Sun Up, Sun Down

The Story of Day and Night

Capstone Follows the sun from dawn to dusk to explain how light rays travel, how shadows are formed, how the moon lights up the night sky, and more. Includes activity.

Lights Day and Night

The Science of How Light Works

Kids Can Press Ltd A charming and captivating exploration of the science of light. Where does light come from? How does it work? What is it made of? A girl and her cat find answers to these questions on a summertime journey of scientific discovery. The pair identify loads of examples of light, while exploring many fascinating topics: natural and artificial light; uses of light; opaque, translucent and transparent objects; absorbed, reflected and refracted light; and how the eye sees light. It's a gentle yet comprehensive introduction to light and all its mysteries. From stars in the sky to fireworks over a lake, our inquisitive guides shine a light on ... light!

What Makes Day and Night

Harper Collins 'Accompanied by NASA photographs and Dorros's colorful, lively drawings, the text explains the Earth's rotation in clear and simple terms. An experiment using a lamp as the 'sun' further clarifies the principles introduced.' —BL.

All the stories had first been published in various monthly periodicals and this was the first volume to collect these stories. contains "The Crystal Egg" "The Star" "A Story of the Stone Age" "A Story of the Days To Come" "The Man Who Could Work Miracles"

No Place Like Earth

Createspace Independent Publishing Platform A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents choose, this can be the start to a conversation about how we can take better care of our planet. Visit lorifettner.wordpress.com/no-place-like-earth/ to see sample pages from the interior.

Structophis

Joseph R. Lallo Structophis is a heartwarming YA adventure from the author of *The Book of Deacon*, *Bypass Gemini*, and *Free-Wrench*. It is based upon a concept and artwork by ProjectENDO. In a small town in Colorado, Markus Spiros was just getting his life on track. By day he worked as a veterinary tech, by night he took classes. His steady little routine was rolling along nicely when his impulsive Uncle Dimitrios threw a wrench in the works. Thanks to an unannounced trip, Markus had to swing by his uncle's bistro to tend to the 'special oven.' When he arrived, he discovered it wasn't the oven that was special, it was the rare and exotic egg that had been incubating inside it. And now it had hatched. Suddenly, Markus found his life had become a good deal more complicated. The creature was a Structophis Gastrignae—a strange creature that was equal parts dragon and oven—and she'd become quite a big girl. Large as a refrigerator and curious as a toddler, the creature he'd dubbed Blodgette would have been a handful in any situation. Markus had bigger problems than figuring out how to take care of her, though. Owning such a rare and special beast was illegal, so should the cops learn of it, Markus would be destined for jail. Worse, there were certain unscrupulous people who would do anything to acquire Blodgette. Now, with the help of his old classmate Gale, Markus must scramble to stay two steps ahead of the authorities and a corrupt CEO, all while being the best 'mommy' he can be to his brand-new pizza dragon.

Early Years Non-Fiction

A Guide to Helping Young Researchers Use and Enjoy Information Texts

Routledge This lively and informative text examines children's first experience of non-fiction during the pre-school and foundation years. Its careful consideration of different kinds of quality non-fiction, including books, posters, charts and computer software will provide a helpful framework from which early years teachers can work. Annotated lists, notes, and suggestions for further reading make this an ideal source of inspiration and stimulation placing literacy teaching in a fresh, modern context. This book offers a rich resource of information, with illustrated case studies and many examples of children's responses to non-fiction providing: coverage of pre-school and foundation years for children up to six years of age references to research findings on the place of non-fiction in early years references to the National Literacy Strategy, Early Learning Goals and the National Curriculum for English a substantial glossary of terms relevant to non-fiction reading and writing. The author's zest and expertise helps to give this book an infectious enthusiasm that will permeate the classroom, providing the nursery and primary school teacher, student teacher, or classroom assistant with an invaluable guide and resource tool.

Famous Comets and Asteroids in Our Solar System! Space Science for Kids - Children's Astronomy & Space Books

Piffikus What are comets? What are asteroids? What makes them famous? Discover some of the most popular comets and asteroids that have even passed earth! Open this book to know about the circumstances of their passing, as well as the brilliant astronomers who saw them coming. Grab a copy of this educational resource today!

The Birth of Earth! - Fun Facts about the Forces That Shaped Planet Earth. Earth Science for Kids - Children's Earth Sciences Books

Prodigy Wizard Books This workbook has three main purposes. The first of which is, of course, to improve handwriting skills. This involves the strengthening of the tiny hand muscles for better grip and control. The second purpose is to encourage reading of written texts. And the third purpose is to improve your child's understanding of the Bible by reading and writing.

Drawn to Enchant

Original Children's Book Art in the Betsy Beinecke Shirley Collection

Yale University Press This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

I Am Earth

An Earth Day Book for Kids

I Am Earth introduces kids to the basic concepts of earth science while also encouraging the importance of taking care of our special planet through environmental awareness and sustainability. Keeping Earth a happy healthy place to live is important for everyone big and small. In this Earth science book for beginners, kids learn what makes our planet so uniquely special and how people can work together to keep it a healthy home.

Sarah

The Life of Sarah Bernhardt

Yale University Press Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

Optimism

An Essay

Genesis & Biblical Science Revealed

Xlibris Corporation As in the beginning, so is the end. Therefore, Genesis reveals Revelation. As we enter the end of the age, and the past integrates into the future, there is strange and forgotten knowledge that has been hidden in plain sight and behooving for us to know. This book examines Genesis from the creation to the flood and heretofore hidden, relevant Biblical science from a contrasted perspective. This type of perspective must be applied to uncover the hidden mysteries that historical interpretations ignore. The result is a surprising discovery that Biblical science is more advanced than credited. Glimpses, privileges and curiosity have been given to the author which resulted in this non - traditional interpretation and insights of relative tangents. By reading this, like the author, you are seeking the hidden treasures of Revelation that are opened to those who knock. For those Revelations, we who seek them, thank God.

Melanesian Stories

Marist Brothers in Solomon Islands and Papua New Guinea 1845-2003

Lawrence McCane Marist Brothers are a group of committed men whose mission is education, especially of the most needy students. Inspired by their founder's vision which encompassed the entire world, Brothers today reach out to all, wherever they are, with hearts that know no bounds. This book brings to life the stories of Marist Brothers' educational work in Solomon Islands and Papua New Guinea. From uncertain nineteenth century beginnings, through the turmoil of the Second World War, the Bougainville Crisis and the Solomon Island Ethnic Tensions, the story of the coming of age of an authentic Marist Melanesian Brotherhood unfolds in these pages.

Breathing Space

How Allergies Shape Our Lives and Landscapes

Yale University Press Allergy is the sixth leading cause of chronic illness in the United States. More than fifty million Americans suffer from allergies, and they spend an estimated \$18 billion coping with them. Yet despite advances in biomedicine and enormous investment in research over the past fifty years, the burden of allergic disease continues to grow. Why have we failed to reverse this trend? Breathing Space offers an intimate portrait of how allergic disease has shaped American culture, landscape, and life. Drawing on environmental, medical, and cultural history and the life stories of people, plants, and insects, Mitman traces how America's changing environment from the late 1800s to the present day has led to the epidemic growth of allergic disease. We have seen a never-ending stream of solutions to combat allergies, from hay fever resorts, herbicides, and air-conditioned homes to numerous potions and pills. But, as Mitman shows, despite the quest for a magic bullet, none of the attempted solutions has succeeded. Until we address how our changing environment—physical, biological, social, and economic—has helped to create America's allergic landscape, that hoped-for success will continue to elude us.

Galaxy Legend Short Stories Vol.11

Science Fiction Collection

VM eBooks Galaxy Science Fiction was an American digest-size science fiction magazine, published from 1950 to 1980. It was founded by an Italian company, World Editions, which was looking to break into the American market. World Editions hired as editor H. L. Gold, who rapidly made Galaxy the leading science fiction (sf) magazine of its time, focusing on stories about social issues rather than technology. Gold published many notable stories during his tenure, including Ray Bradbury's "The Fireman", later expanded as Fahrenheit 451; Robert A. Heinlein's The Puppet Masters; and Alfred Bester's The Demolished Man. In 1952, the magazine was acquired by Robert Guinn, its printer. By the late 1950s, Frederik Pohl was helping Gold with most aspects of the magazine's production. When Gold's health worsened, Pohl took over as editor, starting officially at the end of 1961, though he had been doing the majority of the production work for some time. Under Pohl Galaxy had continued success, regularly publishing fiction by writers such as Cordwainer Smith, Jack Vance, Harlan Ellison, and Robert Silverberg. However, Pohl never won the annual Hugo Award for his stewardship of Galaxy, winning three Hugos instead for its sister magazine, If. In 1969 Guinn sold Galaxy to Universal Publishing and Distribution Corporation (UPD) and Pohl resigned, to be replaced by Ejler Jakobsson. Under Jakobsson the magazine declined in quality. It recovered under James Baen, who took over in mid-1974, but when he left at the end of 1977 the deterioration resumed, and there were financial problems—writers were not paid on time and the schedule became erratic. By the end of the 1970s the gaps between issues were lengthening, and the title was finally sold to Galileo publisher Vincent McCaffrey, who brought out only a single issue in 1980. A brief revival as a semi-professional magazine followed in 1994, edited by H. L. Gold's son, E. J. Gold; this lasted for eight bimonthly issues. At its peak, Galaxy greatly influenced the science fiction field. It was regarded as one of the leading sf magazines almost from the start, and its influence did not wane until Pohl's departure in 1969. Gold brought a "sophisticated intellectual subtlety" to magazine science fiction according to Pohl, who added that "after Galaxy it was impossible to go on being naive." SF historian David Kyle agrees, commenting that "of all the editors in and out of the post-war scene, the most influential beyond any doubt was H. L. Gold". Kyle suggests that the new direction Gold set "inevitably" led to the experimental New Wave, the defining science fiction literary movement of the 1960s.

When The Sleeper Wakes (A Dystopian Science Fiction Classic)

A Dystopian Novel from the Father of Science Fiction, also known for The Time

Machine, The Island of Doctor Moreau, The Invisible Man, The War of the Worlds, The Outline of History...

e-artnow This carefully crafted ebook: "When The Sleeper Wakes (A Dystopian Science Fiction Classic)" is formatted for your eReader with a functional and detailed table of contents. The Sleeper Awakes is a dystopian science fiction novel about a man who sleeps for two hundred and three years, waking up in a completely transformed London, where, because of compound interest on his bank accounts, he has become the richest man in the world. The main character awakes to see his dreams realized, and the future revealed to him in all its horrors and malformities. Herbert George Wells (1866-1946), known as H. G. Wells, was a prolific English writer in many genres, including the novel, history, politics, and social commentary, and textbooks and rules for war games.

Alternative Careers in Science

Leaving the Ivory Tower

Elsevier Many science students find themselves in the midst of graduate school or sitting at a lab bench, and realize that they hate lab work! Even worse is realizing that they may love science, but science (at least academic science) is not providing many job opportunities these days. What's a poor researcher to do !? This book gives first-hand descriptions of the evolution of a band of hardy scientists out of the lab and into just about every career you can imagine. Researchers from every branch of science found their way into finance, public relations, consulting, business development, journalism, and more - and thrived there! Each author tells their personal story, including descriptions of their career path, a typical day, where to find information on their job, opportunities to career growth, and more. This is a must-read for every science major, and everyone who is looking for a way to break out of their career rut. * An insider's look at the wide range of job opportunities for scientists yearning to leave the lab * First-person stories from researchers who successfully made the leap from science into finance, journalism, law, public policy, and more. * Tips on how to track down and get that job in a new industry * Typical day scenarios for each career track * List of resources (websites, associations, etc.) to help you in your search * Completely revised, this latest edition includes six entirely new chapters

Day Light, Night Light

Where Light Comes From

Harper Collins Moonlight is really sunlight! Did you know that the moon doesn't make its own light? Instead, it receives light from the sun and reflects it to us on the Earth. Read and find out about how the sun, the stars and light bulbs make light so we can see. Did you know that moonlight is really sunlight? The moon can't make its own light, so it receives light from the sun and then sends it to us here on the Earth. Any child who's ever wondered about the fascinating properties of light will want to read this classic science title. Readers will even learn how fast light can travel: from the moon to the Earth in less than three seconds! Veteran science author Franklyn M. Branley's lively text and Stacey Schuett's new illustrations combine fun facts and hands-on activities in this accessible introduction to the science of light. Bee Clever Series

Odd One Out

Yogi Impressions Books Pvt. Limited (India) Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong? Illustrations by Pallavi Basu

As If Silent and Absent

Bonds of Enslavement in the Islamic Middle East

Yale University Press This groundbreaking book reconceptualizes slavery through the voices of enslaved persons themselves, voices that have remained silent in the narratives of conventional history. Focusing in particular on the Islamic Middle East from the late eighteenth to the early twentieth century, Ehud R. Toledano examines how bonded persons experienced enslavement in Ottoman societies. He draws on court records and a variety of other unexamined primary sources to uncover important new information about the Africans and Circassians who were forcibly removed from their own societies and transplanted to Middle East cultures that were alien to them. Toledano also considers the experiences of these enslaved people within the context of the global history of slavery. The book looks at the bonds of slavery from an original perspective, moving away from the traditional master/slave domination paradigm toward the point of view of the enslaved and their responses to their plight. With keen and original insights, Toledano suggests new ways of thinking about enslavement.

The Long Sleep

Createspace Independent Publishing Platform It was meant to be a great day. Several centuries into the future, the world has finally come together under a single government, the Executive Committee. They provide for the rest of humanity, most of whom live in huge arcologies - enormous tower block cities. The New Argo, has been sent to colonise a distant planet - code-named Gamma Six. The day it got there should have been a great one for humanity. Instead, upon reaching the planet, the New Argo blows up. But why don't the members of the Executive Committee want to investigate? And what really happened to the New Argo? These are the questions that Lize Carr, youngest member of the Committee, wants answered. When she employs private detective Kem Logan to investigate she unwittingly starts a chain of events that will mean danger for a great many people, including Kem and herself.
