which provide an important foundation for the psychoanalytic study of fame, while Chapter Five provides a more comprehensive theory of the unconscious psychological roots of the need to worship fame and to seek it, drawing upon a multitude of sources, ranging from psychoanalytic theory and developmental psychological research, to film, archaeology, and, perhaps surprisingly, the history of infanticide. The book concludes, in Chapter Six, by studying the psychodynamics of celebrity and fame, arguing that being recognised by one's family and friends in the intimate context of home life may well be the very best way to become a celebrity. *Celebrity Mad* outlines a psychoanalytic theory of the roots of our obsession with fame. It will be of great interest to psychoanalytic practitioners and researchers, as well as to readers interested in the psychology of fame.

THE LIFE AND TIMES OF HIPPOCRATES

Mitchell Lane For many centuries in ancient history, people believed illnesses were handed down by the gods. In the fifth century BCE, a Greek physician named Hippocrates changed that attitude. He began looking for natural causes of illnesses. Many of his treatment methods seem primitive. For example, he performed brain surgery by drilling into a patient's skull with a sharp piece of wood. There were no anesthetics. It was a very painful procedure. >In other ways his methods have held up surprisingly well. Like modern doctors, Hippocrates emphasized the value of a good diet and plenty of exercise. He also used maggots, leeches, and bees to treat his patients. All three of these creatures are still being used by doctors even in the United States. >Because of his efforts, today Hippocrates is known as the Father of Medicine.
