### Globalization and Poverty

**University of Chicago Press** *Over the past two decades, the percentage of the world's population living on less than a dollar a day has been cut in half. How much of that improvement is because of—or in spite of—globalization? While anti-globalization activists mount loud critiques and the media report breathlessly on globalization's perils and promises, economists have largely remained silent, in part because of an entrenched institutional divide between those who study poverty and those who study trade and finance. Globalization and Poverty bridges that gap, bringing together experts on both international trade and poverty to provide a detailed view of the effects of globalization on the poor in developing nations, answering such questions as: Do lower import tariffs improve the lives of the poor? Has increased financial integration led to more or less poverty? How have the poor fared during various currency crises? Does food aid hurt or help the poor? Poverty, the contributors show here, has been used as a popular and convenient catchphrase by parties on both sides of the globalization debate to further their respective arguments. Globalization and Poverty provides the more nuanced understanding necessary to move that debate beyond the slogans.*

### A Roadmap to Reducing Child Poverty

**National Academies Press** *The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.*

### The Economics of Poverty Traps

**University of Chicago Press** *What circumstances or behaviors turn poverty into a cycle that perpetuates across generations? The answer to this question carries especially important implications for the design and evaluation of policies and projects intended to reduce poverty. Yet a major challenge analysts and policymakers face in understanding poverty traps is the sheer number of mechanisms—not just financial, but also environmental, physical, and psychological—that may contribute to the persistence of poverty all over the world. The research in this volume explores the hypothesis that poverty is self-reinforcing because the equilibrium behaviors of the poor perpetuate low standards of living. Contributions explore the dynamic, complex processes by which households accumulate assets and increase their productivity and earnings potential, as well as the conditions under which some individuals, groups, and economies struggle to escape poverty. Investigating the full range of phenomena that combine to generate poverty traps—gleaned from behavioral, health, and resource economics as well as the sociology, psychology, and environmental literatures—chapters in this volume also present new evidence that highlights both the insights and the limits of a poverty trap lens. The framework introduced in this volume provides a robust platform for studying well-being dynamics in developing economies.*

### Wealth Creation and Poverty Reduction: Breakthroughs in Research and Practice

### Breakthroughs in Research and Practice

**IGI Global** *One of the major tools of attaining proper development all around the world is creating wealth and economic inclusion, such that all classes of people can secure their lifestyles through access to financial services from formal sectors. Expanding access to resources and increasing self-employment opportunities help reduce poverty and improve social development. Wealth Creation and Poverty Reduction: Breakthroughs in Research and Practice examines trends, challenges, issues, and strategies related to the creation of livelihood options through the redistribution of resources, foreign aid, private sector activities, and other methods. Highlighting a range of topics such as microfinance, poverty alleviation, and socio-economic development, this publication is an ideal reference source for government officials, policymakers, executives, economists, analysts, researchers, academicians, professionals, and students interested in wealth creation in areas of extreme poverty.*

### World Poverty

### A Reference Handbook

**ABC-CLIO** *World Poverty provides an authoritative and balanced examination of the many facets of world poverty and the policy issues surrounding it. \* Annotated timeline of significant events, conferences, and declarations, dating from the 8th century to the present \* Diverse biographical sketches of key individuals, including Jeffrey Sachs and James Wolfensohn*

### Policies to Address Poverty in America

**The Hamilton Project** *One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in The Hamilton Project's Policies to Address Poverty in America. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.*

### Mainstreaming Gender in Social Protection for the Informal Economy

**Commonwealth Secretariat** *Explores the gendered dimensions of risk, vulnerability and insecurity and hence the need for a gender perspective in the design of social protection measures. This book provides an understanding of the constraints and barriers that confine women to more poorly remunerated, more casual and more insecure forms of waged and self-employment.*

### Energy Performance in Buildings and Quality of Life

**MDPI** *Buildings allow several kinds of human activity: work, eat, sleep, play, etc., and they have a role in determining quality of life: ugly and uncomfortable buildings can be the worst place to live. The energy performance of buildings has a special role in improving and guaranteeing quality of life because it concerns architectural design, energy cost, consumption and energy poverty, and thermal comfort—both indoor and outdoor. Following a multidisciplinary approach, we present several case studies and articles about the correlation between building and quality of life. The included research highlights the relationship between BEP and quality of life in terms of wellbeing and thermal comfort and household smartness following UE Directive 844/2018, as well as the reduction of energy poverty*

and the impact of buildings on the environment and global warming. Also in this book is a city-scale study that attempts to evaluate the effect of climate change on building performance and building energy efficiency mapping and, moreover, reports some cases of indoor environment quality as well as thermal comfort in nearly zero energy buildings; finally, detailed scientific literature on energy poverty and outdoor wellbeing quality of life are presented.

## World Development Report 1978

**World Bank Publications** This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

## Participatory Approaches to Attacking Extreme Poverty

### Cases Studies Led by the International Movement ATD Fourth World

**World Bank Publications** "Relying on contributions from the International Movement ATD Fourth World, this book deals with questions such as: What does it mean to live in poverty, and especially in extreme poverty? How can very poor people be reached through development projects? How can we assess whether projects succeed in changing the lives of the poorest individuals? In answering these questions, the emphasis is on exploring what type of knowledge is needed to fight extreme poverty. A key argument is that apart from academic knowledge, a concerted effort is needed to listen to the knowledge of poor people themselves, as well as to the knowledge of practitioners who are engaged with them on a daily basis to fight poverty. After the introductory chapter, the text of a speech by Joseph Wresinski (founder of the International Movement ATD Fourth World) at a congress of social scientists held at UNESCO, is reproduced. The next contribution is based on comments by the International Movement ATD Fourth World on the World Bank's World Development Report 2004 Making Services Work for Poor People. Thereafter, case studies are provided on participatory approaches to attacking extreme poverty in both developing countries (Madagascar and Tanzania, as well as Bolivia, Guatemala, and Peru) and developed countries (the United States and Belgium)."

## Poor Economics

### A Radical Rethinking of the Way to Fight Global Poverty

**PublicAffairs** The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

## Resources in Education

### Poverty in Guatemala

**World Bank Publications** Available evidence suggests that poverty levels in Guatemala are higher than other Central American countries, with data for 2000 showing over half of all Guatemalans (about 6.4 million people) living in poverty, with about 16 per cent classified as living in extreme poverty. This report provides a multi-dimensional analysis of poverty in the country, using both quantitative and qualitative data, as well as examining the impact of government policies and spending on the poor. Policy options and priorities for poverty reduction strategies are identified under the key challenges of building opportunities and assets, reducing vulnerabilities, improving institutions and empowering communities.

## The Economics of Transition Developing and Reforming Emerging Economies

**Routledge** *In the last three decades since the fall of the Berlin Wall, there has been a vast amount of study looking at transforming the planned economy to a market economy from both theoretical and empirical aspects. This book provides an overview and insight into transition economies in the recent decades and looks at key economics topics from the so-called "transition strategy debate" to environmental reform. The book also includes an analytical review and meta-analysis of the existing literature. By integrating theoretical discussions and synthesizing empirical findings in a systematic manner, this book may help to enlighten the debate on the timing, speed, and policy sequence of economic transition. The book will particularly appeal to researchers, policy makers, other practitioners, and under- and post-graduate students who are interested in transition economies in Eastern Europe, the former Soviet Union, Southeast Asia, and China. It aims to be read as an advanced reader.*

## Poverty, Power, and Authority in Education

## Cross-cultural Perspectives

**Georgia State University Business Press** *This book contains three essays presented as lectures at Georgia State University in April and May 1981. The authors are educators in Canada and Great Britain. The introduction, written by Edgar B. Gumbert of Georgia State University, provides an overview of educational trends and developments on which the topics of the three essays are based. In the first paper, "Education against Poverty: Interpreting British and American Policies in the 1960s and the 1970s," by Harold Silver, the social consciousness raising period of the 1960s is examined in relation to an historical analysis of educational policy making in the United States and Great Britain. Connections between national educational systems and their historical and social contexts are described. The second paper, "Ideology and Educational Research," by Michael F. D. Young, addresses educational research as a social institution and concludes with suggested alternatives for conducting and analyzing educational research. The relationships among knowledge, power, and social class are discussed. In the third paper, "Deference to Authority: Education in Canada and the United States," Edgar Z. Friedenberg presents several definitions of authority and assesses the role of schools in shaping children's thought processes. Levels and patterns of authority and understanding of youth are identified. (FG)*

## The Process of Economic Development

**Routledge** *The fifth edition of The Process of Economic Development offers a thorough and up-to-date treatment of development economics. It has been extensively revised throughout, reflecting the most recent developments in research and incorporating the latest empirical data, as well as key theoretical advances and many new topics. The world has seen vast economic growth in China, economic transformation in India, new challenges in Latin America, rapid economic progress in Southeast Asia, and the deepening impact of environmental issues such as climate change. This new edition addresses all these critical issues as well as the pivotal role of the state, where China's capacity is contrasted with that of African states. Transnational corporations' reliance on low-wage manufacturing and labor arbitrage is featured in the book. Agricultural policy—extensively explored—remains crucial, as does the promotion of industrialization. This fifth edition offers a 'state-of-the-art' analysis of these essential themes and many others. Numerous case studies and issue focuses have been integrated with sundry central topics. Neoclassical theories and applications, including a timely exploration of behavioral economics, are both rigorously and accessibly explicated. Cypher's comprehensive account remains the development economics text par excellence, as it takes a much more practical, hands-on view of the issues facing the developing countries than other, overly mathematical texts. This book is unique in its scope and in the detailed attention it gives to a vast range of ideas, including pioneering developmentalist and heterodox formulations. Distinct institutional structures are examined within their historical contexts. This landmark text will continue to be an invaluable resource for students, teachers, and researchers in the fields of development economics and development studies.*

## The Companion to Development Studies

**Routledge** *The Companion to Development Studies contains over a hundred chapters written by leading international experts within the field to provide a concise and authoritative overview of the key theoretical and practical issues dominating contemporary development studies. Covering a wide range of disciplines the book is divided into ten sections, each prefaced by a section introduction written by the editors. The sections cover: the nature of development, theories and strategies of development, globalization and development, rural development, urbanization and development, environment and development, gender, health and education, the political economy of violence and insecurity, and governance and development. This third edition has been extensively updated and contains 45 new contributions from leading authorities, dealing with pressing contemporary issues such as race and development, ethics and development, BRICs and development, global financial crisis, the knowledge based economy and digital divide, food security, GM crops, comparative urbanism, cities and crime, energy, water hydrogeopolitics, climate change, disability, fragile states, global war on terror, ethnic conflict, legal rights to development, ecosystems services for development, just to name a few. Existing chapters have been thoroughly revised to include cutting-edge developments, and to present updated further reading and websites. The Companion to Development Studies presents concise overviews providing a gateway to further reading and a flexible resource for teaching and learning. It has established a role as essential reading for all students of development studies, as well as those in cognate areas of geography, international relations, politics, sociology, anthropology and economics.*
