The Administration of Justice in Criminal Matters (in England and Wales) (Classic Reprint)

Excerpt from *The Administration of Justice in Criminal Matters (in England and Wales)* The first edition of this book was published in 1911, as a volume of the Cambridge Manuals of Science and Literature. That edition being almost exhausted, it has been thought well to republish it in an enlarged form, as likely to prove useful to a considerable class of readers. In its present form it is intended to serve as a first book for newly appointed Justices of the Peace, superior police officers, and law students; but it is hoped that it will also appeal to a larger class of general readers who are interested in subjects bordering on the domain of law, history, politics, and sociology. It will be seen that it has a wider scope than the ordinary law book, as it not only gives a survey of the whole field of the administration of the Criminal Law as a working system, with some comments thereon, but also shows the connection between Criminal Law and our system of government. Another object kept steadily in view has been to show the spirit in which our Criminal Law is administered and which pervades every part of it. It is not intended to serve as a mere text-book, or book of practice, since it deals with the broad outlines of the system and not with details; but it may possibly serve as an introduction to such old and well-established works as Stone's Justices' Manual, the Magistrate's General Practice, and Archbold's Criminal Pleading and Evidence, the size of which has become formidable. Crime in England & Wales in the Nineteenth Century

An Historical and Critical Retrospect

Frauds and Financial Crimes

Trends, Strategic Responses, and Implementation Issues in England and Wales

Routledge This edited volume provides a contemporary overview of major issues and control strategies associated with fraud and financial crime, including prevention, public ethics, compliance mechanisms, and law enforcement in England and Wales. The UK - and in particular, England & Wales - has had a number of public strategies and plans to address fraud and financial crime, beginning (in this edited volume) with the 2008 National Fraud Strategy and now including, most recently, the 2020 Local Government Fraud and Corruption strategy, the 2019 Economic Crime Plan and National Fraud Policing Strategy, the 2018 Serious and Organised Crime Strategy, and the 2017 Anti-Corruption Plan. All, together with a number of past, existing, reconfigured and new institutions and procedures, reflect a continuing collective response to emerging issues and themes in fraud and financial crime. *Frauds and Financial Crimes: Trends, Strategic Responses and Implementation Issues in England and Wales* contributes insights about the continuing interplay of strategic responses, priorities and implementation in an era of budget reductions, competing local and national agendas and a continuing absence of joined-up oversight and ownership. Drawing on both academic and practitioner experts, the book seeks to explore a range of important themes, including: the gaps between strategic intentions and practice on the ground; different approaches to the same issue; labelling of crimes as 'organised' and/or 'economic'; collaborative public-private and inter-agency approaches and problem ownership; the role of prevention; and the translation of experience upwards and policy downwards in development and implementation. In doing so, it seeks to inform more effective strategic responses to fraud and financial crime. The chapters in this book were originally published in the journal *Public Money and Management*.

American Exceptionalism in Crime and Punishment

Oxford University Press The idea of American exceptionalism has made frequent appearances in discussions of criminal justice policies--as it has in many other areas--to help portray or explain problems that are especially acute in the U.S., including mass incarceration, retention of the death penalty, racial and ethnic disparities, and the War on Drugs. While scholars do not universally agree that it is an

apt or useful framework, there is no question that the U.S. is an outlier, when compared with other industrialized democracies, in its punitive and exclusionary criminal justice policies. This volume of essays deepens the debate of American exceptionalism in crime and punishment through comparative political, economic, and historical analyses, with an orientation toward forward-looking prescriptions for American law, policy, and institutions of government. The chapters expand the literature to neglected areas such as community supervision, parole release, and collateral consequences of conviction; explore claims of causation, in particular the view that the U.S. history of slavery and racial inequality has been a primary driver of crime policy; examine arguments that the framework of multiple governments and localized crime control, populist style of democracy, and laissez-faire economy are implicated in problems of both crime and punishment; and assess theories that cultural values are the most salient predictors of penal severity and violent crime. With an outstanding list of contributors edited by a leading authority on punishment, this volume demonstrates that the largest problems of crime and justice cannot be brought into focus from the perspective of single jurisdiction, and that comparative inquiries are necessary for an understanding of the current predicament in the US.

The Official History of Criminal Justice in England and Wales

Volume IV: The Politics of Law and Order

Taylor & Francis This book is Volume IV in the Official History of Criminal Justice in England and Wales. Previous volumes have focused on the moral reforms of the 1960s, the changes to the criminal courts and the introduction of an independent prosecution service, and the broad shifts in penal policy that have taken place in the post-war era. This volume examines the changing politics of law and order, charting the gradual shift toward greater political conflict and dispute. Until the early 1970s law and order rarely occupied a privileged place in political debate. From that point this began to change with, initially, the Conservatives utilising crime and penal policy as a means of distinguishing themselves from their opponents. This volume charts these changes in the politics of law and order and examines the rise in the temperature of political debate around such issues as the Labour Party markedly shifted its direction in the 1990s. This book will be of interest to students of British political history, criminology and sociology.

Preliminary Injunctions: Germany, England/Wales, Italy and France

Kluwer Law International B.V. Every legal system, at the outset of court proceedings, has rules aimed at safeguarding parties' interests during the time needed to obtain a judgment on the merits. However, as the European Commission put the case in a 1997 communication, 'a comparative survey of national legislation reveals that there are virtually no definitions of provisional/protective measures and that the legal situations vary widely. The only convergence that can be ascertained is between the function of such measures.' Recognizing that after almost twenty years the issues noted by the Commission have not found a satisfactory solution, here at last is a book that collects and compares the ideas behind the 'preliminary injunction' (an expression the authors use as a general term for a great variety of provisional and precautionary measures) with an eye to defining and organizing this small but very important aspect of the law. Although the analysis touches on relevant measures from many countries, the authors focus on the national legislation in four EU Member States - England, France, Germany, and Italy - to highlight the nature of the differences these kinds of measures entail. They compare and contrast such aspects as the following: - differences in civil procedure; - the types of measures that may be taken; - the terms on which preliminary injunctions, which are normally directly enforceable, may be ordered by a court; - the kind of assets that may be affected; - the relationship between proceedings in an interlocutory action and proceedings on the substance; - necessity of credible evidence that immediate and irreparable injury, loss, or damage will result if no preliminary injunction is granted; and - the role of protective measures in summary proceedings. The study also describes and examines the recent European order for payment (EC Regulation No. 1896/2006), the most significant existing transnational instrument aimed at granting preliminary protection of creditors' rights. This incomparable book represents a major contribution to a growing debate, particularly in Europe, on ways and means of securing equivalent protection for all litigants. Given the variety of legal systems and of measures available, the debate will have to focus on the functions served by provisional/protective measures, the minimum conditions to be satisfied, the adversary procedure requirement, the enforceability of the measures, and possible redress procedures. There is no more thorough and reliable resource available to clarify these issues for practitioners and interested policymakers everywhere.

The Criminal Cases Review Commission

Hope for the Innocent?

Springer This book focuses on the world's first publicly-funded body- the Criminal Cases Review Commission- to review alleged miscarriages of justice, set up following notorious cases such as the Birmingham Six in the UK. Providing a critique of its operations, the book shows that its help to innocent victims of wrongful conviction is merely incidental.

Challenges in Criminal Justice

Taylor & Francis This collection examines contemporary challenges to the criminal justice system in England and Wales. The chapters, written by established academics, rising stars and practising lawyers, seek not only to highlight these challenges but to offer solutions. The book examines issues with legal assistance in the police station, concerns relating to juror decision making and problems in and presented by both virtual hearings and the advent of the Single Justice Procedure Notice. The work also examines challenges surrounding vulnerability in the criminal justice system. Here, diversity includes vulnerability in the criminal trial, neurodivergence as well as issues with diversity and marginalisation in the criminal justice system as a whole. The book also discusses matters centred around sexual offending – including the attrition rate in rape cases as well as the recent development of ‘vigilante’ paedophile hunters and their acceptance as a viable limb of the criminal justice system. Finally, the volume looks at the post-conviction stage and examines recent prison policy through the lens of the human rights of the prisoner. The closing chapter examines the independence of the Criminal Cases Review Commission and highlights how recent changes have undermined this. While focused on England and Wales, the topics discussed are of wider international significance and will be of interest to students, academics and policy-makers.

Prisons, Politics and Practices in England and Wales 1945-2020

The Operational Management Issues

Springer Nature This book presents both a survey of and commentary upon the penal process of England and Wales between 1945 and 2020 from the primary perspective of prisons and their operational management. Part I focusses on the extent to which governmental politics, changing concepts in penology and significant events affected the performance and management of prisons during four key periods: 1945-1991; 1991-1997; 1997-2007 and 2007-2020. Part II presents a vision for more effective operation of prisons within the wider penal process in the 2020s and beyond. It draws upon the author's academic insights and his experience as a former prison governor. This book speaks to those in the social sciences, law and politics and to professionals in government and in the penal system who are interested in reform. David J. Cornwell is former Prison Governor and Consultant Criminologist focusing predominantly on issues in penal philosophy, criminal punishment, restorative justice and mediation. He is the author of seven previous books in the fields of criminology, penology and philosophy. He completed both his Masters and Doctoral degrees at York University, UK.

Land of White Gloves?

A history of crime and punishment in Wales

Routledge Land of White Gloves? is an important academic investigation into the history of crime and punishment in Wales. Beginning in the medieval period when the limitations of state authority fostered a law centred on kinship and compensation, the study explores the effects of the introduction of English legal models, culminating in the Acts of Union under Henry VIII. It reveals enduring traditions of extra-legal dispute settlement rooted in the conditions of Welsh Society. The study examines the impact of a growing bureaucratic state uniformity in the nineteenth century and concludes by examining the question of whether distinctive features are to be found in patterns of crime and the responses to it into the twentieth century. Dealing with matters as diverse as drunkenness and prostitution, industrial unrest and linguistic protests and with punishments ranging from social ostracism to execution, the book draws on a wide range of sources, primary and secondary, and insights from anthropology, social and legal history. It presents a narrative which explores the nature and development of the state, the theoretical and practical limitations of the criminal law and the relationship between law and the society in which it operates. The book will appeal to those who wish to examine the relationships between state control and social practice and explores the material in an accessible way, which will be both useful and fascinating to those interested in the history of Wales and of the history of crime and punishment more generally.

Debates in Criminal Justice

Key Themes and Issues

Routledge This innovative new book recognises that, while criminal justice studies is a core component of all criminology/criminal justice undergraduate degrees, it can be a confusing, overwhelming and a relatively dry topic despite its importance. Taking an original approach, this book sets out a series of ten key dilemmas - presented as debates - designed to provide students with a clear framework within which to develop their knowledge and analysis in a way that is both effective and an enjoyable learning experience. It is also designed for use by lecturers, who can structure a core unit of their courses around it. *Debates in Criminal Justice* provides a new and dynamic framework for learning, making considerable use of the other already available academic key texts, press articles, web sources and more.

A Practical Guide to Criminal and Regulatory Proceedings in Consumer Protection Matters

The legal profession is going through a period of unparalleled change necessitated, in part, by the growth in criminalisation of matters which in a previous era may have been dealt with in the civil courts or even by way of commercial resolution. In part this has been fueled by the growth of the consumer movement and its reinforcement by the law, originally stemming from Europe but now very much enshrined in English domestic law. *A Practical Guide to Criminal & Regulatory Proceedings in Consumer Protection Matters* explains how the law has developed to the point it is now at and sets out how this is now enforced in English courts. Both sides of the civil and criminal landscape are examined as is the way in which the regulations are applied to traders and consumers. The book addresses the powers of investigation which are created by the various pieces of Consumer focused legislation now in force as well as the criminal offences which can arise. It also explores the steps in case preparation which lawyers may be advised to follow especially given some of the legal presumptions which apply in these type of cases. ABOUT THE AUTHOR Richard Gibbs gained his original degree in Political Science and History at University College Dublin; he converted to law at Birmingham University before reading for the BPTC at the University of Law and then being called to the Bar by The Honourable Society of the Inner Temple where he won the Lawson moot. He is a practicing barrister prosecuting and defending in regulatory and criminal cases across England & Wales. He has a strong interest in non-CPS prosecutions and has extensive experience of defending individuals and companies in matters relating to Trading Standards and Health and Safety offences. In addition to his practice at the Bar, he is a Visiting Lecturer at the University of Law lecturing aspiring barristers and solicitors in law and the fundamentals of legal practice. He has been a regular contributor to legal journals since becoming a barrister in 2012. He has appeared on the BBC as a commentator on criminal sentencing and regularly delivers training to police in criminal justice matters. Richard lives with his wife and daughter in Worcestershire.

Crime in England 1688-1815

Routledge *Crime in England 1688-1815* covers the 'long' eighteenth century, a period which saw huge and far-reaching changes in criminal justice history. These changes included the introduction of transportation overseas as an alternative to the death penalty, the growth of the magistracy, the birth of professional policing, increasingly harsh sentencing of those who offended against property-owners and the rapid expansion of the popular press, which fuelled debate and interest in all matters criminal. Utilising both primary and secondary source material, this book discusses a number of topics such as punishment, detection of offenders, gender and the criminal justice system and crime in contemporaneous popular culture and literature. This book is designed for both the criminal justice history/criminology undergraduate and the general reader, with a lively and immediately approachable style. The use of carefully selected case studies is designed to show how the study of criminal justice history can be used to illuminate modern-day criminological debate and discourse. It includes a brief review of past and current literature on the topic of crime in eighteenth-century England and Wales, and also emphasises why knowledge of the history of crime and criminal justice is important to present-day criminologists. Together with its companion volumes, it will provide an invaluable aid to both students of criminal justice history and criminology.

The Administration of Civil Justice in England and Wales

The Commonwealth and International Library: Pergamon Modern Legal Outlines

Elsevier *The Administration of Civil Justice in England and Wales* provides information of how both criminal and civil law is administered. This book discusses the jurisdiction and composition of the country courts, civil work of the magistrates' courts, as well as of the High Court of Justice. Organized into 12 chapters, this book begins with an overview of the historical origins from which the modern courts have emerged. This text then explains the various strata of courts, namely country courts, magistrates' courts, the Court of Justice including its various divisions, and the appeal facilities that are available to litigants. Other chapters consider the different administrative tribunals and inquiries. The final chapter deals with the costs and the availability of legal aid and advice. This book is a valuable resource for readers who are interested in the administration of civil and criminal justice. Law students and newly qualified practitioners will also find this book useful.

Criminal Justice

An Introduction to the Criminal Justice System in England and Wales

Pearson Education Criminal Justice provides information about the various agencies of the criminal justice system, their legal responsibilities, and the social and political context in which they operate. It outlines important concepts in English criminal law and defines crime and the varied responses to it. It also explores the non-legal factors which affect the operation of the criminal justice agencies and identifies the policy issues involved in the control of crime and the pursuit of justice.
