Triumph of the City

How Our Greatest Invention Makes Us Richer, Smarter, Greener, Healthier, and Happier

Penguin Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 "A masterpiece." —Steven D. Levitt, coauthor of Freakonomics "Bursting with insights." —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

Historical Painting Techniques, Materials, and Studio Practice

Preprints of a Symposium, University of Leiden, the Netherlands, 26–29 June 1995

Getty Publications Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Biosafety in Microbiological and Biomedical Laboratories

Future Directions for the Demography of Aging

Proceedings of a Workshop

National Academies Press Almost 25 years have passed since the Demography of Aging (1994) was published by the National Research Council. Future Directions for the Demography of Aging is, in many ways, the successor to that original volume. The Division of Behavioral and Social Research at the National Institute on Aging (NIA) asked the National Academies of Sciences, Engineering, and Medicine to produce an authoritative guide to new directions in demography of aging. The papers published in this report were originally presented and discussed at a public workshop held in Washington, D.C., August 17–18, 2017. The workshop discussion made evident that major new advances had been made in the last two decades, but also that new trends and research directions have emerged that call for innovative conceptual, design, and measurement approaches. The report reviews these recent trends and also discusses future directions for research on a range of topics that are central to current research in the demography of aging. Looking back over the past two decades of demography of aging research shows remarkable advances in our understanding of the health and well-being of the older population. Equally exciting is that this report sets the stage for the next two decades of innovative research—a period of rapid growth in the older American population.

The Jane Addams Papers

Occupational Health and Safety in the Care and Use of Research Animals

National Academies Press Much has been written about the care of research animals. Yet little guidance has appeared on protecting the health and safety of the people who care for or use these animals. This book, an implementation handbook and companion to Guide For the Care and Use of Laboratory Animals, identifies principles for building a program and discusses the accountability of institutional leaders, managers, and employees for a program's success. It provides a detailed description of risks—physical and chemical hazards, allergens and zoonoses, and hazards from experiments—which will serve as a continuing reference for the laboratory. The book offers specific recommendations for controlling risk through administrative procedures, facility design, engineering controls, and periodic evaluations. The volume focuses on the worker, with detailed discussions of work practices, the use of personal protective gear, and the development of an emergency response plan. This handbook will be invaluable to administrators, researchers, and employees in any animal research facility. It will also be of interest to personnel in zoos, animal shelters, and veterinary facilities.

Before Roe V. Wade

Voices that Shaped the Abortion Debate Before the Supreme Court's Ruling

"As the landmark Roe v. Wade decision reaches its 40th anniversary, abortion remains a polarizing topic on America's legal and political landscape. Blending history, culture, and law, Before Roe v. Wade explores the roots of the conflict, recovering through original documents and first-hand accounts the voices on both sides that helped shape the climate in which the Supreme Court ruled. Originally published in 2010, this new edition includes a new Afterword that explores what the history of conflict before Roe teaches us about the abortion conflict we live with today. Examining the role of social movements and political parties, the authors cast new light on a pivotal chapter in American history and suggest how Roe v. Wade, the case, because Roe v. Wade, the symbol."—Cover, p. 4.

Life After Logging

Reconciling Wildlife Conservation and Production Forestry in Indonesian Borneo

CIFOR This book presents a technical review of ecological and life history information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

From Environmental to Comprehensive Security

Springer Science & Business Media This work presents the evolution of the traditional concept of "national security" as military security to additionally embrace "environmental security" and then necessarily also "social (societal) security", thence to be termed "comprehensive human security". It accomplishes this primarily by presenting 11 of the author's own benchmark papers published between 1983 and 2010 (additionally providing bibliographic citations to a further 36 of the author's related publications during that period). The work stresses the importance of transfrontier (regional) cooperation, and also recognizes global overpopulation as a key impediment to achieving comprehensive human security.

Ceramic Conductors

MDPI This Special Issue of Crystals contains papers focusing on various properties of conducting ceramics. Multiple aspects of both the research and application of this group of materials have been addressed. Conducting ceramics are the wide group of mostly oxide materials which play crucial roles in various technical applications, especially in the context of the harvesting and storage of energy. Without ion-conducting oxides, such as yttria-stabilized zirconia, doped ceria devices such as solid oxide fuel cells would not exist, not to mention the wide group of other ion conductors which can be applied in batteries or even electrolyzers, besides fuel cells. The works published in this Special Issue tackle experimental results as well as general theoretical trends in the field of ceramic conductors, or electroceramics, as it is often referred to.

Imagined Communities

Reflections on the Origin and Spread of Nationalism

Verso Books The definitive, bestselling book on the origins of nationalism, and the processes that have shaped it. *Imagined Communities*, Benedict Anderson's brilliant book on nationalism, forged a new field of study when it first appeared in 1983. Since then it has sold over a quarter of a million copies and is widely considered the most important book on the subject. In this greatly anticipated revised edition, Anderson updates and elaborates on the core question: what makes people live and die for nations, as well as hate and kill in their name? Anderson examines the creation and global spread of the 'imagined communities' of nationality, and explores the processes that created these communities: the territorialization of religious faiths, the decline of antique kinship, the interaction between capitalism and print, the development of secular languages-of-state, and changing conceptions of time and space. He shows how an originary nationalism born in the Americas was adopted by popular movements in Europe, by imperialist powers, and by the movements of anti-imperialist resistance in Asia and Africa. In a new afterword, Anderson examines the extraordinary influence of *Imagined Communities*, and the book's international publication and reception, from the end of the Cold War era to the present day.

Setting the Table for Julia Child

Gourmet Dining in America, 1934–1961

Johns Hopkins University Press The movement may have introduced affluent Americans to the pleasure of French cuisine years before Julia Child, but it was Julia's lessons that expanded the audience for gourmet dining and turned lovers of French cuisine into cooks.

Fads and Fallacies in the Name of Science

Courier Corporation Fair, witty appraisal of cranks, quacks, and quackeries of science and pseudoscience: hollow earth, Velikovsky, orgone energy, Dianetics, flying saucers, Bridey Murphy, food and medical fads, and much more.

Engaging Contradictions

Theory, Politics, and Methods of Activist Scholarship

Univ of California Press Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas

Pioneering Women in American Mathematics

The Pre-1940 PhD's

American Mathematical Soc. More than 14 percent of the PhD's awarded in the United States during the first four decades of the twentieth century went to women, a proportion not achieved again until the 1980s. This book is the result of a study in which the authors identified all of the American women who earned PhD's in mathematics before 1940, and collected extensive biographical and bibliographical information about each of them. By reconstructing as complete a picture as possible of this group of women, Green and LaDuke reveal insights into the larger scientific and cultural communities in which they lived and worked. The book contains an extended introductory essay, as well as biographical entries for each of the 228 women in the study. The authors examine family backgrounds, education, careers, and other professional activities. They show that there were many more women earning PhD's in mathematics before 1940 than is commonly thought. Extended biographies and bibliographical information are available from the companion website for the book: www.ams.org/bookpages/hmath-34. The material will be of interest to researchers, teachers, and students in mathematics, history of mathematics, history of science, women's studies, and sociology. The data presented about each of the 228 individual members of the group will support additional study and analysis by scholars in a large number of disciplines.

The Grand Domestic Revolution

A History of Feminist Designs For American Homes, Neighborhoods, and Cities

MIT Press "This is a book that is full of things I have never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, *The New York Times Book Review* Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent women, who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history

of a little-known intellectual tradition challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

Making Healthcare Safe

The Story of the Patient Safety Movement

Springer Nature This unique and engaging open access title provides a compelling and ground-breaking account of the patient safety movement in the United States, told from the perspective of one of its most prominent leaders, and arguably the movement's founder, Lucian L. Leape, MD. Covering the growth of the field from the late 1980s to 2015, Dr. Leape details the developments, actors, organizations, research, and policy-making activities that marked the evolution and major advances of patient safety in this time span. In addition, and perhaps most importantly, this book not only comprehensively details how and why human and systems errors too often occur in the process of providing health care, it also promotes an in-depth understanding of the principles and practices of patient safety, including how they were influenced by today's modern safety sciences and systems theory and design. Indeed, the book emphasizes how the growing awareness of systems-design thinking and the self-education and commitment to improving patient safety, by not only Dr. Leape but a wide range of other clinicians and health executives from both the private and public sectors, all converged to drive forward the patient safety movement in the US. Making Healthcare Safe is divided into four parts: I. In the Beginning describes the research and theory that defined patient safety and the early initiatives to enhance it. II. Institutional Responses tells the stories of the efforts of the major organizations that began to apply the new concepts and make patient safety a reality. Most of these stories have not been previously told, so this account becomes their histories as well. III. Getting to Work provides in-depth analyses of four key issues that cut across disciplinary lines impacting patient safety which required special attention. IV. Creating a Culture of Safety looks to the future, marshalling the best thinking about what it will take to achieve the safe care we all deserve. Captivatingly written with an "insider's" tone and a major contribution to the clinical literature, this title will be of immense value to health care professionals, to students in a range of academic disciplines, to medical trainees, to health administrators, to policymakers and even to lay readers with an interest in patient safety and in the critical quest to create safe care.

Pioneers in Leisure and Recreation

Amer Alliance for Health Physical This book consists of brief biographies of people who have contributed to the field of leisure and recreation. The 26 pioneers chronicled span over two thousand years and cross many cultures. Some are theorists, others are practitioners, but all of them left their imprint on the leisure and recreation field. Arranged sequentially by dates, the book includes Aristotle, Cicero, and Seneca across the years to Foster R. Dulles and Charles Brightbill. (JD)

Cubism and Abstract Art

Routledge Originally published in 1936, in this classic account of the development of abstract art Alfred Barr analyses the many diverse abstract movements which emerged with bewildering rapidity in the early years of the twentieth century, and which had an impact on every major form of art. Barr traces the history of nonrepresentational art from its antecedents in late nineteenth-century painting in France – Seurat and Neo-Impressionism, Gauguin and Synthetism, and Cézanne – through abstract tendencies in Dada and Surrealism. He distinguishes two main trends in abstract art: the geometrical, structural current as it developed in Cubism and later in Constructivism and Mondrian, and the intuitional, decorative current running from Matisse and Fauvism through Kandinskij and, later, Surrealism. He shows how individual movements influenced one another, and how many artists experimented with more than one style. Barr also discusses the involvement of a number of abstract movements in architecture and the practical arts – the Bauhaus in Germany, de Stijl in Holland, Purism in France, and Suprematism and Constructivism in Russia.

The Curious Feminist

Searching for Women in a New Age of Empire

Univ of California Press In this collection of lively essays, Cynthia Enloe makes better sense of globalization and international politics by taking a deep and personal look into the daily realities in a range of women's lives. She proposes a distinctively feminist curiosity that begins with taking women seriously, especially during this era of unprecedented American influence. This means listening carefully, digging deep, challenging assumptions, and welcoming surprises. Listening to women in Asian sneaker factories, Enloe reveals, enables us to bring down to earth the often abstract discussions of the global economy. Paying close attention to Iraqi women's organizing efforts under military occupation exposes the false global promises made by officials. Enloe also turns the beam of her inquiry inward. In a series of four candid interviews and a new set of autobiographical pieces, she reflects on the gradual development of her own feminist curiosity. Describing her wartime suburban girlhood and her years at Berkeley, she maps the everyday obstacles placed on the path to feminist consciousness—and suggests how those obstacles can be identified and overcome. The Curious Feminist shows how taking women seriously also challenges the common assumption that masculinities are trivial factors in today's international affairs. Enloe explores the workings of masculinity inside organizations as diverse as the American military, a Serbian militia, the UN, and Oxfam. A feminist curiosity finds all women worth thinking about, Enloe claims. She suggests that we pay thoughtful attention to women who appear complicit in violence or in the oppression of others, or too cozily wrapped up in their relative privilege to inspire praise or compassion. Enloe's vitality, passion, and incisive wit illuminate each essay. The Curious Feminist is an original and timely invitation to look at global politics in an entirely different way.

Data-Driven 3D Facial Animation

Springer Science & Business Media Data-Driven 3D Facial Animation systematically describes the important techniques developed over the last ten years or so. Comprehensive in scope, the book provides an up-to-date reference source for those working in the facial animation field.

Encyclopedia of Prehistory

Volume 1: Africa

Springer The Encyclopedia of Prehistory represents also defined by a somewhat different set of an attempt to provide basic information sociocultural characteristics than are eth on all archaeologically known cultures, nological cultures. Major traditions are covering the entire globe and the entire defined based on common subsistence prehistory of humankind. It is designed as practices, sociopolitical organization, and a tool to assist in doing comparative material industries, but language, ideology, research on the peoples of the past. Most and kinship ties play little or no part in of the entries are written by the world's their definition because they are virtually foremost experts on the particular areas unrecoverable from archaeological con and time periods. texts. In contrast, language, ideology, and The Encyclopedia is organized accord kinship ties are central to defining ethno ing to major traditions. A major tradition logical cultures. is defined as a group of populations sharing There are three types of entries in the similar subsistence practices, technology, Encyclopedia: the major tradition entry, and forms of sociopolitical organization, the regional sub tradition entry, and the which are spatially contiguous over a rela site entry. Each contains different types of tively large area and which endure tempo information, and each is intended to be rally for a relatively long period. Minimal used in a different way.

Scientific Data Mining A Practical Perspective

SIAM Chandrika Kamath describes how techniques from the multi-disciplinary field of data mining can be used to address the modern problem of data overload in science and engineering domains. Starting with a survey of analysis problems in different applications, it identifies the common themes across these domains.

Intrinsic and Extrinsic Motivation

The Search for Optimal Motivation and Performance

*Elsevier In understanding human behavior, psychologists have long been interested in what motivates specific actions. Debates have pitted extrinsic motivators (e.g. rewards/punishment) against intrinsic motivation in attempting to determine what best motivates individuals. This book provides a summary view of what research has determined about both extrinsic and intrinsic motivation, and clarifies what questions remain unanswered. Divided into three sections, section I revisits the debate about the effects of extrinsic incentives or constraints on intrinsic motivation and creativity, and identifies theoretical advances in motivational research. Section II focuses on the hidden costs and benefits of different types of achievement goals on motivation and performance. Section III discusses theory and research findings on how extrinsic and intrinsic motivators may work in everyday life and over time. This book is of interest to researchers in psychology, education, and business, as well as to a wider audience interested in promoting optimal motivation and performance. Coverage in this book includes: * Debates and controversies in motivational research * Developmental nature of intrinsic and extrinsic motivation over time * Influences of parents, educators, and employers in facilitating motivation * Effect of achievement goals on learning and performance * The role of intrinsic and extrinsic motivation in self-regulation Key Features * Brings together major figures in the fields of motivation, education, and social psychology * Provides a mix of theory, basic and applied research * Presents research conducted both in laboratories and educational settings * Comprehensive chapters provide excellent reviews of previous literature as well as outlines important new directions * Provides different perspectives on controversial debates in a balanced, constructive manner*

Science and Empires

Historical Studies about Scientific Development and European Expansion

Springer Science & Business Media SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group, of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Handbook of Clinical Obstetrics

The Fetus and Mother

John Wiley & Sons The second edition of this quick reference handbook for obstetricians and gynecologists and primary care physicians is designed to complement the parent textbook Clinical Obstetrics: The Fetus & Mother The third edition of Clinical Obstetrics: The Fetus & Mother is unique in that it gives in-depth attention to the two patients - fetus and mother, with special coverage of each patient. Clinical Obstetrics thoroughly reviews the biology, pathology, and clinical management of disorders affecting both the fetus and the mother. Clinical Obstetrics: The Fetus & Mother - Handbook provides the practising physician with succinct, clinically focused information in an easily retrievable format that facilitates diagnosis, evaluation, and treatment. When you need fast answers to specific questions, you can turn with confidence to this streamlined, updated reference.

Black Racialization and Resistance at an Elite University

University of Toronto Press The presence and experiences of Black people at elite universities have been largely underrepresented and erased from institutional histories. This book engages with a collection of these experiences that span half a century and reflect differences in class, gender, and national identifications among Black scholars. By mapping Black people's experiences of studying and teaching at McGill University, this book reveals how the "whiteness" of the university both includes and exceeds the racial identities of students and professors. It highlights the specific functions of Blackness and of anti-Blackness within society in general and within the institution of higher education in particular, demonstrating how structures and practices of the university reproduce interlocking systems of oppression that uphold racial capitalism, reproduce colonial relations, and promote settler nationalism. Critically engaging the work of Black learners, academics, organizers, and activists within this dynamic political context, this book underscores the importance of Black Studies across North America.

Handbook of Research on Techno-Entrepreneurship, Second Edition

How Technology and Entrepreneurship are Shaping the Development of Industries and Companies

Edward Elgar Publishing With chapters focusing on China, India, Southeast Asia and South America, the Handbook explores views on the new hot spots in techno-entrepreneurship development.

Handy-Book of Literary Curiosities

Who's Who of American Women, 1997-1998

Marquis Who's Who WHO'S WHO OF AMERICAN WOMEN is the one essential reference to depend on for accurate & detailed facts on American women of achievement. This new edition includes in-depth biographical profiles of prominent, accomplished women.

Critical Thinking

McGraw-Hill Humanities/Social Sciences/Languages Imagine a class where students are actively and personally engaged in thinking critically while also discovering how to apply those thinking skills in everyday life. Now imagine those same students confidently participating in class, working efficiently through the exercises outside class, and performing better in the course. With Connect Critical Thinking, students can achieve this success. Connect Critical Thinking is a first: a learning program with pedagogical tools that are anchored in research on critical thinking. Along with Moore & Parker's

engaging writing style and the wealth of topical exercises and examples that are relevant to students' lives. Connect Critical Thinking helps ensure that students can come to class confident and prepared. What other course provides students with skills they can apply so broadly to success in school and success in life?
