STANDARD ACCESSION BOOK

THE OFFICIAL RECORD OF EACH VOLUME ADDED TO THE LIBRARY

Three standard accession books, comprising the official record of each volume added to the San Francisco County Medical Society Library from March 12, 1909 to October 22, 1945. Handwritten bibliographic records of each work added to the library were entered into three hard-bound, preprinted ledgers (Melvil Dewey's Standard accession book: the official record of each volume added to the library (also known as the A.L.A. standard accession book) sold by Library Bureau, Chicago. Author, title, place and publisher, date, source of acquisition, and remarks have been entered for each accession number. The name of the librarian is also added when authority to bind material was given. The name of the library is not indicated in the volumes. Identification of the institution was aided by a 1944 letter found between the pages of one of the volumes, addressed to F. L. Reichert, M.D., San Francisco County Medical Society. Dr. Reichert was listed as the Librarian in the Society's Bulletin and is entered in the ledgers from 1935 onward. Among the earliest acquired works are books and sets of journals sent from London by Dr. William Osler.

X WINDOW SYSTEM

EXTENSION LIBRARY : X VERSION 11, RELEASE 6 AND 6.1

Butterworth-Heinemann Written by the experts who originally designed and implemented the X Window System and with new, significant input from X Window Consortium members who have helped evolve X Version 11, Release 6, this fourth edition is a major revision of this definitive reference. Updated to conform with the latest released software: X Version 11, Release 6.1, this edition also has been redesigned for three separate books in an effort to make each more usable for its targeted audience. Each book is thus more focused and more use manageable: that is, by being separate volumes, a reader can now open several books simultaneously to cross reference related material. In addition, each volume provides its own comprehensive subject-oriented index that further enhances its overall value. The Definitive reference to X Window System, direct from the X Window Consortium at MIT. Updated for X Windows Version 11, Release 6.1.
