AGGRESSION AND VIOLENCE

A SOCIAL PSYCHOLOGICAL PERSPECTIVE

Psychology Press **This book provides a broad and contemporary overview of aggression and violence by some of the most internationally renowned researchers in the field. It begins with an integrative theoretical understanding of aggression and shows how animal models shed light on human aggression and violence. Individual risk factors for aggression and violence from different research perspectives are then examined. First, there is a cognitive neuroscientific, neuropsychological, and psychophysiological study of the brain. It then explores the developmental psychological factors in aggressive behavior, incorporating work on gender and the family. Other perspectives include the role of testosterone, individual differences, and whether humans are innately wired for violence. The following sections moves from the individual to the contextual risk factors for aggression, including work on the effects of adverse events and ostracism, guns and other aggressive cues including violent media, and drugs and alcohol. Targets of aggression and violence are covered in the next section, including violence against women and loved ones; aggression between social groups; and the two very contemporary issues of cyberbullying and terrorism. The book concludes with work showing**

how we may make the world a more peaceful place by preventing and reducing aggression and violence. The volume is essential reading for upper-level students and researchers of psychology and related disciplines interested in a rigorous and multi-perspective overview of work on aggression and violence.

THE PSYCHOLOGY OF EXTREME VIOLENCE

A CASE STUDY APPROACH TO SERIAL HOMICIDE, MASS SHOOTING, SCHOOL SHOOTING AND LONE-ACTOR TERRORISM

Routledge Featuring a unique overview of the different forms of extreme violence, this book considers the psychology of extreme violence alongside a variety of contributing factors, such as brain abnormalities in homicide offenders. Featuring several contemporary real-world case studies, this book offers insight into the psychology of serial homicide offenders, mass shooters, school shooters and lone-actor terrorists. The main purpose of this book is not to glorify or condemn the actions of these individuals, but to attempt to explain the motivations and circumstances that inspire such acts of extreme violence. By adopting a detailed case study approach, it aims to increase our understanding of the specific motivations and psychological factors underlying extreme violence. Using nontechnical language, this book is the ideal companion for students, researchers, and forensic practitioners interested in the multidisciplinary nature of extreme violence. This book will also be of interest to students taking courses on homicide, mass shooting, school shooting, terrorism, forensic psychology and criminology and criminal justice.

THE SERIAL KILLERS

A STUDY IN THE PSYCHOLOGY OF VIOLENCE

Random House As the number of serial killers worldwide has risen steadily - from the emergence of Jack the Ripper in 1888 to Harold Shipman and Ivan Milat, the backpacker killer of the Australian outback - the need to understand mass murder is becoming more urgent. Using privileged access to the world's first National Centre for the Analysis of Violent Crime, Colin Wilson and Donald Seaman bring you this incisive study of the psychology of serial killers and the motives behind their crimes. From childhood traumas to issues of frustration, fear and fantasy, discover what turns an ordinary human being into a compulsive killer.

THE SERIAL KILLERS, A STUDY IN THE PSYCHOLOGY OF VIOLENCE

HARD KNOCKS

DOMESTIC VIOLENCE AND THE PSYCHOLOGY OF STORYTELLING

Routledge This book draws on interviews carried out over a period of eight years, as well as novels, films, and domestic violence literature, to explain the role of storytelling in the history of the battered women's movement. The author shows how cultural contexts shape how stories about domestic abuse get told, and offers critical tools for bringing psychology into discussions of group dynamics in the domestic violence field. The book enlists psychoanalytic-feminist theory to analyse storytelling practices and to re-visit four areas of tension in the movement where signs of battle fatigue have been most acute. These areas include the conflicts that emerge between the battered women's movement and the state, the complex relationship between domestic violence and other social problems, and the question of whether woman battering is a special case that differs from other forms of social violence. The volume also looks at

the tensions between groups of women within the movement, and how to address differences based on race, class or other dimensions of power. Finally, the book explores the contentious issue of how to acknowledge forms of female aggression while still preserving a gender analysis of intimate partner violence. In attending to narrative dynamics in the history of domestic violence work, *Hard Knocks* presents a radical re-reading of the contribution of psychology to feminist interventions and activism. The book is ideal reading for scholars, activists, advocates and policy planners involved in domestic violence, and is suitable for students of psychology, social work, sociology and criminology.

HUMAN AGGRESSION AND VIOLENCE

CAUSES, MANIFESTATIONS, AND CONSEQUENCES

Amer Psychological Assn This book provides an impressive, well-rounded, authoritative overview of the latest research and theory about human aggression. Written by a diverse phalanx of highly respected experts, from evolutionary psychologists and behavioral geneticists to developmental, social, and clinical psychologists, the chapters offer a rich assortment of perspectives and an indispensable survey of issues, facts, and theories about why and how people hurt each other. It is an ideal introduction to the modern psychology of aggression for scholars and students, and a convenient reference for specialists, journalists, and the general public.-Roy F. Baumeister, author of *Evil: Inside Human Violence and Cruelty* This volume is an outstanding, integrated, biopsychosocial approach to aggression ranging over the contributions of genes, neurophysiology, early life influences, social relationships, personality, and cultures and exploring the "victim perspective." Edited by internationally renowned researchers in attachment and social relationships, this gem of a book provides detailed, up-to-date access to current work by world leaders in the field. The best way of dealing aggression and becoming more compassionate is to better understand the facilitators and inhibitors of aggression, and this volume significantly contributes to this important endeavor.ùPaul Gilbert, author of *The Compassionate Mind* In this exciting book, leading experts cover contemporary theory, research, and practice in the psychology of aggression and violence. There is something here for everyone interested in these topics: basic theory, up-to-date reviews, and practical applications. There is a broad range of approachesùincluding evolutionary background, neuroscience and genetics, environmental influences, violence between groups, and the impact on victims.ùJohn Archer, School of Psychology University of Central Lancashire, Lancashire, United Kingdom Violence and aggression have existed as long, as humankind, and the need to understand and control these forces has only continued to grow throughout history. Thanks to the advance of psychological research within the social and

behavioral sciences, as well as several other scientific disciplines, we have more knowledge than ever before about the genetic, developmental, interpersonal, and cultural causes of aggression. Yet these findings have not been integrated into meaningful discussions about how to transform aggression research into practical applications. With so many answers to the question "What makes a person violent?" there is surprisingly little insight into "How do we prevent violence?" In this comprehensive book, editors Phillip R. Shaver and Mario Mikulincer have assembled chapters from international experts to provide a broad-based and multidisciplinary analysis of aggression and violence, their negative consequences, and promising interventions. Five sections examine major theoretical perspectives, genetic and environmental determinants, and the psychological and relational processes underlying human violence and aggression. The tone of the book is realistic in its investigation of violence as an inherent part of human genetics and interaction, but hopeful in its exploration of research-based interventions aimed at reducing violence in future generations. In its assessment of aggression and violence across individual, relational and societal levels, this book will engage a broad audience. This book is part of the Herzliya Series on Personality and Social Psychology. Phillip R. Shaver, PhD., a social and personality psychologist, is Distinguished Professor of Psychology at the University of California, Davis. Before moving there, he served on the faculties of Columbia University, New York University, University of Denver, and State University of New York at Buffalo. He has coauthored and co-edited numerous books. He is a member of the editorial boards of *Attachment and Human Development*, *Personal Relationships*, the *Journal of Personality and Social Psychology*, and *Emotion*, and has served on grant review panels for the National Institutes of Health and the National Science Foundation. He has been executive officer of the Society of Experimental Social Psychology and is a fellow of both the American Psychological Association and the Association for Psychological Science. Dr. Shaver received a Distinguished Career Award from the International Association for Relationship Research and has served as president of that organization. Mario Mikulincer, PhD, is professor of psychology and dean of the New School of Psychology at the Interdisciplinary Center in Herzliya, Israel. He has published 3 books and over 280 scholarly journal articles and book chapters. He is a member of the editorial boards of several scientific journals, including the *Journal of Personality and Social Psychology*, *Psychological Inquiry*, and *Personality and Social Psychology Review*, and has served as associate editor of two journals. Recently, he was elected to serve as chief editor of the *Journal of Social and Personal Relationships*. He is a fellow of the Society for Personality and Social Psychology and the Association for Psychological Sciences. He received the EMET Prize in Social science for his contributions to psychology and the Berscheid-Hatfield Award for Distinguished Mid-Career Achievement from the International Association for Relationship Research

ACCOUNTING FOR RAPE

PSYCHOLOGY, FEMINISM AND DISCOURSE ANALYSIS IN THE STUDY OF SEXUAL VIOLENCE

Routledge **Accounting for Rape** presents an original perspective on the subject of rape, focusing on both female and male sexual violence. The authors investigate everyday beliefs about rape, to examine how blaming the victim and the normalization of rape are achieved by people in a discussion about sexual violence. They synthesize discursive psychology and a feminist standpoint to explore precisely how rape and rape victimhood are defined in ways that reflect the social, political and cultural conditions of society. By analysing conversational data, Anderson and Doherty suggest that the existing social psychological experimental research into rape and rape perception fails to analyse the subtlety and political significance of rape supportive reasoning. **Accounting for Rape** provides a critical interrogation of the dominant theories and methodologies, focusing on: How the gender and sexual orientation of alleged victims and perpetrators is crucial to social participants when making sense of a rape report and in apportioning blame and sympathy How arguments that are critical of alleged victims are built in ways that are 'face saving' for the participants in the conversations, and how victim-blaming arguments are presented as 'common sense'. The potential of applying this approach in both professional and academic contexts to promote attitude change. The book will be of great interest to those studying social and clinical psychology, cultural studies, sociology, women's studies and communication studies.

THE PSYCHOLOGY OF GENOCIDE AND VIOLENT OPPRESSION

A STUDY OF MASS CRUELTY FROM NAZI GERMANY TO RWANDA

McFarland **The twentieth century** was one of the most violent in all of human history, with more than 100 million people killed in acts of war and persecution ranging from the Herero and Namaqua genocide in present-day Namibia during the early 1900s to the ongoing conflict in Darfur. This book explores the root causes of genocide, looking into the underlying psychology of violence and oppression. Genocide does not simply occur at the hands of tyrannical despots, but rather at the hands of ordinary citizens whose unresolved pain and oppression forces them to follow a leader whose demagoguery best expresses their own long-developed prejudices and fears. The book explains how birth trauma, childhood trauma, and authoritarian education can be seen as the true causes of genocidal periods in recent history.

STUDY GUIDE FOR PSYCHOLOGY IN EVERYDAY LIFE

Macmillan

THE CAMBRIDGE HANDBOOK OF VIOLENT BEHAVIOR AND AGGRESSION

Cambridge University Press From a team of leading experts comes a comprehensive, multidisciplinary examination of the most current research including the complex issue of violence and violent behavior. The handbook examines a range of theoretical, policy, and research issues and provides a comprehensive overview of aggressive and violent behavior. The breadth of coverage is impressive, ranging from research on biological factors related to violence and behavior-genetics to research on terrorism and the impact of violence in different cultures. The authors examine violence from international cross-cultural perspectives, with chapters that examine both quantitative and qualitative research. They also look at violence at multiple levels: individual, family, neighborhood, cultural, and across multiple perspectives and systems, including treatment, justice, education, and public health.

THE PSYCHOLOGY OF GENOCIDE, MASSACRES, AND EXTREME VIOLENCE: WHY NORMAL PEOPLE COME TO COMMIT ATROCITIES

WHY NORMAL PEOPLE COME TO COMMIT ATROCITIES

ABC-CLIO Chronicling horrific events that brought the 20th century to witness the largest number of systematic slaughters of human beings in any century across history, this work goes beyond historic details and examines contemporary psychological means that leaders use to convince individuals to commit horrific acts in the name of a political or military cause. Massacres in Nanking, Rwanda, El Salvador, Vietnam, and other countries are reviewed in chilling detail. But the core issue is what psychological forces are behind large-scale killing; what psychology can be

used to indoctrinate normal people with a Groupthink that moves individuals to mass murder brutally and without regret, even when the victims are innocent children. Dutton shows us how individuals are convinced to commit such sadistic acts, often preceded by torture, after being indoctrinated with beliefs that the target victims are unjust, inhuman or viral, like a virus that must be destroyed or it will destroy society.

TOWARD THE NEXT GENERATION OF BYSTANDER PREVENTION OF SEXUAL AND RELATIONSHIP VIOLENCE

ACTION COILS TO ENGAGE COMMUNITIES

Springer **This briefs integrates and synthesizes an array of research about who helps others and under what conditions and discusses the implications of this research for a bystander intervention focused prevention agenda to reduce sexual and relationship violence in schools and communities. It combines an examination of bystander helping behavior in the specific context of sexual and relationship violence with social psychological research on bystander behavior outside that context in order to inform prevention efforts. This briefs is designed for researchers, practitioners, and students concerned about violence prevention and who are interesting in bystander intervention as a promising prevention strategy. Connections between research and practice are the foundation of this briefs. The briefs addresses the following questions: What is the promise of a bystander approach to violence prevention? Where does it fit within the spectrum of sexual and relationship violence prevention? How do we expand theoretical models of helping behavior to the unique context of interpersonal violence? How can we bring in research from other areas of health behavior change and developmental research on violence to inform a broader bystander action model? It provides a new synthesis and model of bystander interaction. It outlines a strategic plan for new research and next steps in prevention practices.**

THE PSYCHOLOGY AND LAW OF WORKPLACE VIOLENCE

A HANDBOOK FOR MENTAL HEALTH PROFESSIONALS AND EMPLOYERS

Charles C Thomas Publisher **The Psychology and Law of Workplace Violence** examines the causes, risk factors, prevention and legal issues associated with workplace violence. Previous attempts to explain these crimes are often only descriptive and do not identify the basic underlying psychological mechanisms and yet, from the largest violent acts, such as the September 11th "Attack on America," to the smallest violent workplace crime, the psychological mechanisms are the same. This landmark text offers a different perspective to the current concepts of workplace violence and will likely change the way people conceptualize violent crime. Part One of the text identifies eight underlying factors responsible for these crimes, identifies two necessary conditions for their occurrence, and develops several significant, new concepts related to the field. Part Two discusses state and federal legal issues surrounding workplace violence. Workers' compensation, employer liability and employer duties under negligence law, hiring, supervision and firing, the legal aspects surrounding premises security, employee privacy issues, the ADA, the Fair Credit Reporting Act, and criminal history inquiries are but a few of the many legal topics discussed. This section is written in a practical, easy-to-understand manner and contains materials that are often available only in law libraries. The final Part Three of the text is a compendium of workplace violence case histories and includes numerous nationally recognizable incidents along with many others that have not been widely publicized. An interesting description of details surrounding each crime and its aftermath is included. What happened to the perpetrator? What happened to the victims? In addition, for many cases, how the case relates to other cases and issues that have arisen from the case are discussed. In this section, which is the largest published compilation of case history material on workplace violence to date, covers over

ABNORMAL PSYCHOLOGY

THE SCIENCE AND TREATMENT OF PSYCHOLOGICAL DISORDERS

John Wiley & Sons "The focus of this book has always been on the balancing and blending of research and clinical application and on the effort to involve the learner in the problem solving engaged in by clinicians and scientists. We continue to emphasize an integrated approach, showing how psychopathology is best understood by considering multiple perspectives and how these varying perspectives can provide us with the clearest accounting of the causes of these disorders as well as the best possible treatments. With the fifteenth edition, we have once again emphasized the recent and comprehensive research coverage that has been the hallmark of the book. Of equal importance, however, we have worked to make the prose ever more accessible to a variety of students"--

DIFFERENCES IN RELATIVE RESOURCES, FAMILIAL POWER, AND SPOUSE ABUSE

A COGNITIVE PSYCHOLOGY OF MASS COMMUNICATION

Psychology Press **With this fourth edition of A Cognitive Psychology of Mass Communication, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge creates consequences for attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics--sex, violence, advertising--to less-studied topics, such as values, sports, and entertainment education. New chapters for the fourth edition cover: *children and media, examining children's prosocial television, advertising to children, and media literacy; *values and prosocial media, including family values, religion, social marketing, and entertainment-education programming; and *emotional media, including the effects of sports and music. New and updated material includes: *today's popular television shows; *the widespread use of the Internet; *changes brought about by telecommunications technology; *advertising on the Internet, in classrooms, and other unconventional places; *press coverage of the 2000 U.S. Presidential election and its aftermath; *stereotyping of mental illness and therapists; *male body-image media issues; *music, reflecting its increasing popularity and influence; and *effects of playing violent video games. An engaging, readable, and highly successful text, this classroom resource serves as an invaluable guide to the influences of media for courses on media and psychology, and media effects and processes.**

THE PSYCHOLOGY OF FEMALE VIOLENCE

CRIMES AGAINST THE BODY

Routledge First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

THE PSYCHOLOGY OF TERRORISM

Routledge This new edition of John Horgan's critically acclaimed book is fully revised and expanded. The book presents a critical analysis of our existing knowledge and understanding of terrorist psychology. Despite the on-going search for a terrorist pathology, the most insightful and evidence-based research to date not only illustrates the lack of any identifiable psychopathology in terrorists, but demonstrates how frighteningly 'normal' and unremarkable in psychological terms are those who engage in terrorist activity. By producing a clearer map of the processes that impinge upon the individual terrorist, a different type of terrorist psychology emerges, one which has clearer implications for efforts at countering and disrupting violent extremism in today's world. In this 2nd edition, Horgan further develops his approach to the arc of terrorism by delving deeper into his IED model of Involvement, Engagement and Disengagement - the three phases of terrorism experienced by every single terrorist. Drawing on new and exciting research from the past decade, with new details from interviews with terrorists ranging from al-Qaeda to left-wing revolutionaries, biographies and autobiographies of former terrorists, and insights from historic and contemporary terrorist attacks since 2005, Horgan presents a fully revised and expanded edition of his signature text. This new edition of The Psychology of Terrorism will be essential reading for students of terrorism and political violence, and counterterrorism studies, and recommended for forensic psychology, criminology, international security and IR in general.

THE USE AND MISUSE OF THE EXPERIMENTAL METHOD IN SOCIAL PSYCHOLOGY

A CRITICAL EXAMINATION OF CLASSICAL RESEARCH

Routledge **This book critically examines the work of a number of pioneers of social psychology, including legendary figures such as Kurt Lewin, Leon Festinger, Muzafer Sherif, Solomon Asch, Stanley Milgram, and Philip Zimbardo. Augustine Brannigan argues that the reliance of these psychologists on experimentation has led to questions around validity and replication of their studies. The author explores new research and archival work relating to these studies and outlines a new approach to experimentation that repudiates the use of deception in human experiments and provides clues to how social psychology can re-articulate its premises and future lines of research. Based on the author's 2004 work The Rise and Fall of Social Psychology, in which he critiques the experimental methods used, the book advocates for a return to qualitative methods to redeem the essential social dimensions of social psychology. Covering famous studies such as the Stanford Prison Experiment, Milgram's studies of obedience, Sherif's Robbers Cave, and Rosenhan's exposé of psychiatric institutions, this is essential and fascinating reading for students of social psychology, and the social sciences. It's also of interest to academics and researchers interested in engaging with a**

critical approach to classical social psychology, with a view to changing the future of this important discipline.

DOMESTIC VIOLENCE AND PSYCHOLOGY

CRITICAL PERSPECTIVES ON INTIMATE PARTNER VIOLENCE AND ABUSE

Routledge **Despite changes to laws and policies across most western democracies intended to combat violence to women, intimate partner violence and abuse (IPVA) remains discouragingly commonplace. Domestic Violence and Psychology: Critical Perspectives on Intimate Partner Violence and Abuse showcases women's harrowing stories of living with and leaving violent partners, offering a psychological perspective on domestic violence and developing a theoretical framework for examining the context, intentions and experiences in the lives of people who experience abuse and abuse themselves. Nicolson provides an analysis of survivors' real-life stories, and thoughts about IPVA. The attitudes of the general public and health and social care professionals are also presented and discussed. The theoretical perspective employs three levels of evidence - the material (context), discursive (explanations) and intrapsychic (emotional). Domestic Violence and Psychology is divided into three parts accordingly, engaging qualitative data from interviews and quantitative data from surveys to illustrate these theoretical perspectives. Although many pro-feminist sociologists and activists firmly believe that any attempt to explain domestic violence potentially condones it, this book takes up the challenge to make a compelling case demonstrating how we need to widen understanding of the psychology of survivors and their intimate relationships if we are to defeat IPVA. The new edition has been updated to include the latest developments in IPVA research and practice, and in particular examines the impact of a violent and abusive family life on all members, including children. This is essential reading for students, academics and professionals interested in domestic abuse, as well as professionals and practitioners, including psychologists, social workers, the police, prison officers, probation staff, policy makers, and charity workers.**

PSYCHOLOGY OF GENDER

FIFTH EDITION

Routledge Noted for its fair and equal coverage of men and women, this book reviews the research and issues surrounding gender from multiple perspectives including psychology, sociology, anthropology, and public health, with an emphasis on the interaction between biological and social theories. The implications of social roles, status, and gender-related traits on relationships and health that are central to students' daily lives are emphasized throughout. Students learn how to distinguish the similarities and differences between the sexes and the theories that explain the differences. Methodological flaws that may impact the observance of sex differences are also examined. Learning activities and pedagogical tools included in the text: Do Gender exercises which provide an opportunity to test hypotheses and explore data Sidebars on special interest topics and numerous visuals that bring the studies to life Take Home Points that summarize key concepts in bulleted format Boldfaced key terms and definitions, chapter summaries, discussion questions, and suggested readings which help students review the material New to the 5th Edition: Expanded sections on cohabitation, homosexuality, online relationships, social media influences, single-sex classrooms, sex differences in math abilities, and gender implications of divorce on health Expanded coverage of gender and parenting, gender and the workplace, gender and power, and balancing work and family An expanded intersectional approach that highlights how gender is connected to social class, race, and ethnicity, including more coverage of gender system justification theory Coverage of transgender issues including recent changes in the DSM guidelines Streamlined discussions to further engage students to think about gender issues A companion website at www.routledge.com/cw/Helgeson where instructors will find Power Point slides, multiple choice quizzes, and short answer questions with suggested answers for each chapter; and students will find flashcards of key terms, chapter outlines, and links to related websites and further reading Divided into three parts, each section builds on the previous one. First, gender and the development of gender roles across cultures are introduced. Scientific methods used to study gender, attitudes toward gender, and the latest data and theories on sex differences in cognitive, social, and emotional domains are then introduced. Theories of gender-role development, including evolutionary, social learning, social role, and gender schema theories are reviewed along with the implications of gender on achievement. Part one reviews the key information on the similarities and differences between the sexes and the theories that explain the differences which lay the foundation for the remainder of the book. Part two examines the role of gender in

relationships including communication styles and the impact of these interactions on friendship and romantic relationships. The third part examines the role of gender on physical and mental health. The effects of marriage and parenting on health are reviewed, including domestic abuse, along with how gender affects the association between work and health. This is an ideal text for upper level gender-focused courses including the psychology of gender, psychology of women or men, gender issues, and gender, women's, or men's studies taught in psychology, women's studies, gender studies, sociology, and anthropology.
