Harvest House Publishers Torry Martin—a comedian, actor, and hippie—fled from California to the wilderness of Alaska, searching for answers to life's big questions. He found what he was looking for...and a lot more! A moose got its head stuck in Torry's window. A reindeer was trapped in his kitchen. A bear almost prevented him from reaching his airplane. He once woke up frozen to his cabin floor. Like the Israelites of old, Torry experienced plenty of miracles and mishaps in the wilderness. And like them, he came face-to-face with God and was changed forever. Each of these true stories of Torry's hilarious blunders and misfortunes contains a nugget of truth, but one theme prevails: If God can reclaim and repurpose Torry Martin's life, He can do the same for you and those you love.

Affective Health and Masculinities in South Africa

An Ethnography of (In)vulnerability

Routledge *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern

individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Healing the Symptoms Known As Autism

As of May 2013, 93 children previously diagnosed with regressive autism were able to shed their autism diagnosis, their symptoms, and return to an overall state of health and vitality using the protocols revealed in this book. Kerri Rivera has outlined a very complete approach to autism recovery that includes an understanding of the importance of Biofilm theory and protocol. She recommends safe interventions that do no harm, and are helping to confront a growing epidemic. Kerri Rivera's approach includes common sense dietary recommendations, the use of supplements to restore balance to the body and immune system, as well as mild oxidative therapies to address chronic infection and inflammation. She has taken children who were in the throes of autism (meaning chronic illness) to healing. The symptoms being labeled as autism are fading away, the children are talking and socializing, and their ATEC scores prove beyond a shadow of a doubt what their parents are claiming: their children no longer have autism. Kerri Rivera's grasp of a biomedical approach to Autism recovery, paired with her passion for service has allowed families of all socioeconomic backgrounds to have what they might never have otherwise found: a means by which to help their children. This book contains over 120 testimonials from parents (and some of the children themselves) describing their journey and resulting success.
